

# Digital Painting: Adding Text

<b>National Curriculum</b> Use technology purposefully to create, organise, store, manipulate and retrieve digital content.		<b>Lesson Duration</b> It is estimated that this lesson will take approximately 60 minutes.	
<b>Aim</b> To add text to a digital painting.			
<b>Success Criteria</b> I can select the Text tool. I can write a word or sentence on a digital painting. I can format the colour and font of text.	<b>Key Vocabulary</b> Paint, text, font, tool, icon, word, sentence, format, colour, bold, italic, underline, strikethrough, size.		
<b>Resources</b> <a href="#">Lesson Pack</a> PC devices, such as laptops, Chromebooks and/or tablets.	<b>Preparation</b> <a href="#">Adding Text Lesson Presentation</a> (Google Version) - as required <a href="#">Adding Text Lesson Presentation</a> (Microsoft Version) - as required We advise you choose the presentation that fits with the painting software you are using. <a href="#">Knowledge Organiser</a> - one per class Differentiated <a href="#">Adding Text Activity Prompt Cards</a> - one per child. We advise you choose the prompt cards that fits with the painting software you are using. <a href="#">Create a Monster Word Mat</a> - as required Microsoft Paint or <a href="#">PaintZ</a> - we recommended using the painting software that is compatible with your chosen device.		

**Prior Learning:** After completing the previous lesson, children should be familiar with using the appropriate tools, within a painting, software, to amend their work.

## Learning Sequence

	<b>Remember It:</b> Using the <a href="#">Lesson Presentation</a> , ask children to explain what Molly could do to remove the mistake on her digital painting. Children then need to look at the displayed digital painting and explain to their partner how it was created, using the knowledge and vocabulary learnt from the previous lessons.	
	<b>Knowledge Organiser:</b> Display the <a href="#">Knowledge Organiser</a> to the class. As a class, highlight any words from the key vocabulary section that the children recognise. Can children discuss with their partner what those highlighted words mean?	
	<b>Text Around Us:</b> Use the <a href="#">Lesson Presentation</a> to discuss what text children see around them. Discuss why this text has been used.	
	<b>Adding Text to Paintings:</b> Use the <a href="#">Lesson Presentation</a> to discuss the digital paintings. Look at the text added onto the digital painting examples and discuss why it has been used.	
 	<b>Adding Text:</b> Use the <a href="#">Lesson Presentation</a> to discuss adding text to a digital painting and model how to add text in the painting area. Give children time to explore adding text. Children should try to write their name in the painting area.	
 	<b>Formatting the Text:</b> Use the <a href="#">Lesson Presentation</a> to explain what formatting text is and different ways text can be formatted. Then, model how to format the text. Show children how to change the Font family and size of the text. Then, model how to format the text using the Bold, Italic, Underline and Strikethrough tools. Give children time to explore the different ways they can format the text. Children should try to write their name using different formats. <b>Can children use a combination of different text formats when writing their name?</b>	

	<p><b>Changing the Text Colour:</b> Use the <a href="#">Lesson Presentation</a> to model how to change the colour of the text.</p> <p>Give children time to explore changing the colour of the text. Children should try to write their name in different colours.</p> <p><b>Can children change the colour and format of the text?</b></p>	
	<p><b>Time to Explore:</b> Using the <a href="#">Lesson Presentation</a>, the differentiated <a href="#">Adding Text Activity Prompt Cards</a> and the skills explored in the lesson already, children should paint their own monster picture and add relevant text.</p> <div style="display: flex; justify-content: space-between;"> <div data-bbox="215 414 582 761"> <p> Children should give their monster a name using the Text tool and then format the text by changing the Font family and colour of the text to red.</p> <p>The prompt card provides instructions alongside icons to support the children in completing this task.</p> </div> <div data-bbox="614 414 981 974"> <p> Children should add text to give their monster a name and to write some facts about it. Children then need to format this text by changing the Font family and colour of the text to their preference</p> <p>The prompt card provides instructions alongside icons to support the children in completing this task.</p> <p>Children may wish to use the accompanying <a href="#">Create a Monster Word Mat</a> to help with their sentences.</p> </div> <div data-bbox="1005 414 1380 862"> <p> Children should add text to give their monster a name and to write some facts about it. Children need to format the text to their own preference using all the skills learnt in the lesson.</p> <p>The prompt card provides instructions to complete this task.</p> <p>Children may wish to use the accompanying <a href="#">Create a Monster Word Mat</a> to help with their sentences.</p> </div> </div>	
	<p><b>Time to Share:</b> Using the <a href="#">Lesson Presentation</a>, children will need to work in pairs to challenge each other to demonstrate the skills they have learnt in the lesson. Encourage children to give each other tasks to complete on their device.</p>	

<p><b>Exploreit</b></p> <p><b>Nameit:</b> Ask the children to use the painting software to write a list of names of the children in the class. Format the text so that each name looks different.</p> <p><b>Labelit:</b> The children should open up a previous digital painting they have completed. Can the children add text to this painting by giving it a label or writing a sentence about it?</p> <p><b>Writeit:</b> Children should use the painting software to create their own story book. They could paint a picture for each page of the story book and add text to tell the story.</p>

# Disclaimers

We hope you find the information on our website and resources useful.

## Animations

This resource has been designed with animations to make it as fun and engaging as possible and would therefore be best viewed in PowerPoint, as using other presentation software may cause the misplacement of text and other formatting issues.

To view the content in the correct formatting, please open the presentation in PowerPoint and view it in 'slide show mode'. This takes you from desktop to presentation mode. To enter slide show mode, go to the **Slide Show** menu tab and select either **From Beginning** or **From Current Slide**.

You may wish to delete this slide before beginning the presentation.

## Disclaimers
