**Challenge Cards**

**Seasonal Changes**  
**Spring and Summer**

**Challenge Cards**

Which season is your favourite? Why?

Would you rather it was spring all year long, or summer?

Tell a friend why.

When you think of spring, which colours do you think of? Why?

When you think of summer, which colours do you think of? Why?

Make a list of all the thing you see, and all the things which happen, in spring. How many can you think of?

Make a list of all the thing you see, and all the things which happen, in summer. How many can you think of?

Write down the names of as many baby animals as you can

How can you keep yourselves safe in the sun? Think of as many ways as you can!

A colorful illustration of a woman with dark hair, wearing a blue and white striped shirt and light blue pants, herding sheep in a green field. She is holding a long rope. In the foreground, there are two sheep with white wool and dark brown faces and legs. One is a large adult sheep, and the other is a smaller lamb. The field is dotted with yellow dandelions. In the background, there are green trees and a fence line.

**Seasonal Changes**  
**Spring and Summer**

**Fact Cards**

**Seasonal Changes**  
**Spring and Summer**

**Fact Cards**

**Seasonal Changes**  
**Spring and Summer**

**Fact Cards**

**Seasonal Changes**  
**Spring and Summer**

**Fact Cards**

**Spring** is the season which follows **winter** but comes before **summer**.

In the United Kingdom **March, April** and **May** are the months of **spring**.

Not all places in the world experience **spring** at the same time. For some countries, such as Australia, New Zealand and South Africa, the months of **March, April** and **May** are actually in **autumn!** This is because of how the Earth is tilted on its axis.

Lots of crops are planted in the spring and many trees, plants and bulbs begin to

**GROW.**

Many birds start building their nests in the **spring** and lots of baby animals are born, such as chicks and lambs.

**Spring** weather can be varied; some days can be very **cold** and others much **warmer**. Springtime can also be windy and wet so people often talk about March winds and April showers.

**Summer** is the season which follows spring but comes before **autumn**.

In the United Kingdom **June, July** and **August** are the months of **summer**.

When it is **summer** in the Northern Hemisphere (countries which are north of the Equator),

---

it is **winter** in the Southern Hemisphere (countries which are south of the Equator).

**Summer** is the season with the

**LONGEST**

days and the

**HIGHEST**

temperatures.

Schools in the United Kingdom have six weeks of holiday in the **summer**, which means no school!

This is because in the past, families needed children at home to help pick the fruit and harvest the land which they owned.

Although the warmer weather means we can spend more time doing fun things outside, the rays from the sun can also harm our bodies. To stay safe in the sun we must never look directly at the sun and we should wear sun cream to prevent sunburn, as well as sun hats and sunglasses.
