Teacher Notes: Guess my word

Read and write numbers from 1 to 20 in numerals and words.

Game to help children build up recognition of number words.

Playing the Game

- Dashes will appear on the presentation slide.
- Children can work individually, in pairs or small groups to discuss the possibilities from the number of letters they see on the whiteboard.
- When the first letter appears discuss what the possibilities are now? Are there less options or the same – why?
- Teacher can decide how many letters (if any) to give the children before asking them to write the word on a whiteboard.
- Give a point to each group which selects the correct word.
- Children could then make the number with concrete resources or select the number card which matches the word. Or write the number on their whiteboard.
- Again click on the presentation to reveal the number of objects and the number.

Note

It could be helpful to have the included number word cards displayed nearby for some children to refer to.
