Statement on Metrological Traceability

In accordance with Annex I, section 9.3 and Annex II section 6.1.2.4 (EU) 2017/746 manufacturers of in-vitro diagnostic medical devices are obliged to provide supervisory authorities with the metrological traceability of values assigned to calibrators and/or control materials where the performance of devices depends on the use of such materials.

During the design & development of calibrators and controls, an extensive validation is performed according to the specifications set out in the IVDR directive.
