

Growing Sounds Display

Adult Guidance

Begin creating your own **Growing Sounds Display** with this pack of sound cards. As you learn each sound, add it to your display, beginning with Level 2 sounds and progressing through to Level 5. Once all of the sounds on the cards have been learnt, the cards will take up approximately an entire display board; it is useful to consider this when starting your display. Refer to the **Completed Growing Sounds Display** to see what the entire display would look like.

Each sound that features in a sound family will have the same colour as the other sounds in its family. For example, 's' and 'ss' will be in the same family.

Use the editable cards in this pack to make your own additions to the growing sounds board should you wish to. Alternative spellings, such as 'qua' saying /quo/, have not been included as they are taught as alternative spellings.
