WHAT
IS A
HABITAT?

This book belongs to:

WHAT IS A HABITAT

There are many different types of animal habitats.

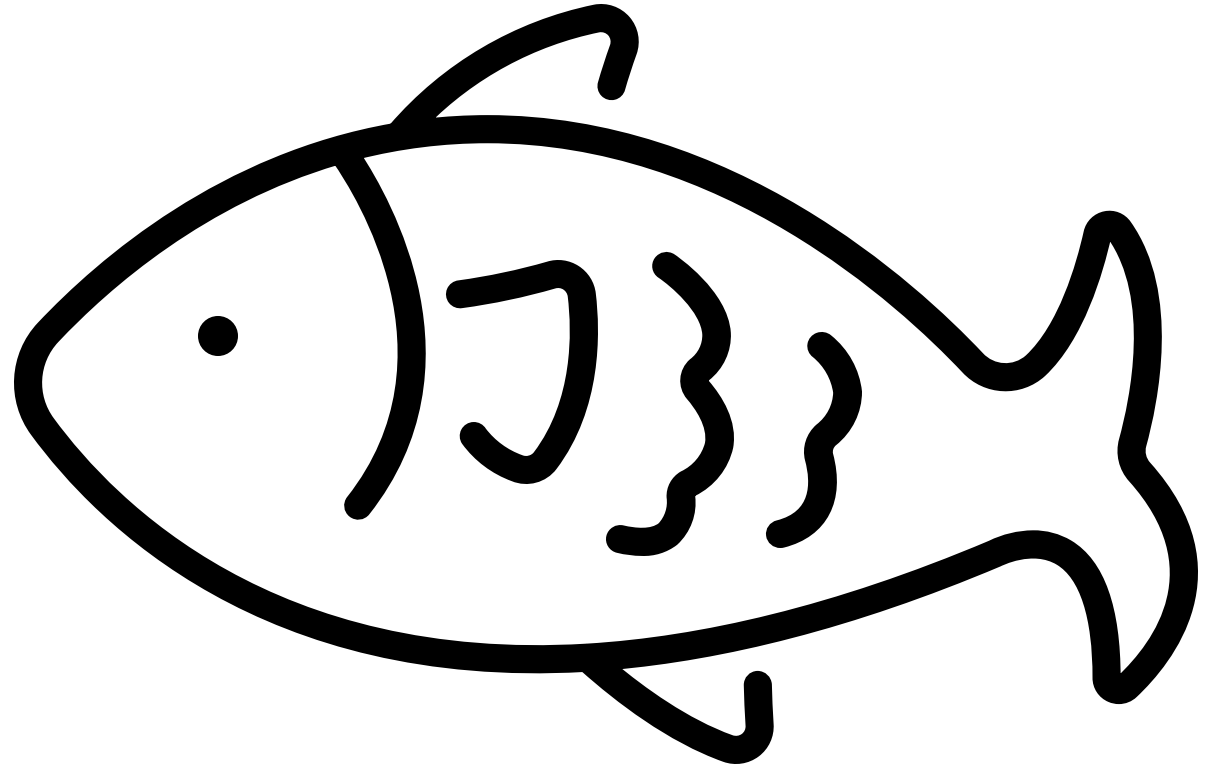

A habitat is the natural home or environment a plant or animal lives in.

WHAT IS A HABITAT?

Habitats provide important things animals need to **survive**, can you count them?

1

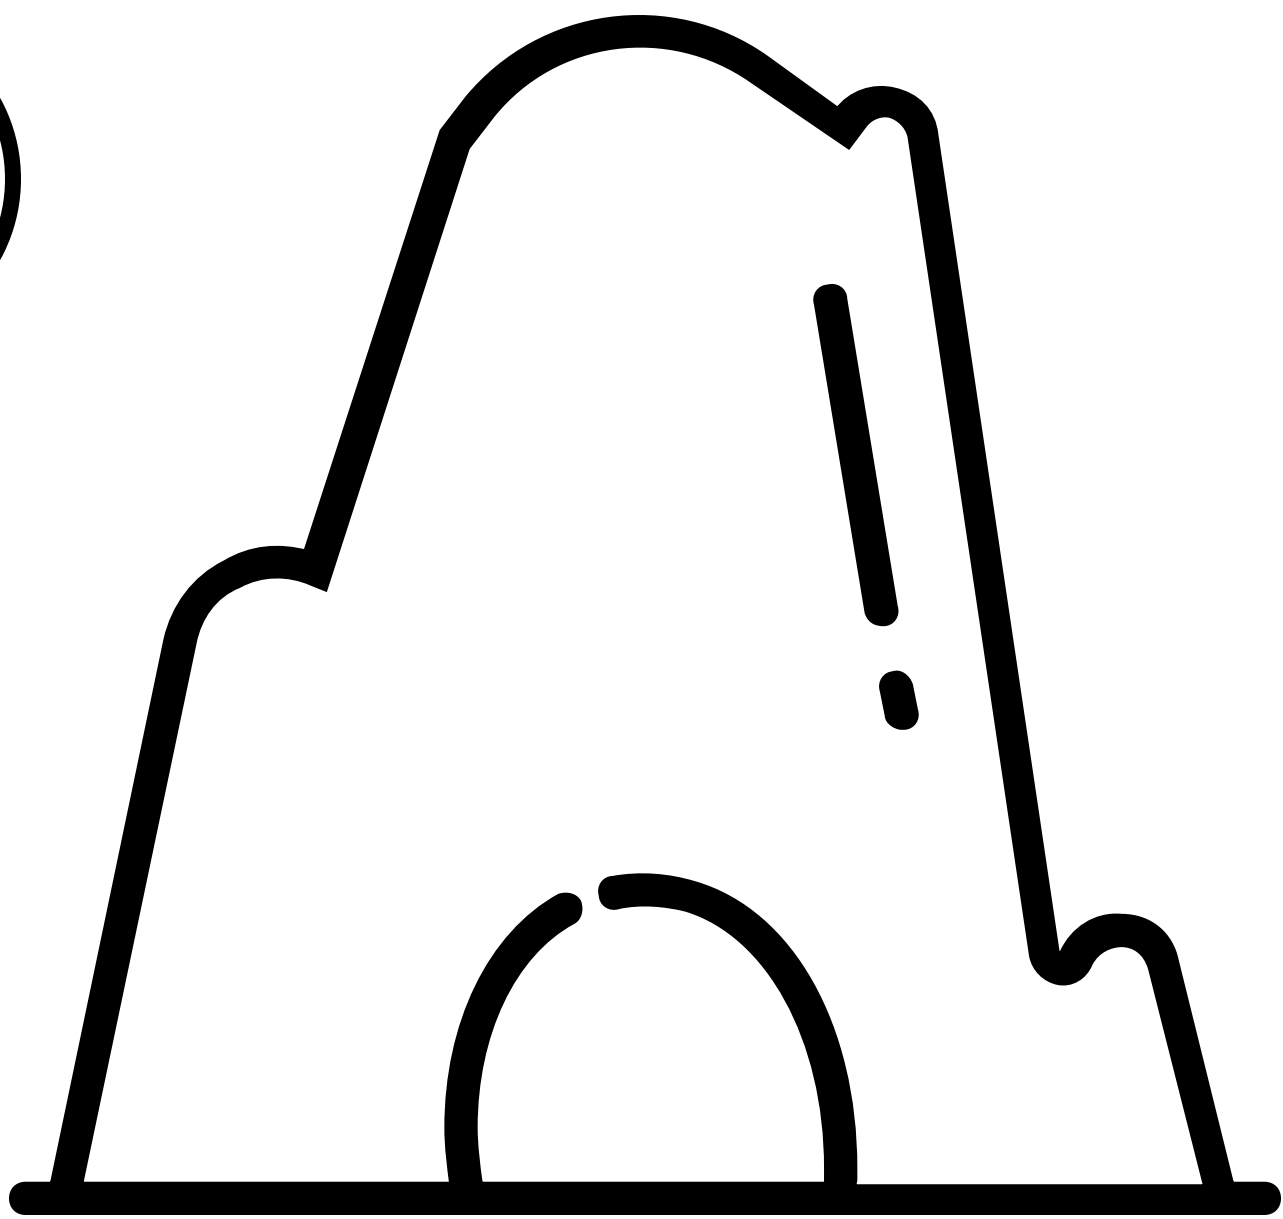

food

2

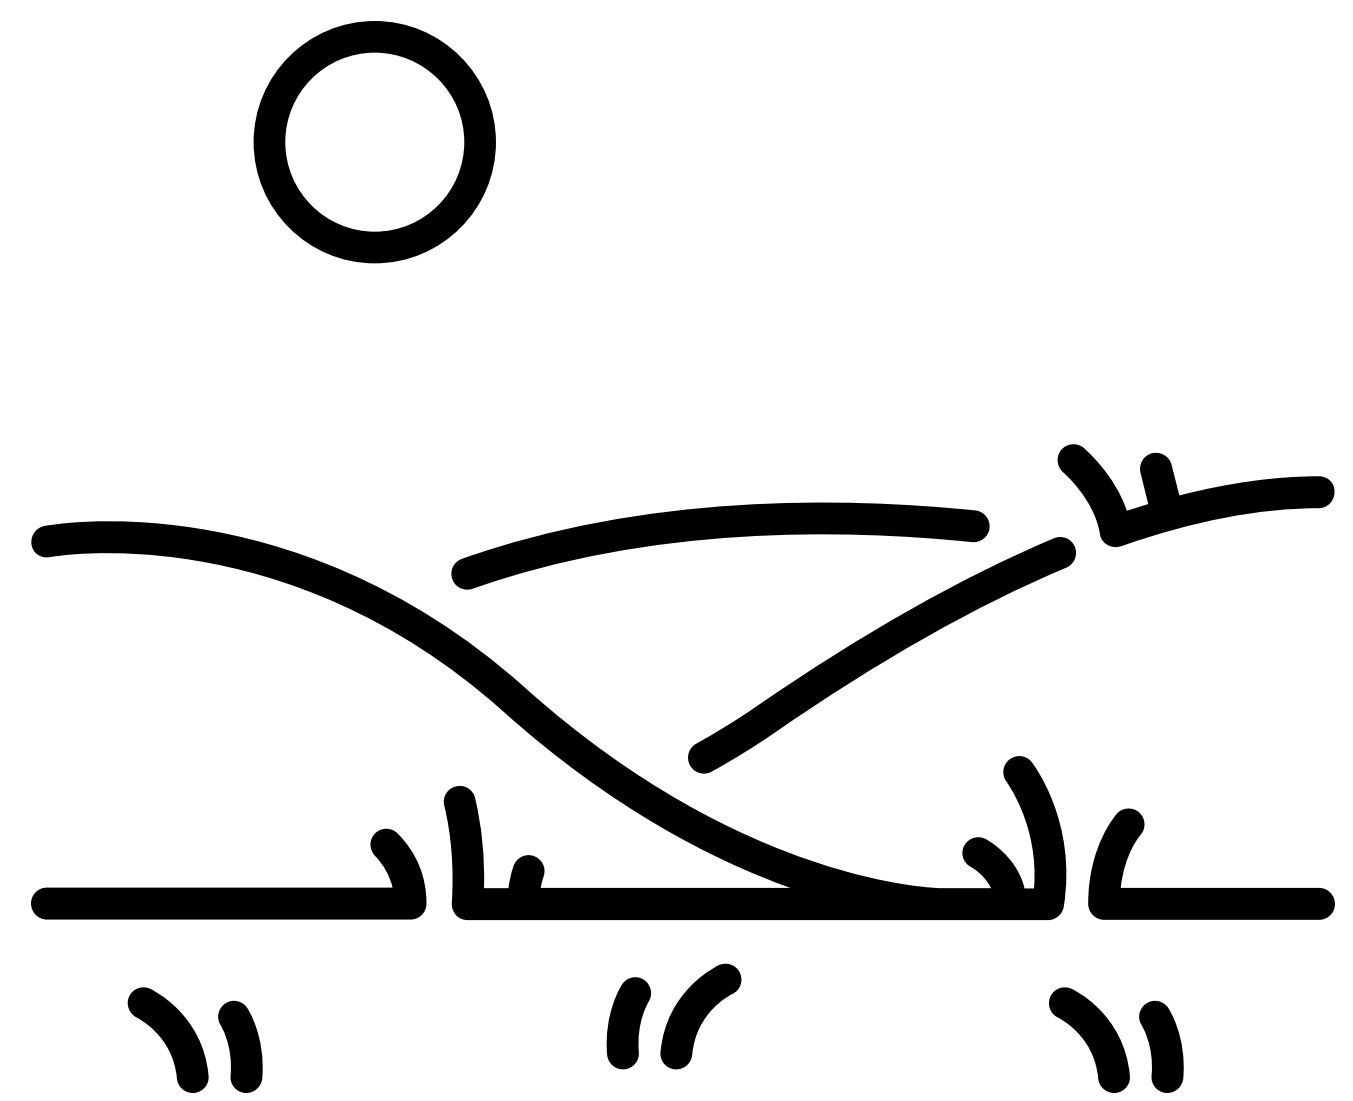

water

3

shelter

4

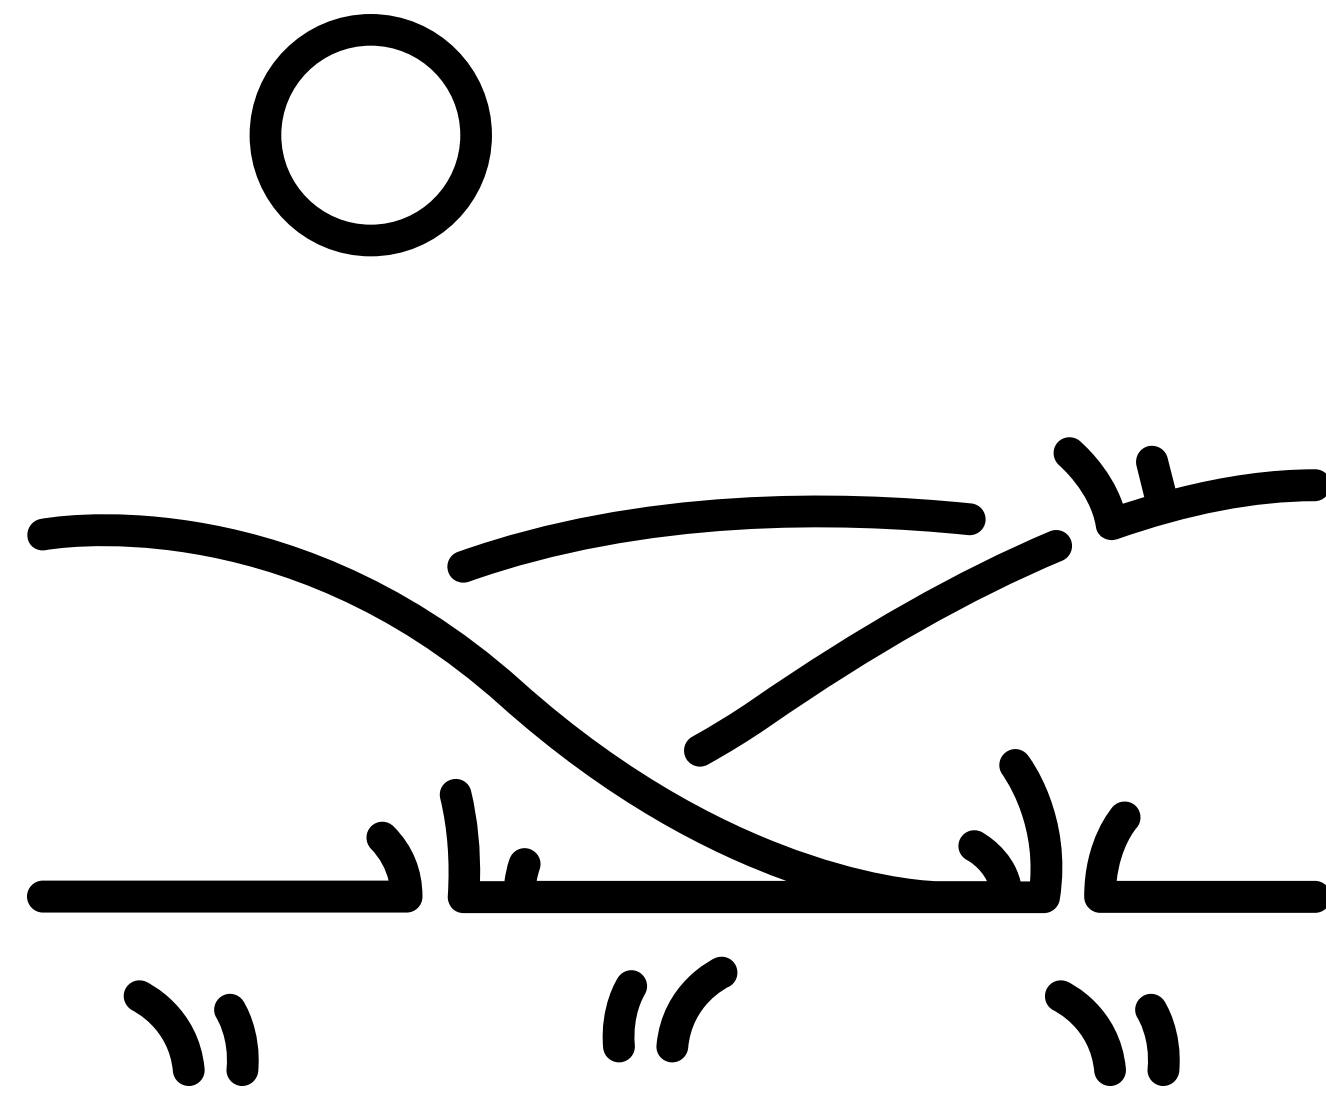

space

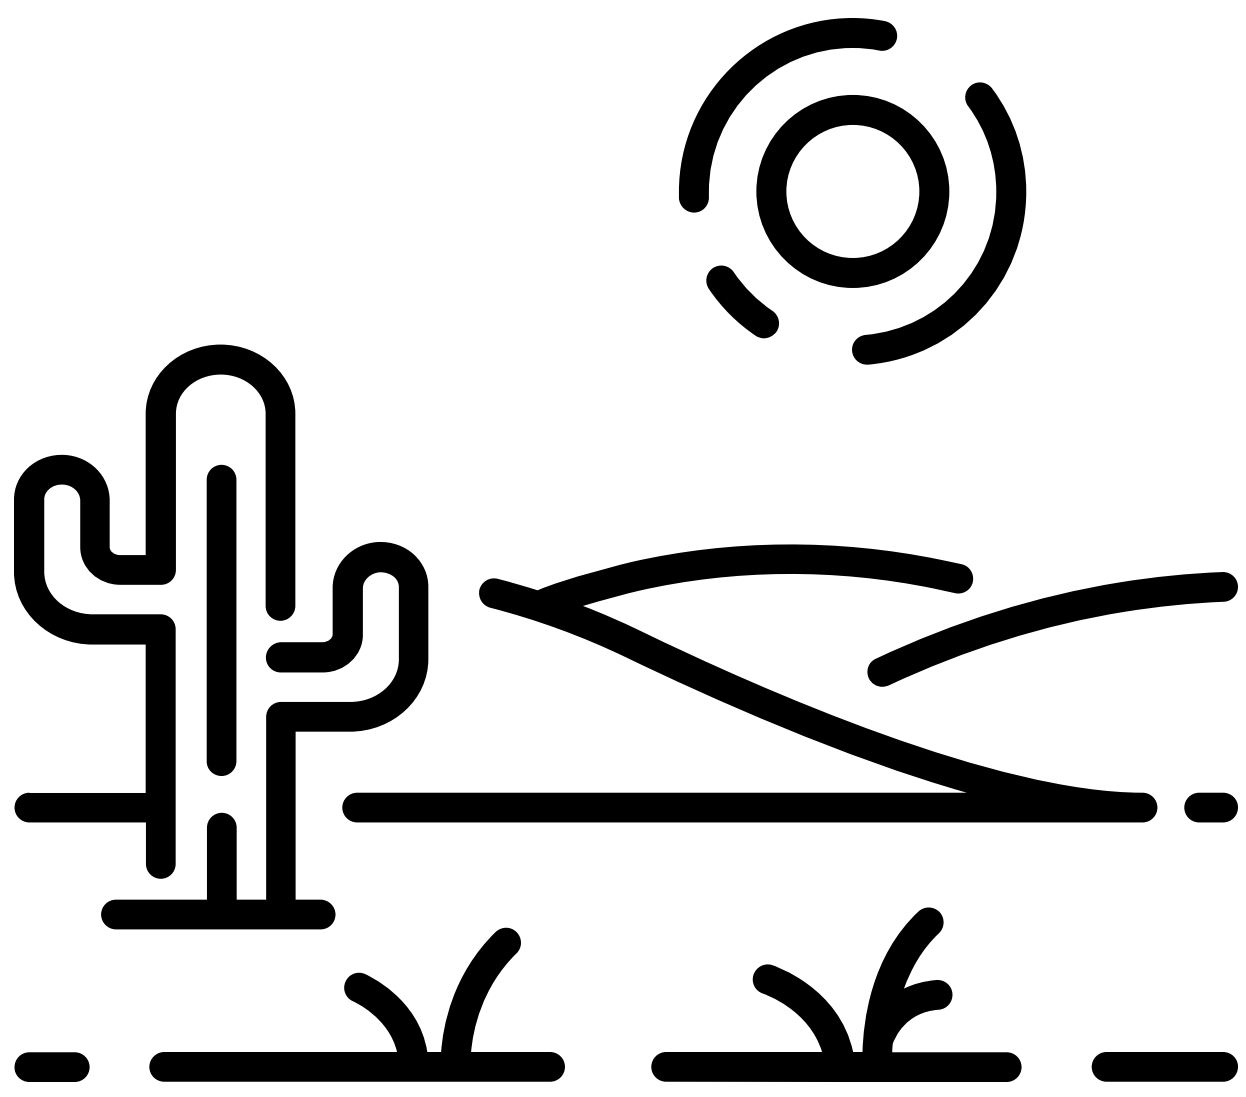

WHAT IS A HABITAT?

There are two main types of habitats.

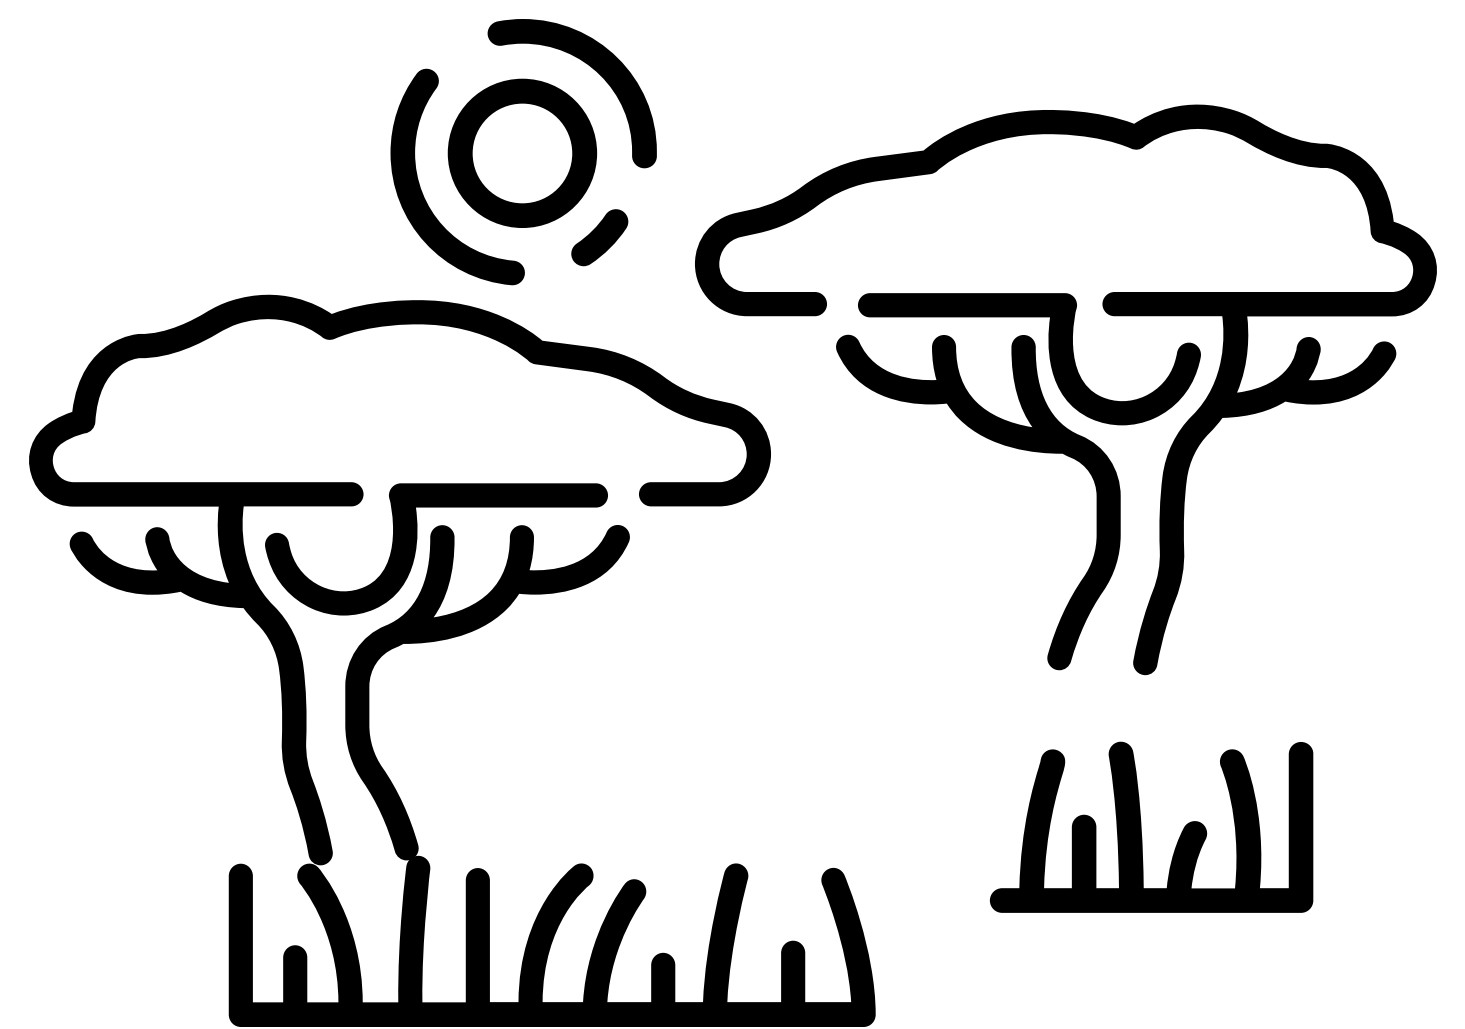

Terrestrial habitats
are found on land.

grasslands

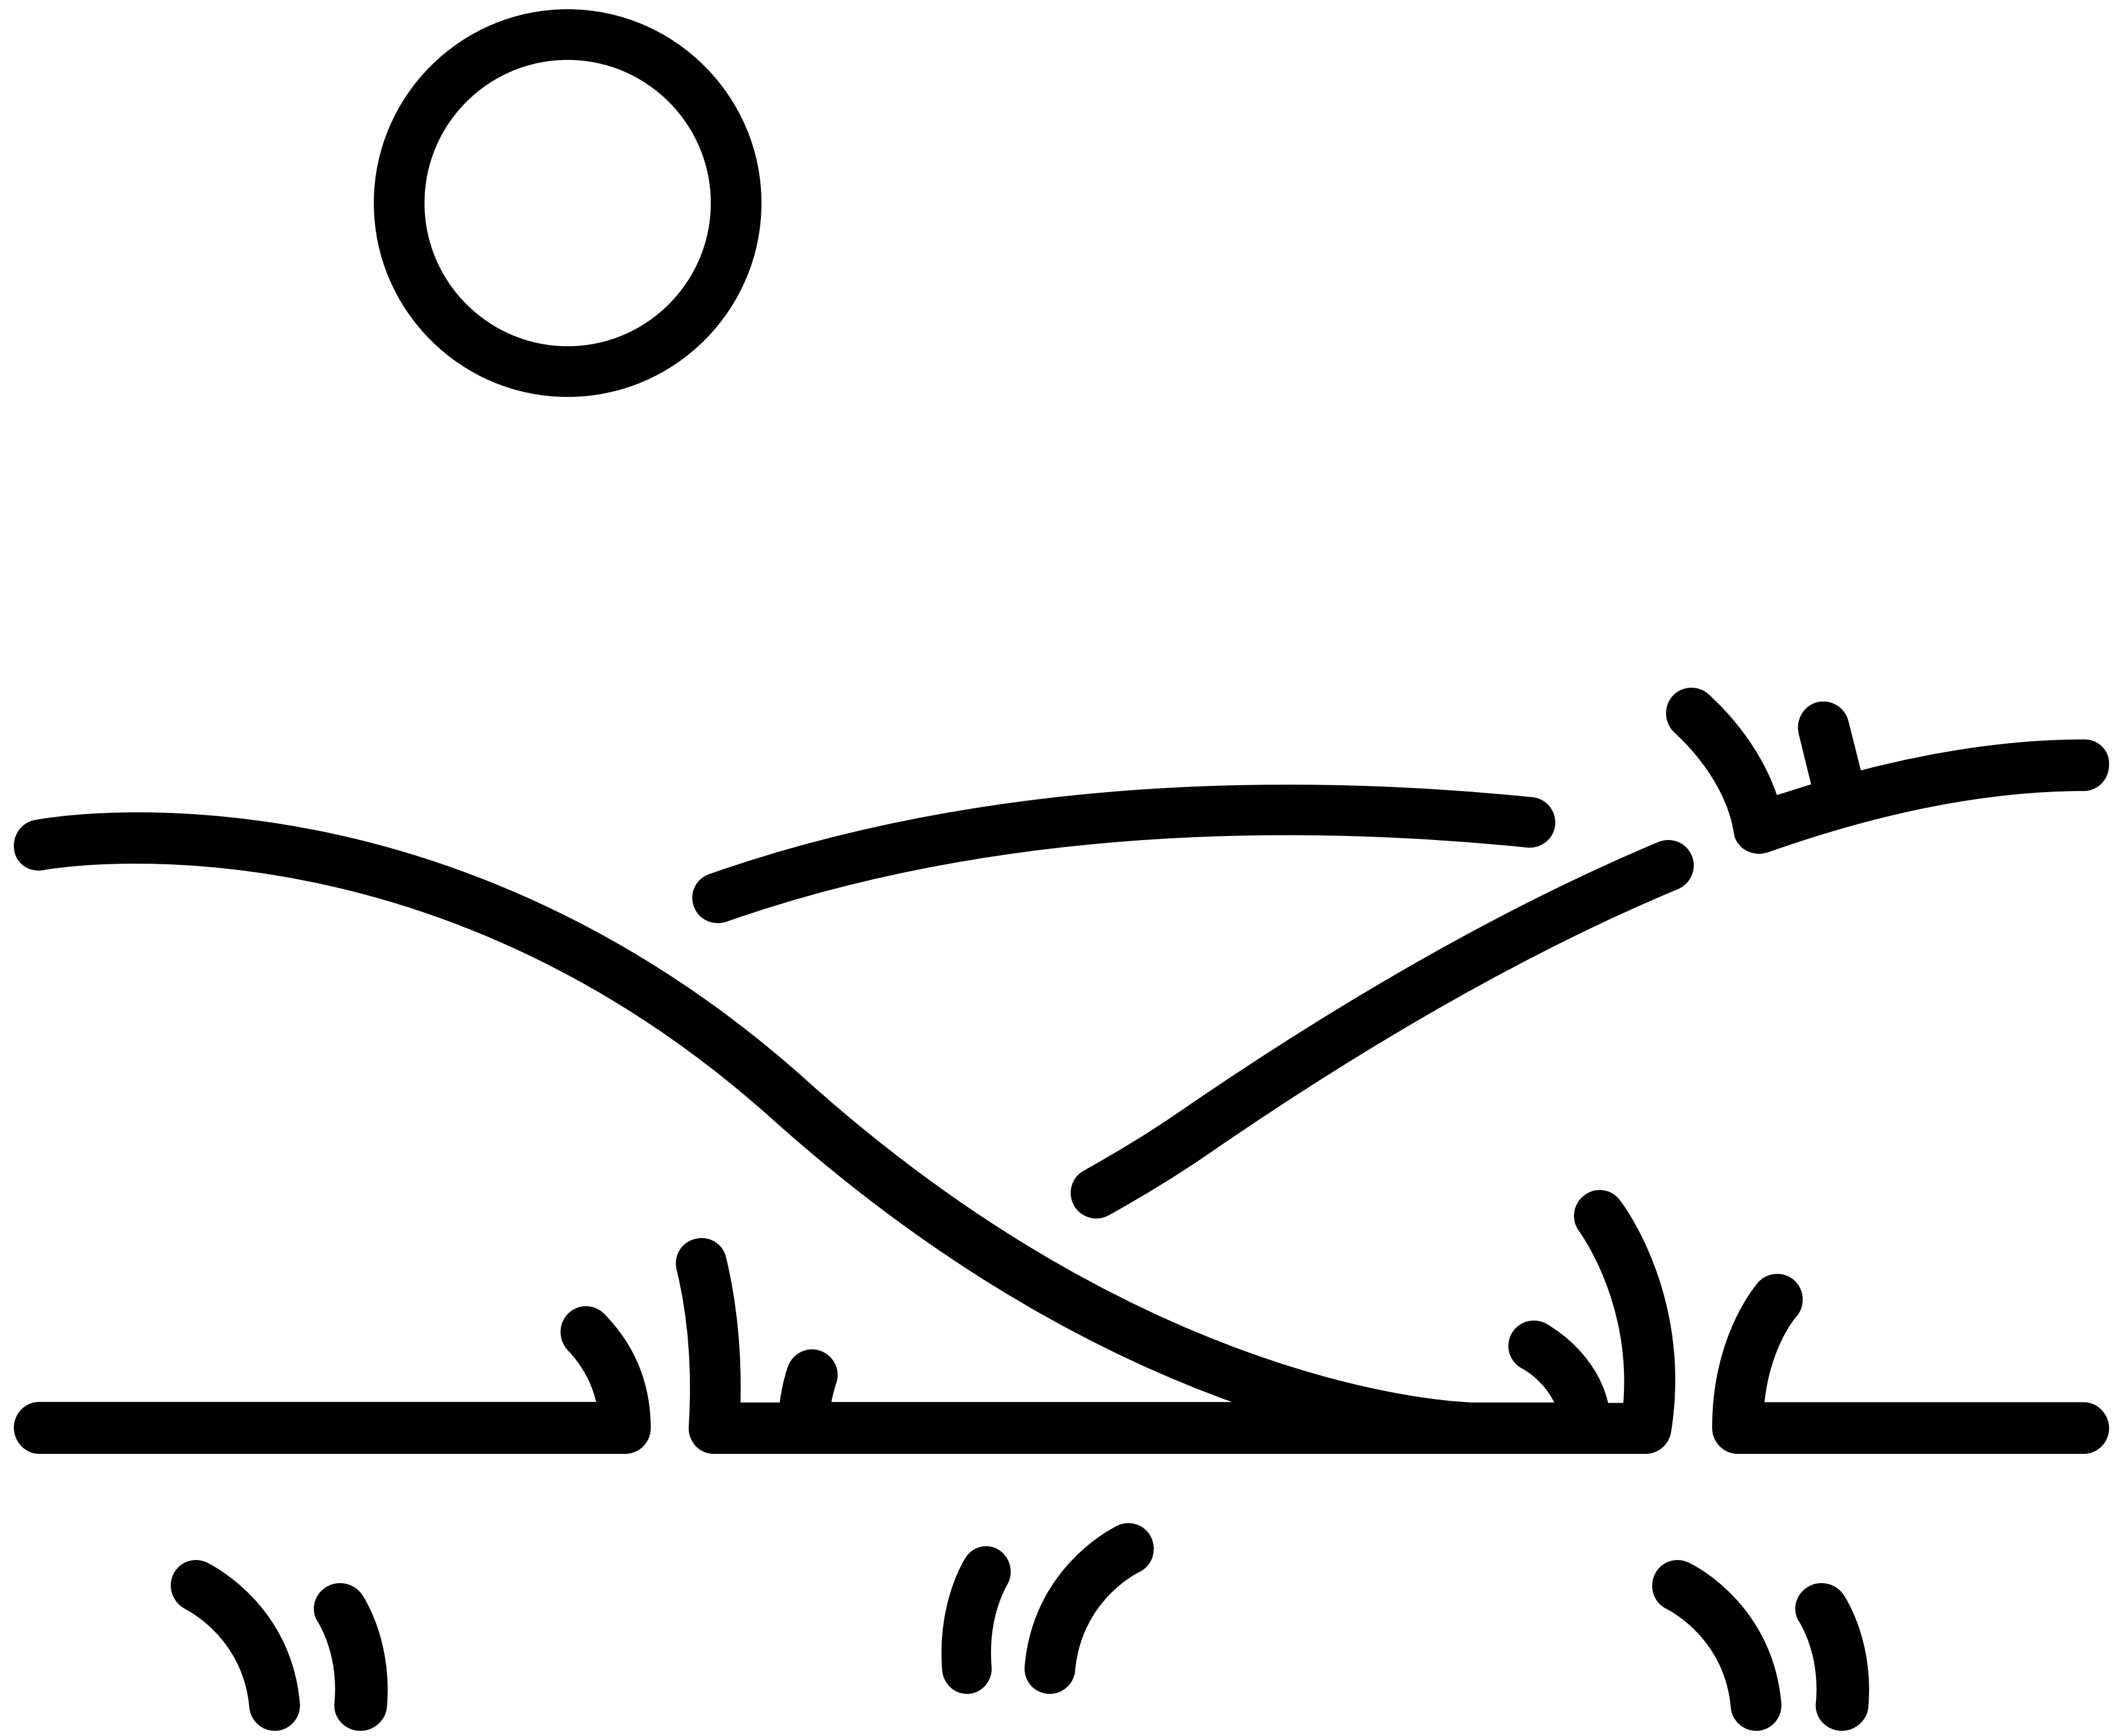

deserts

forests

WHAT IS A HABITAT?

Many animals live in **grasslands** which are large open **areas**. Draw some animals that live in grasslands.

Some animals that
live in grasslands are

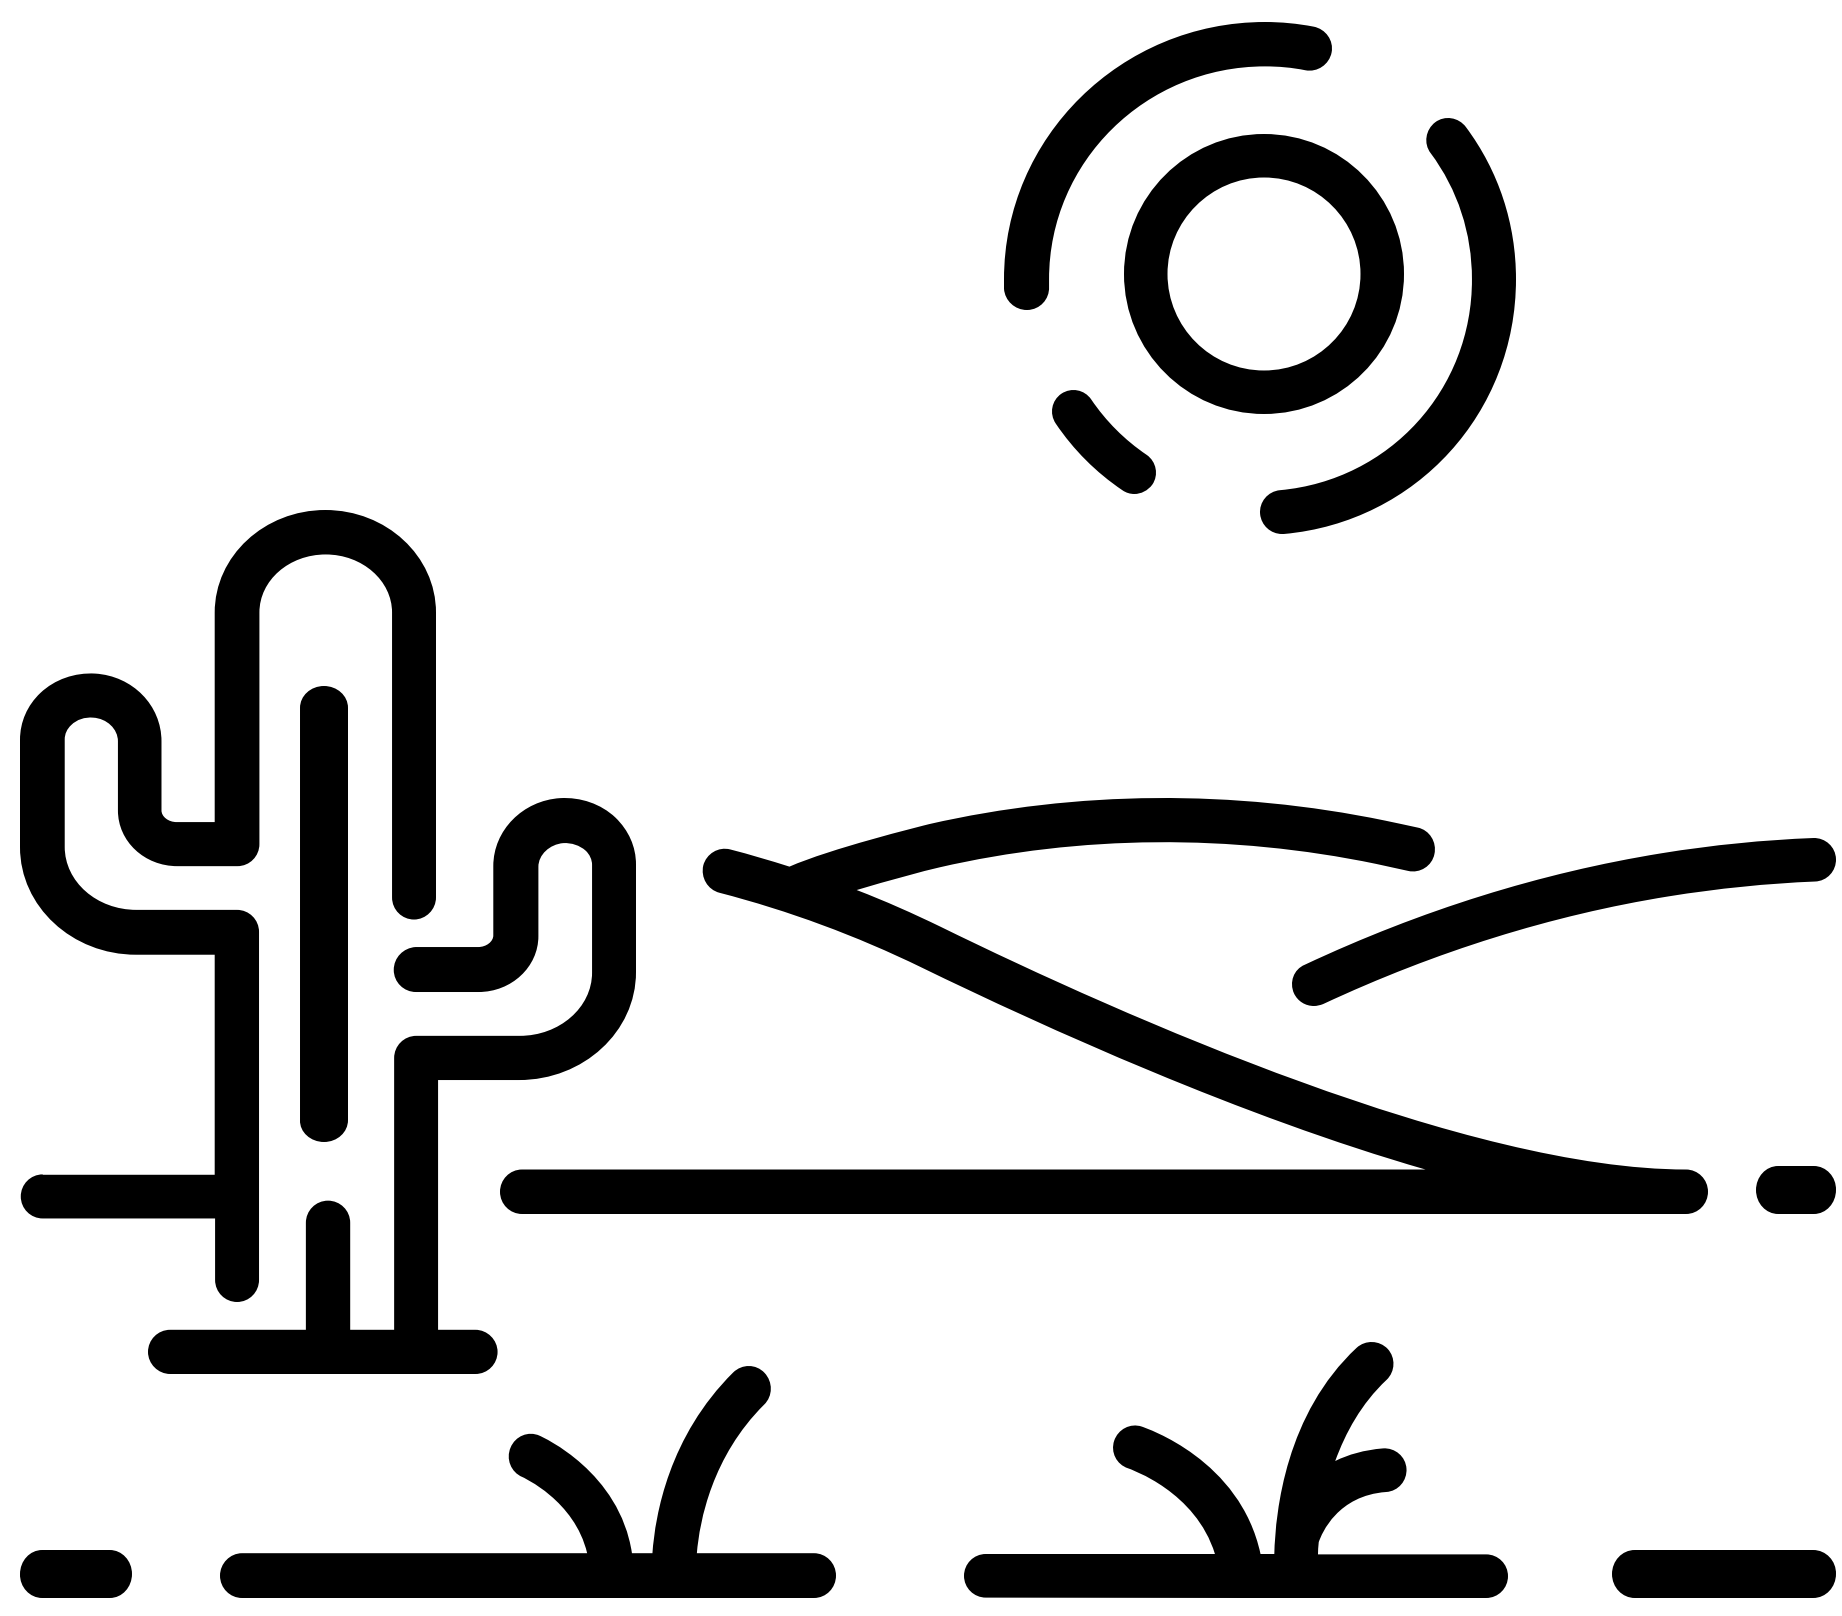

WHAT IS A HABITAT?

Although deserts do not have a lot of water,
animals have learned to survive.

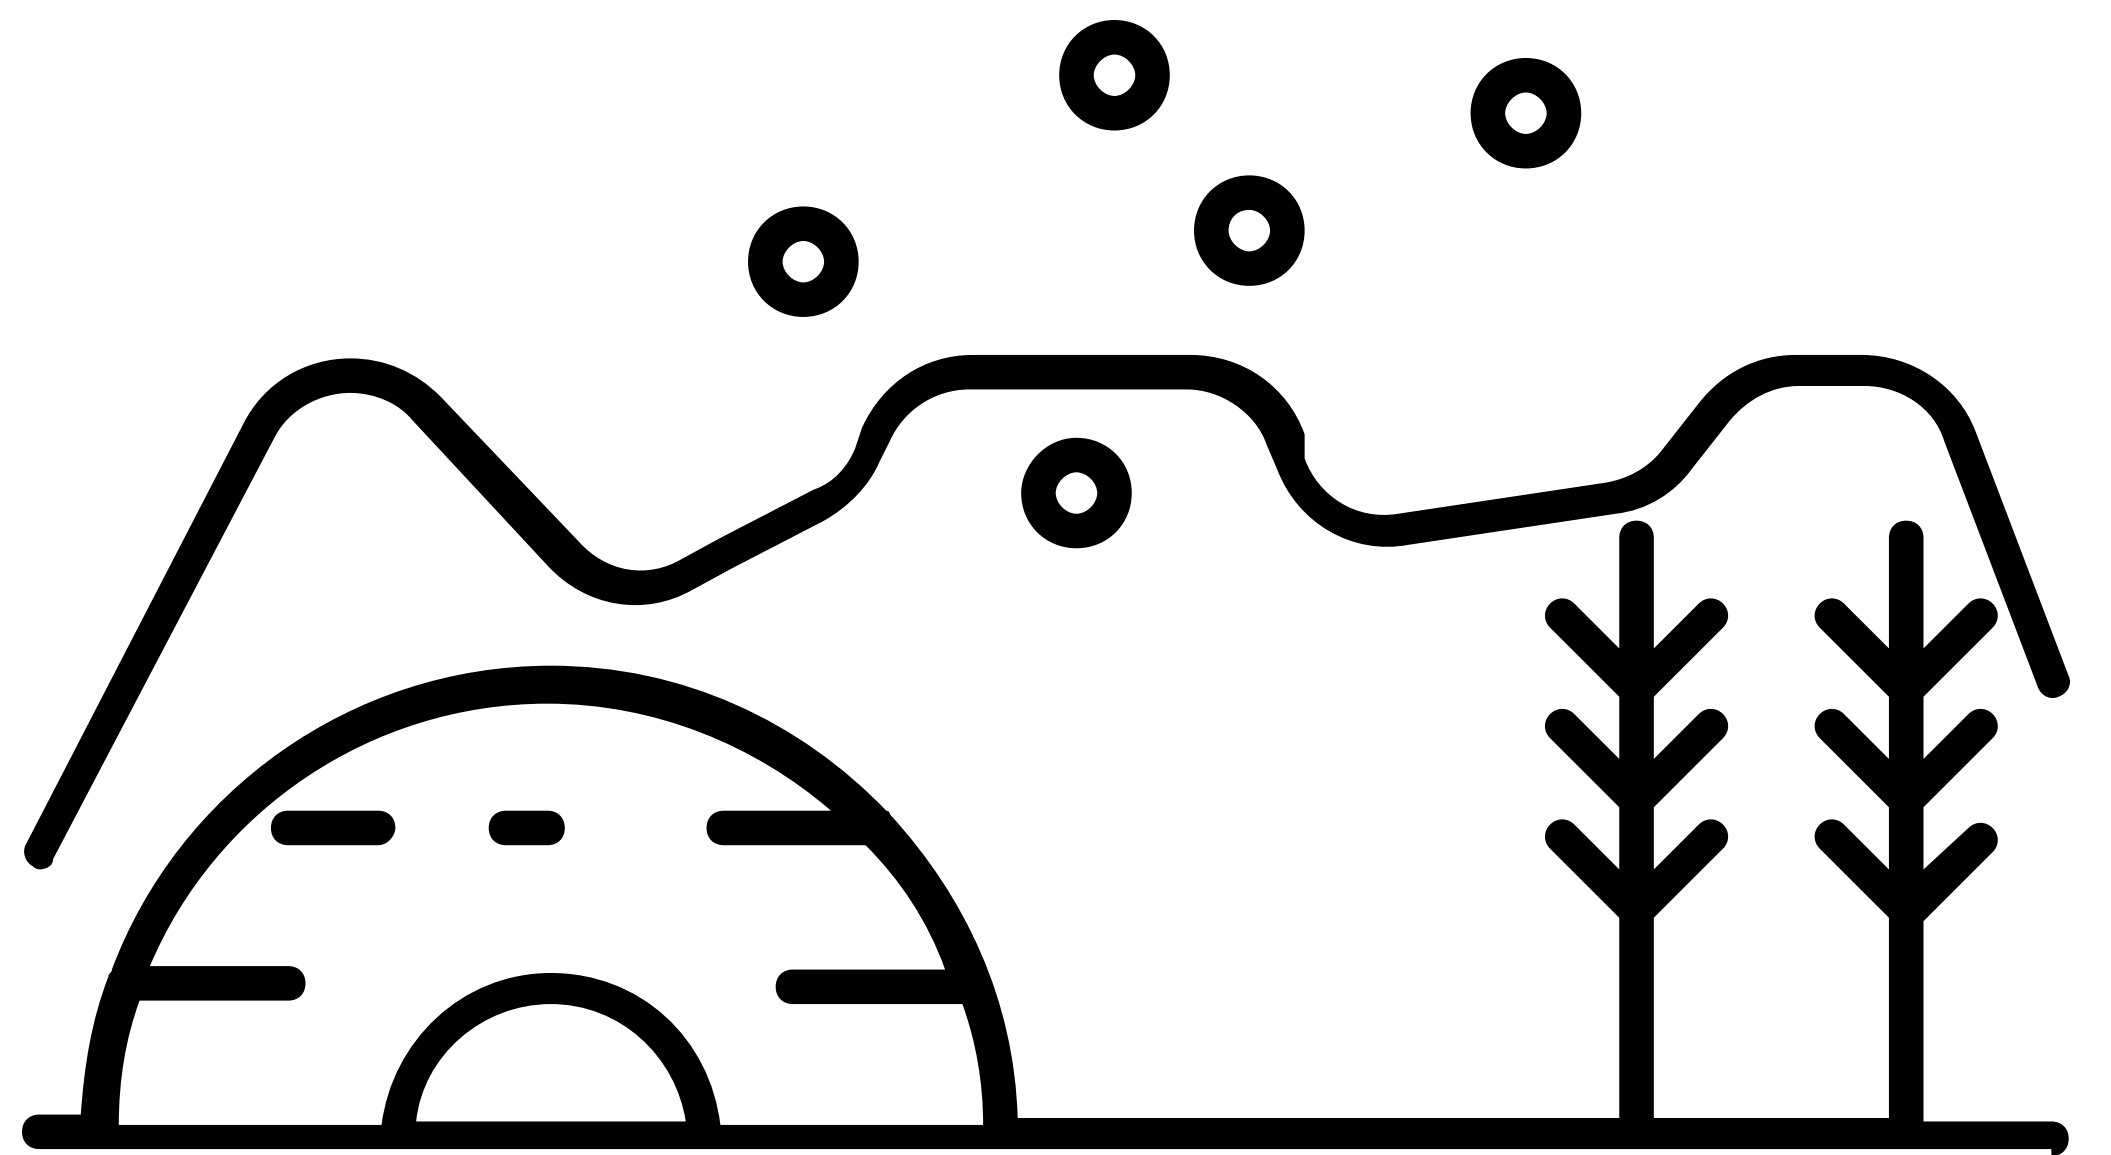

Deserts are very dry.

Some deserts are very

hot, others very cold.

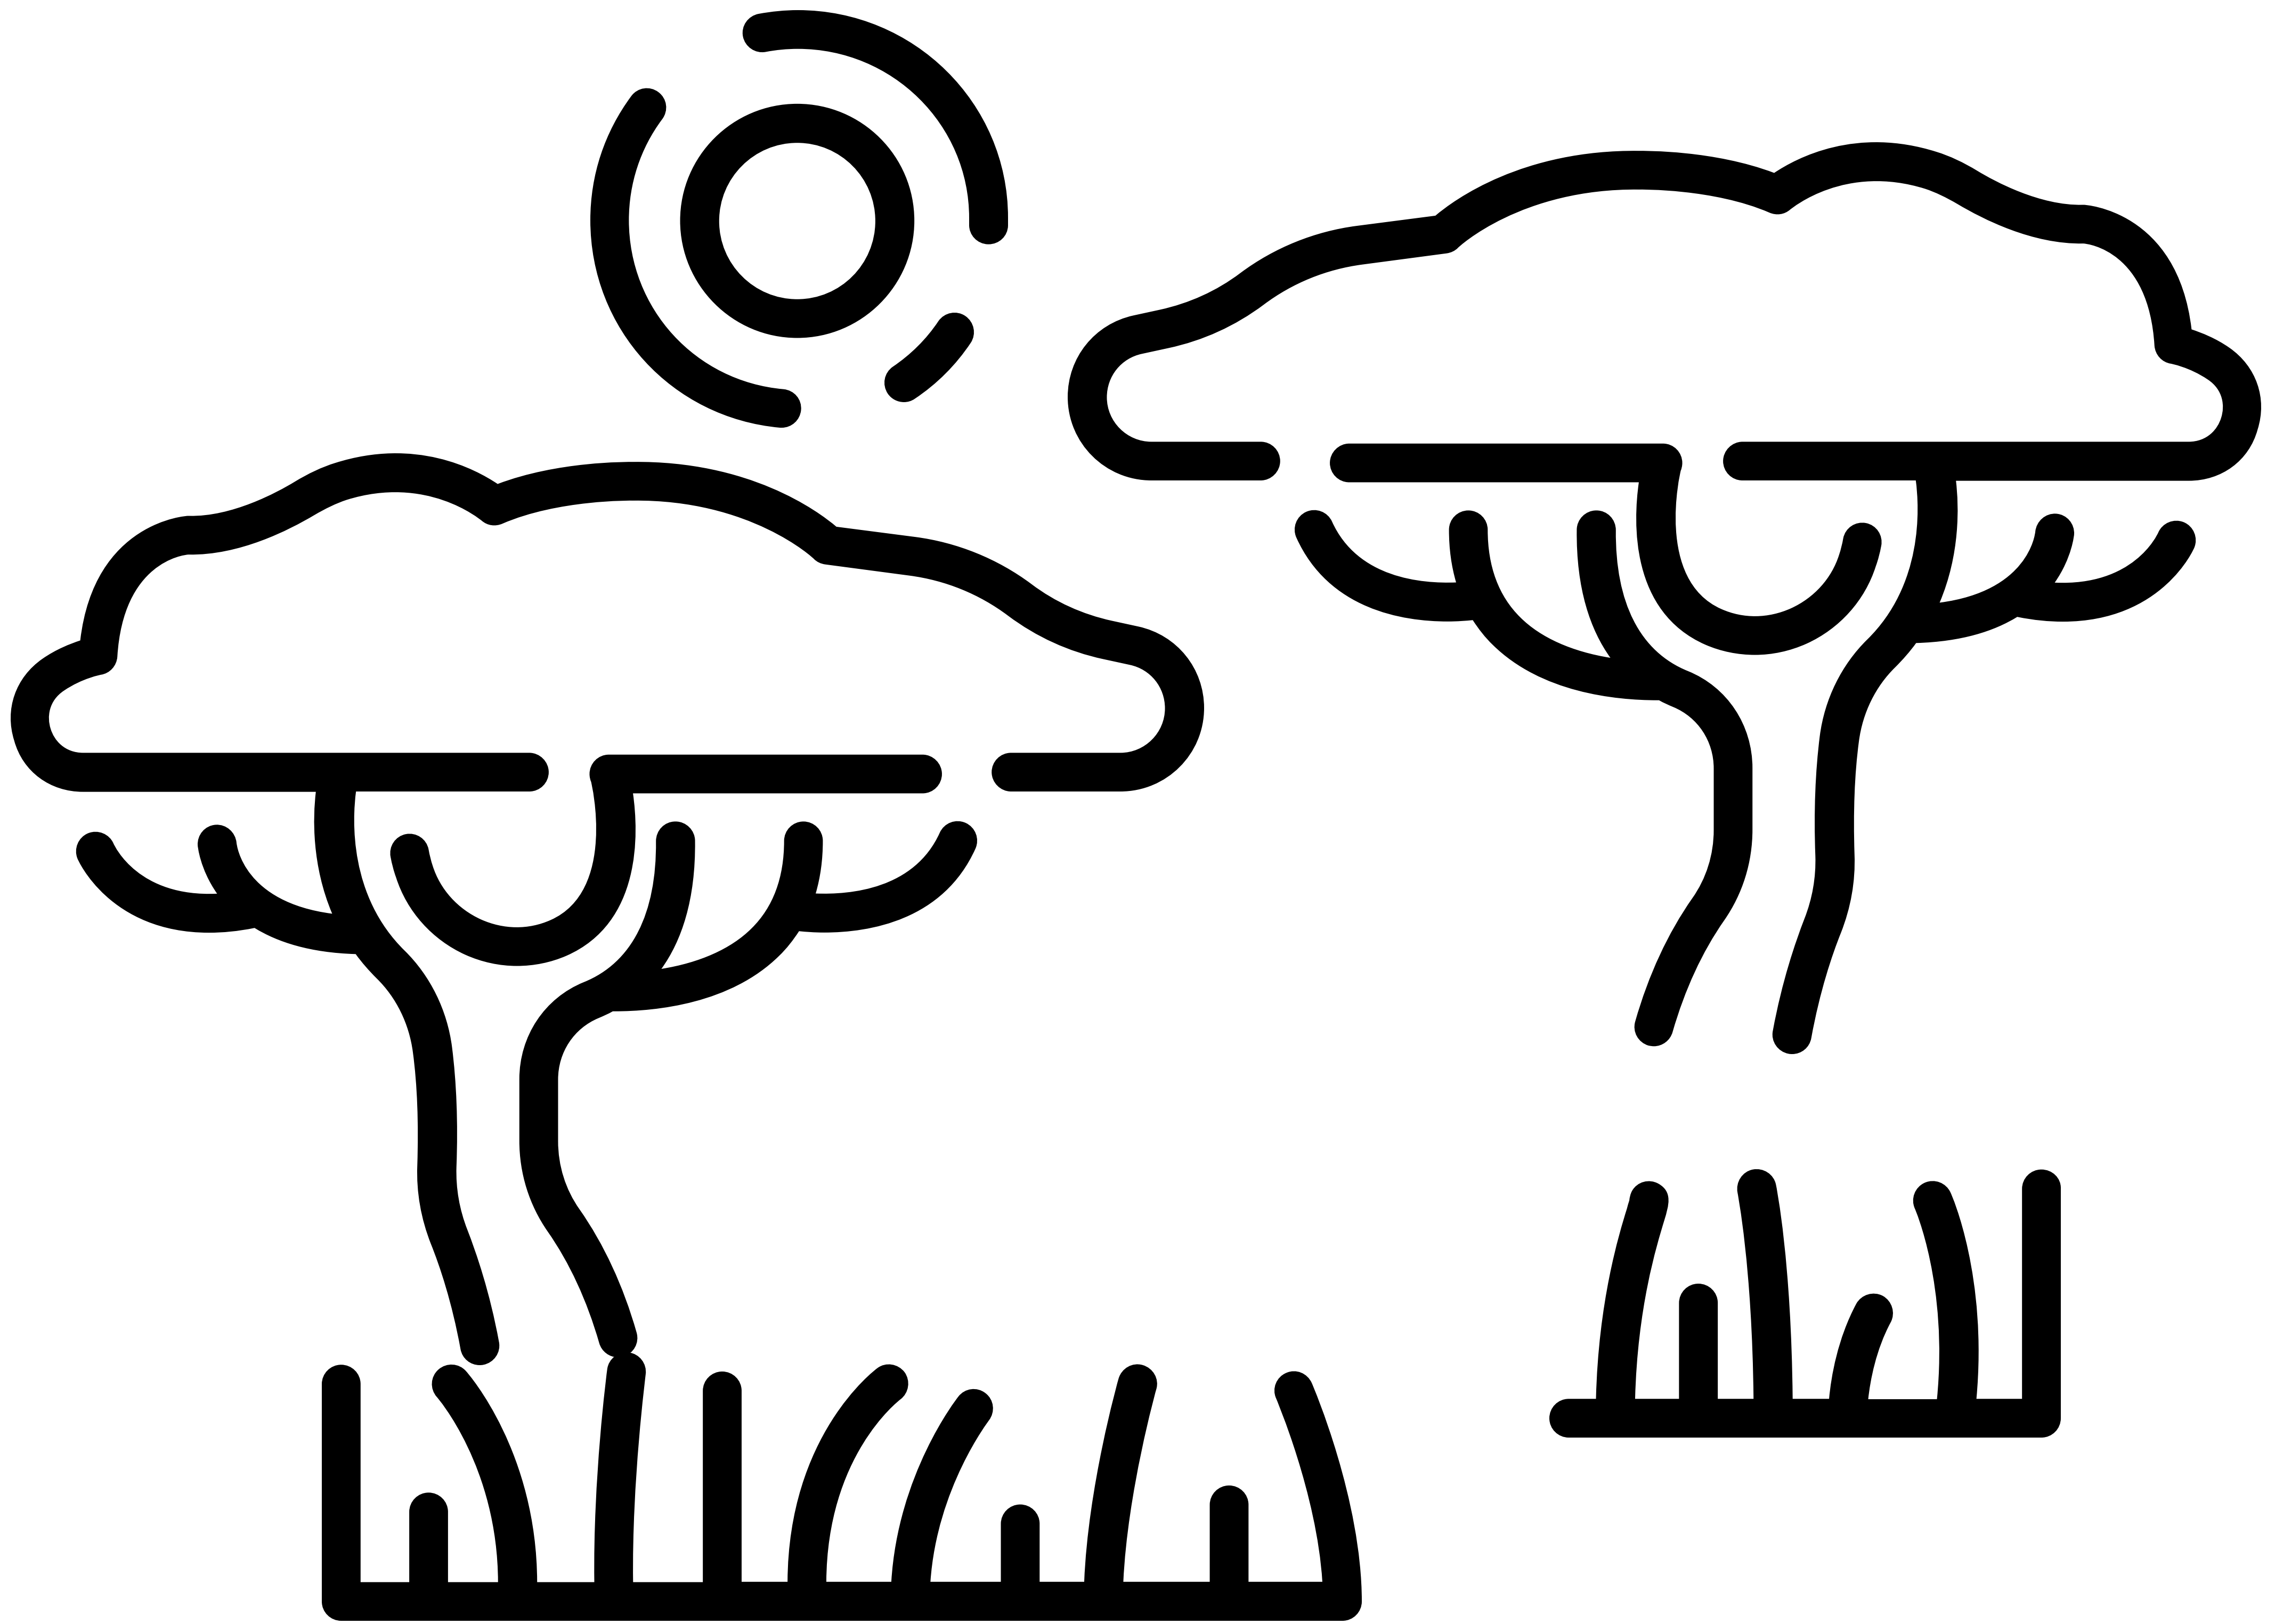

Sahara

WHAT IS A HABITAT?

There are **different types of forests**. Rainforests are very wet forests with tall trees and a lot of rain.

Can you name a rainforest animal?

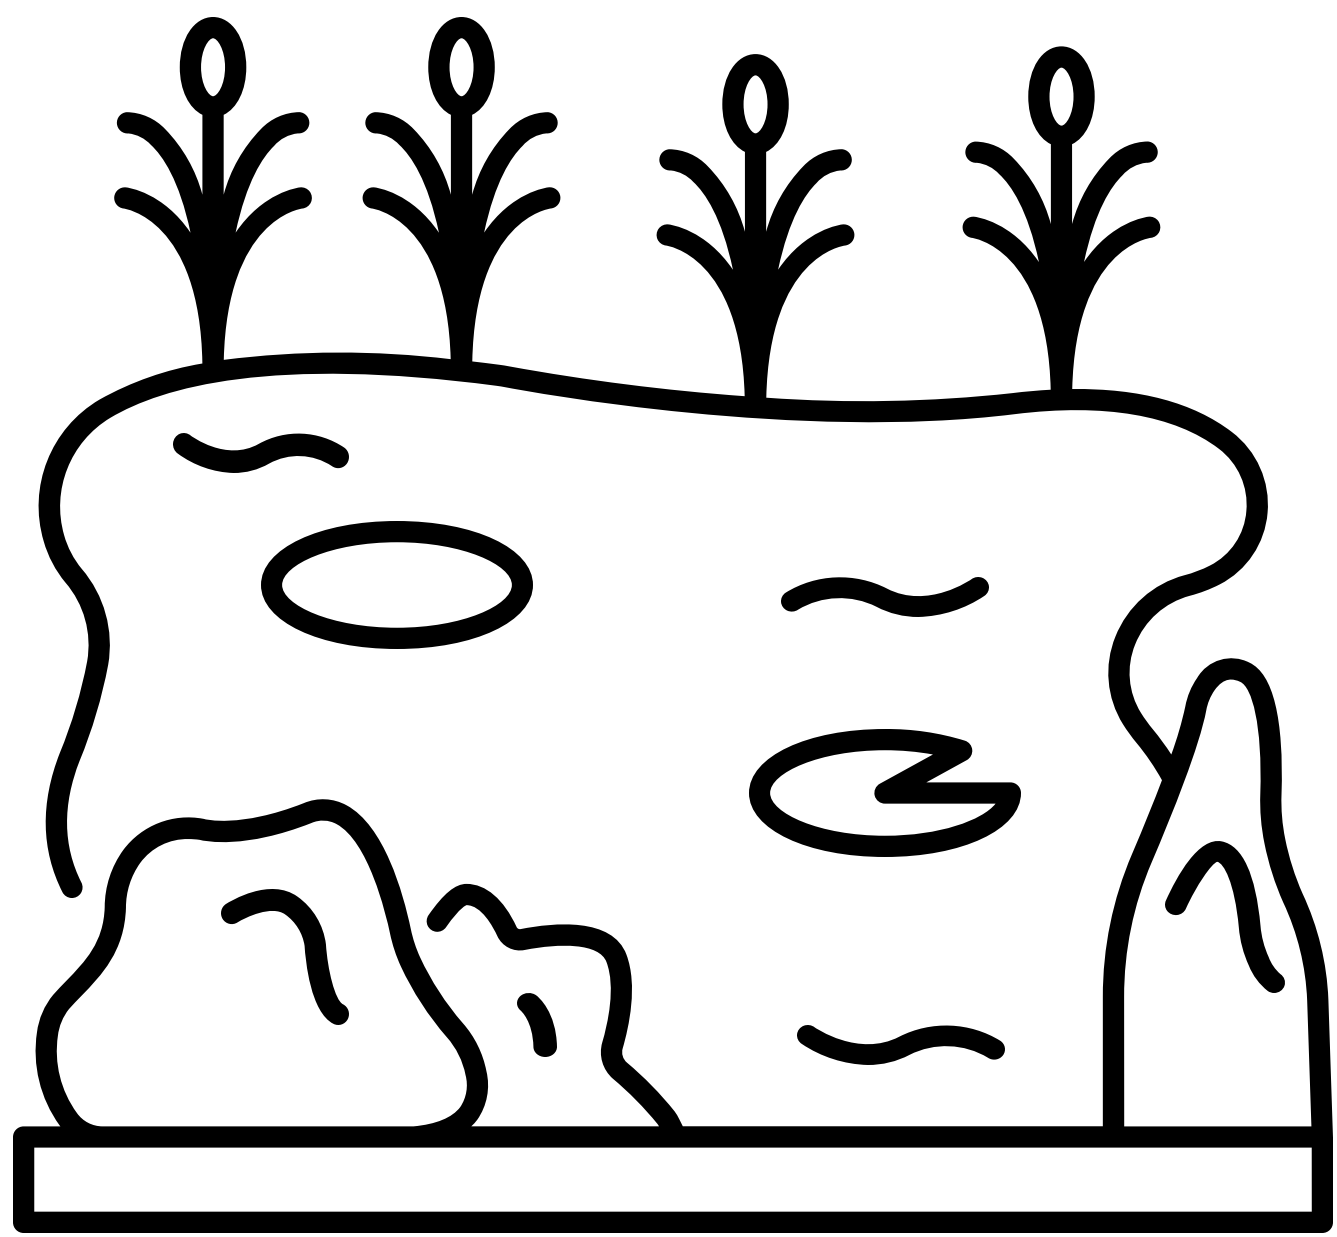

Rainforests are home
to many unique
animals like

WHAT IS A HABITAT?

The other main type of habitat is aquatic.

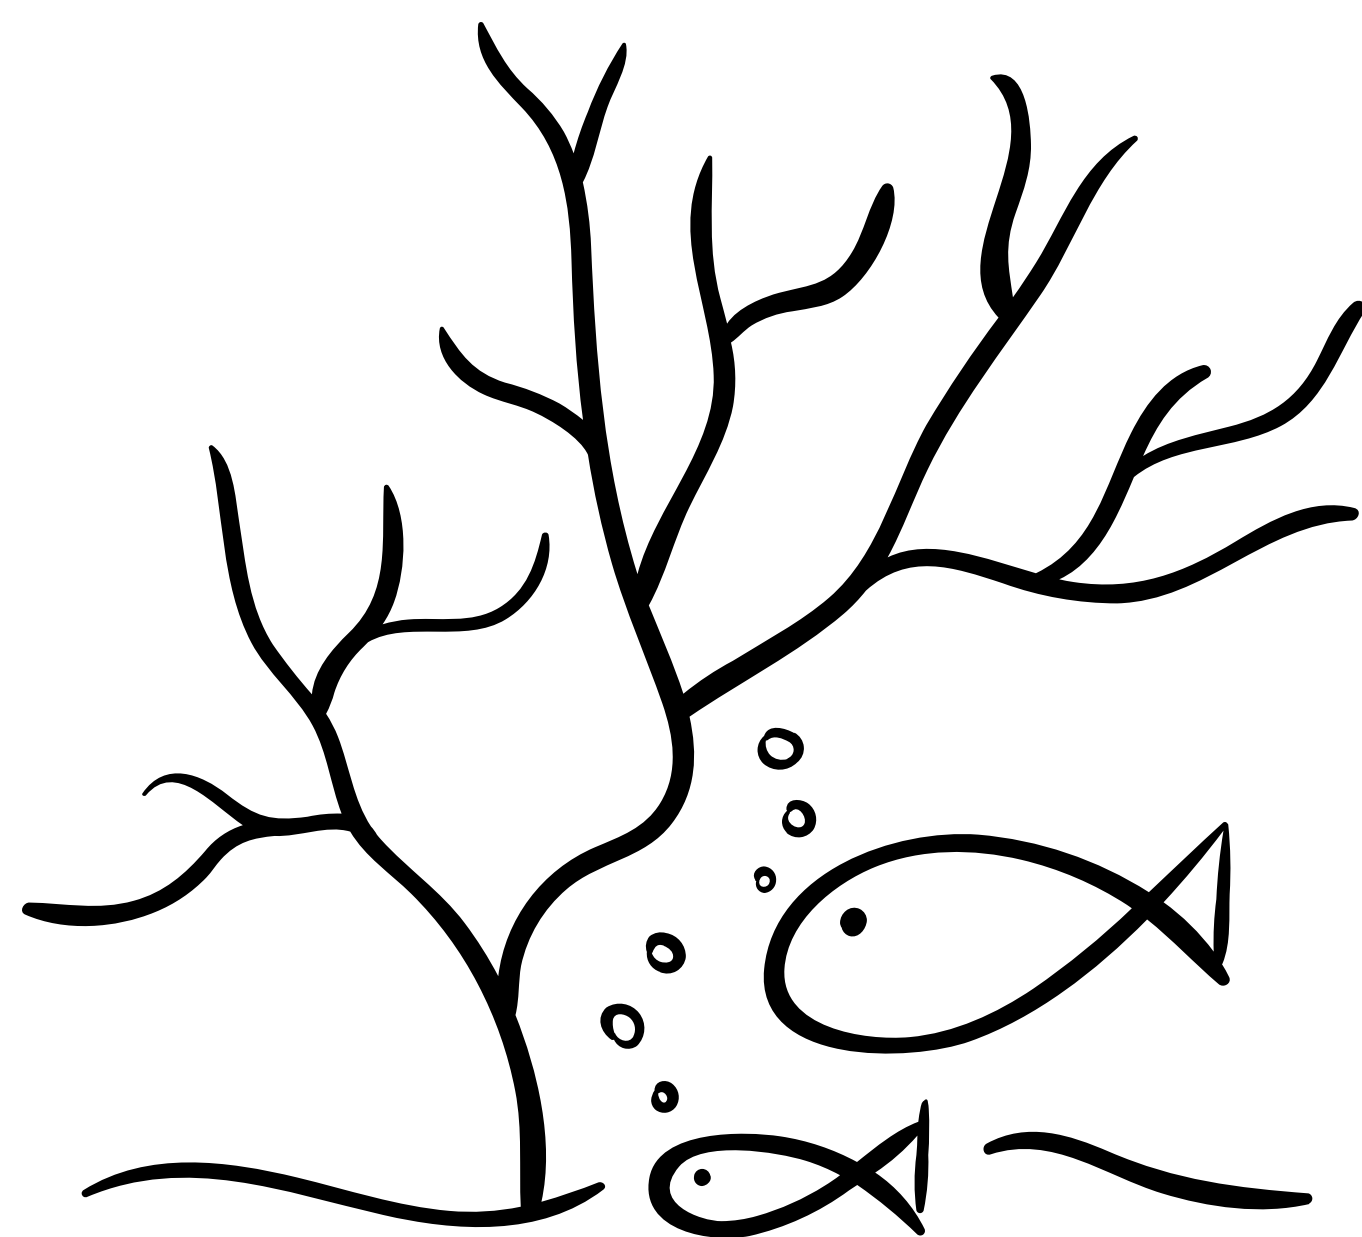

Aquatic habitats
are found in water.

pond

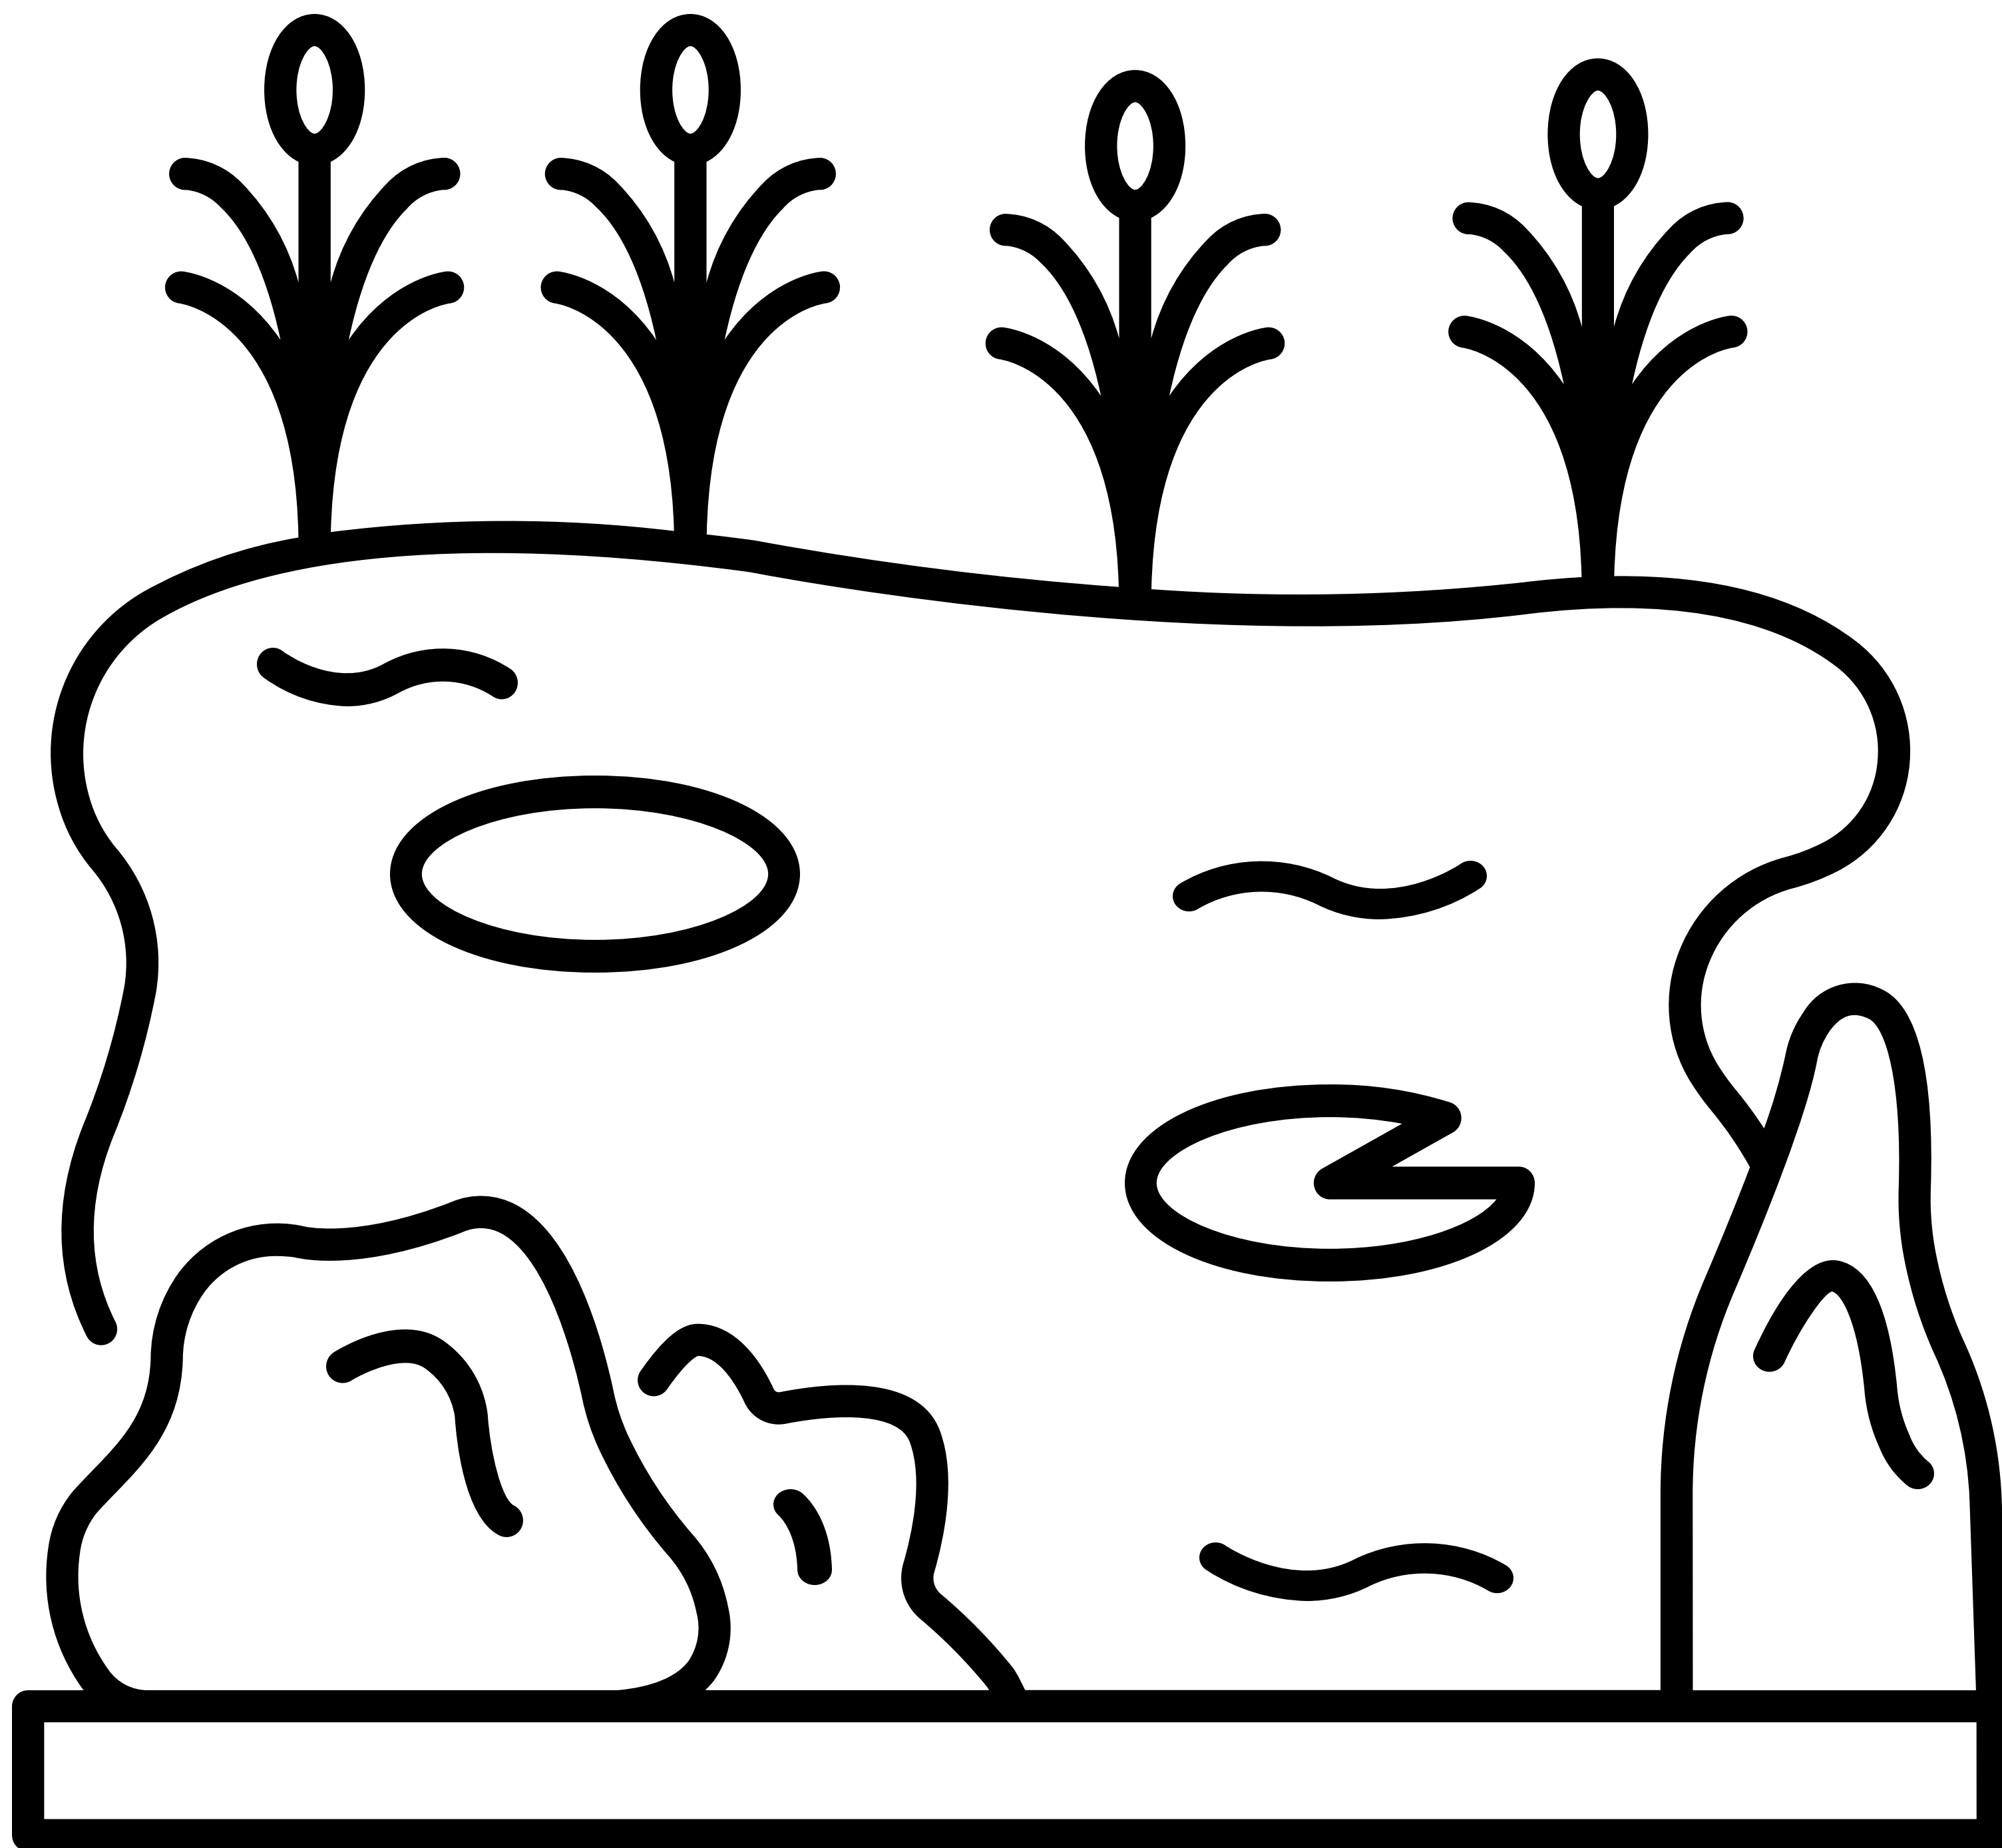

river

ocean

WHAT IS A HABITAT?

Ponds are fresh water habitats that usually have many plants growing in them.
Can you name some animals that live here?

Ponds are home to

WHAT IS A HABITAT?

Freshwater rivers flow from the mountain to the ocean.
Can you name some river animals?

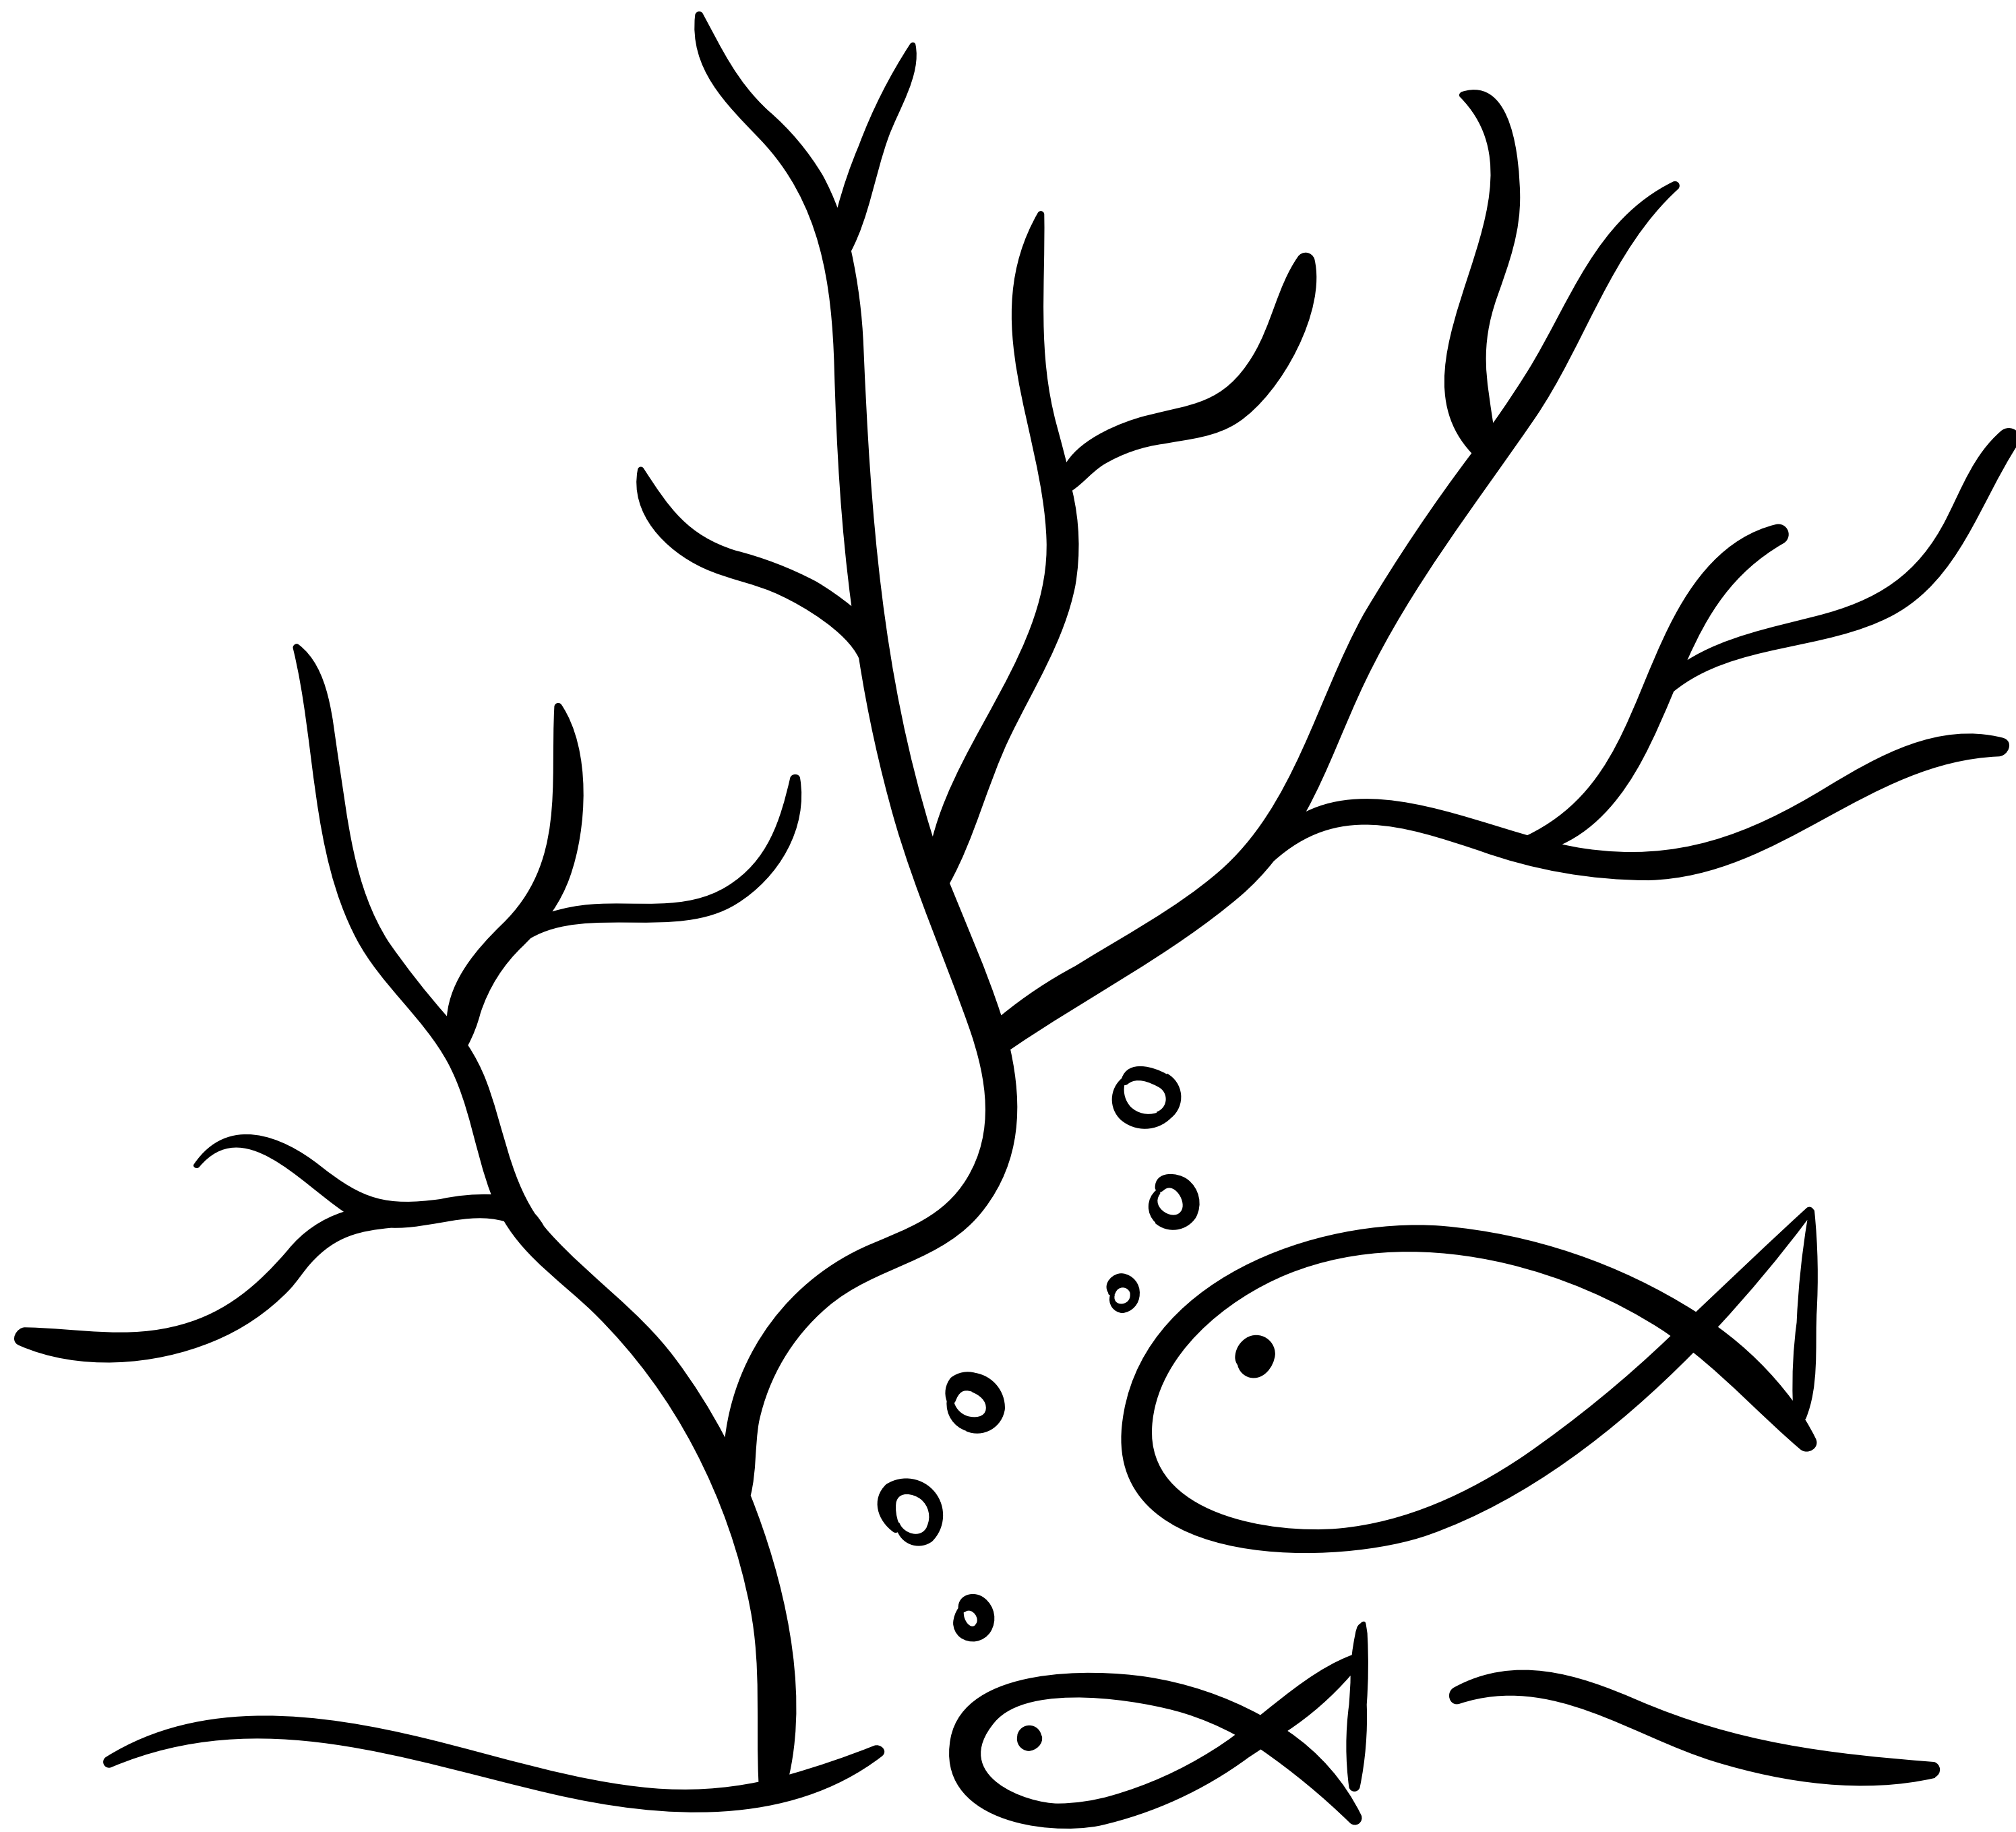

Some animals that live
in rivers are

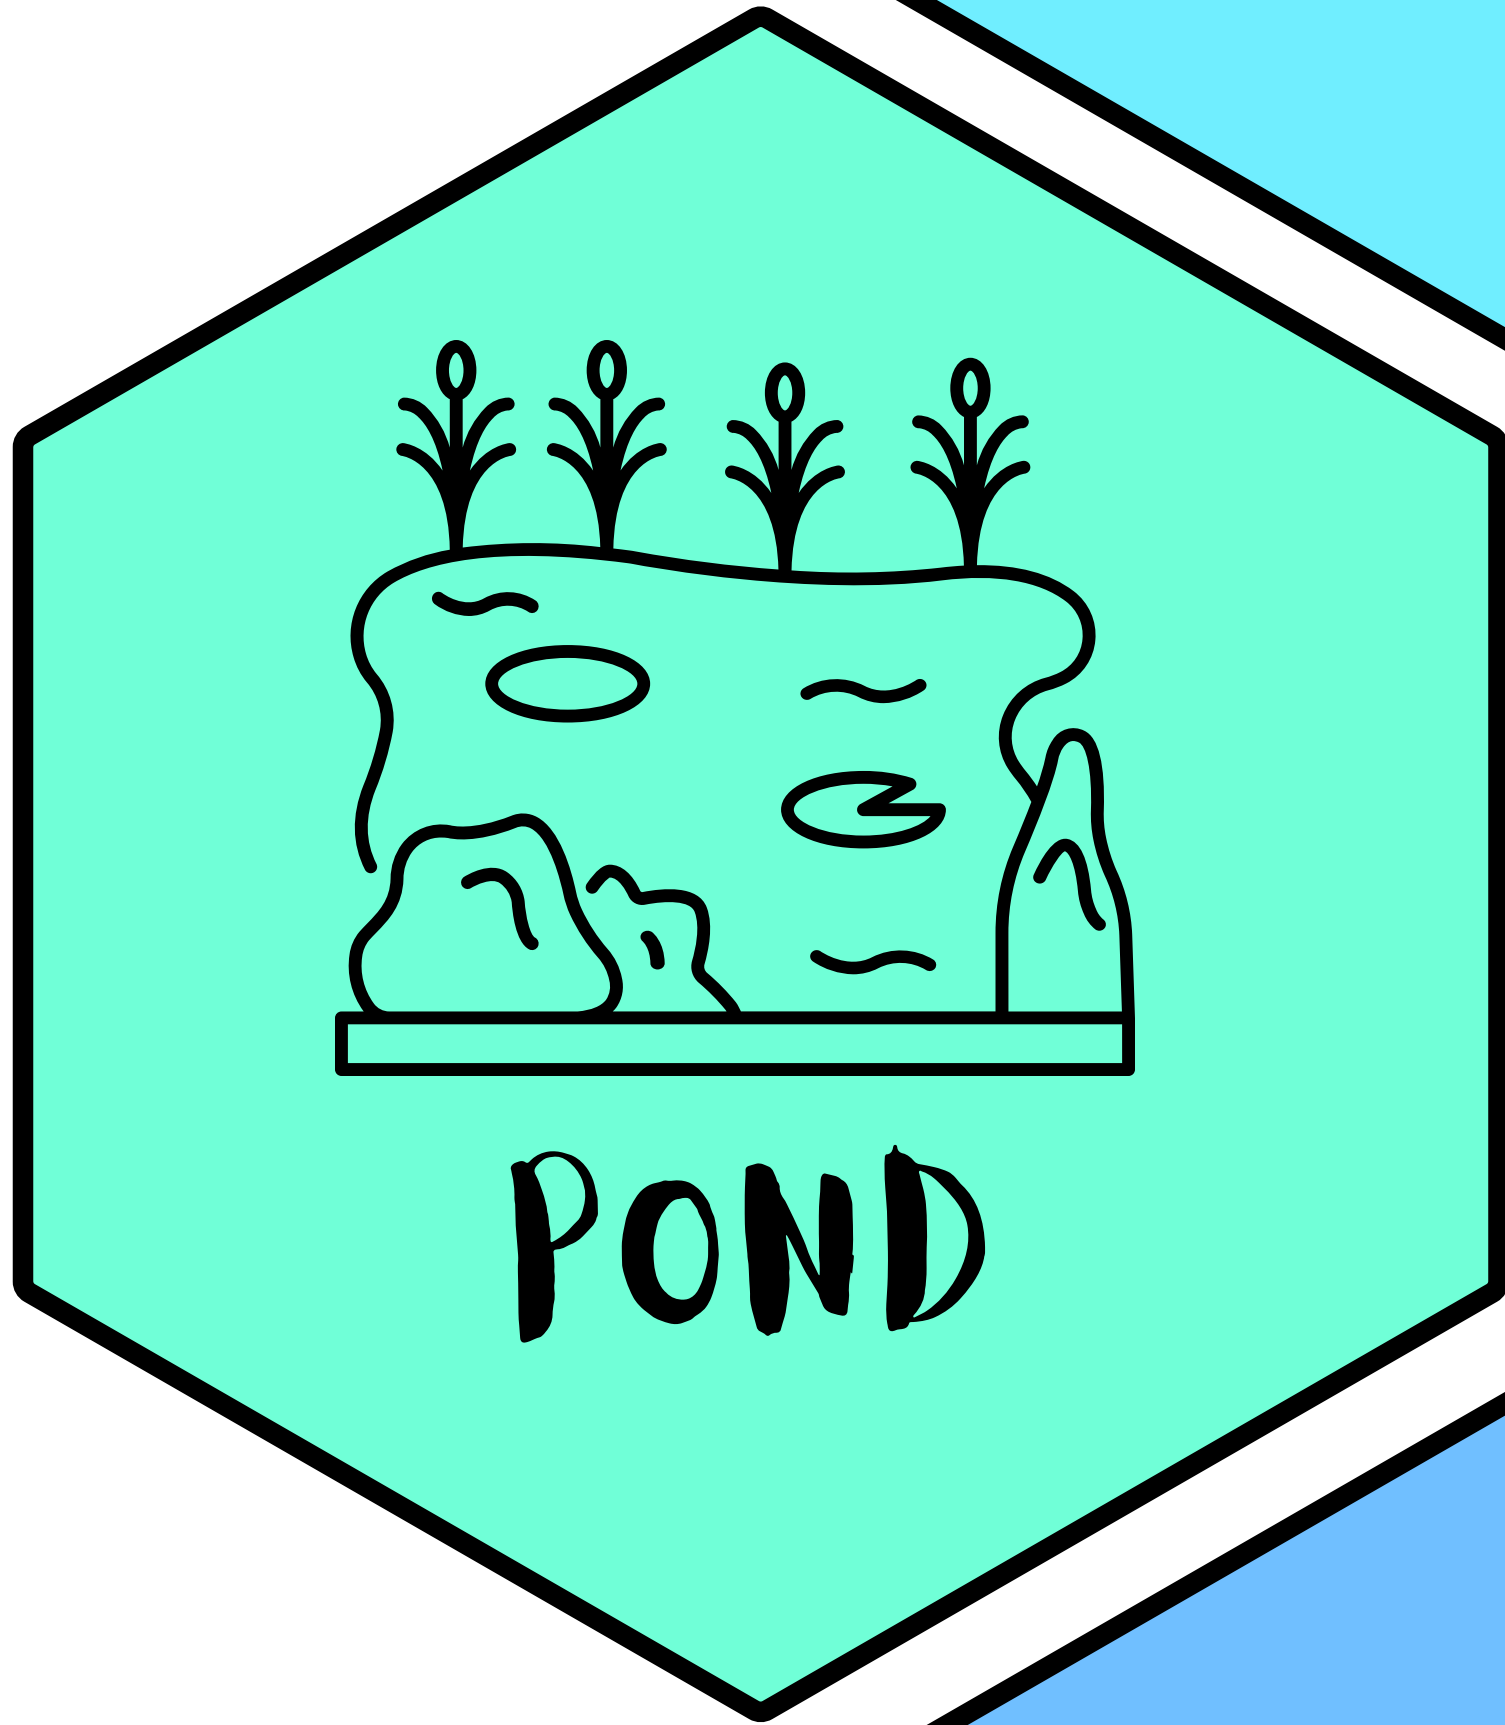

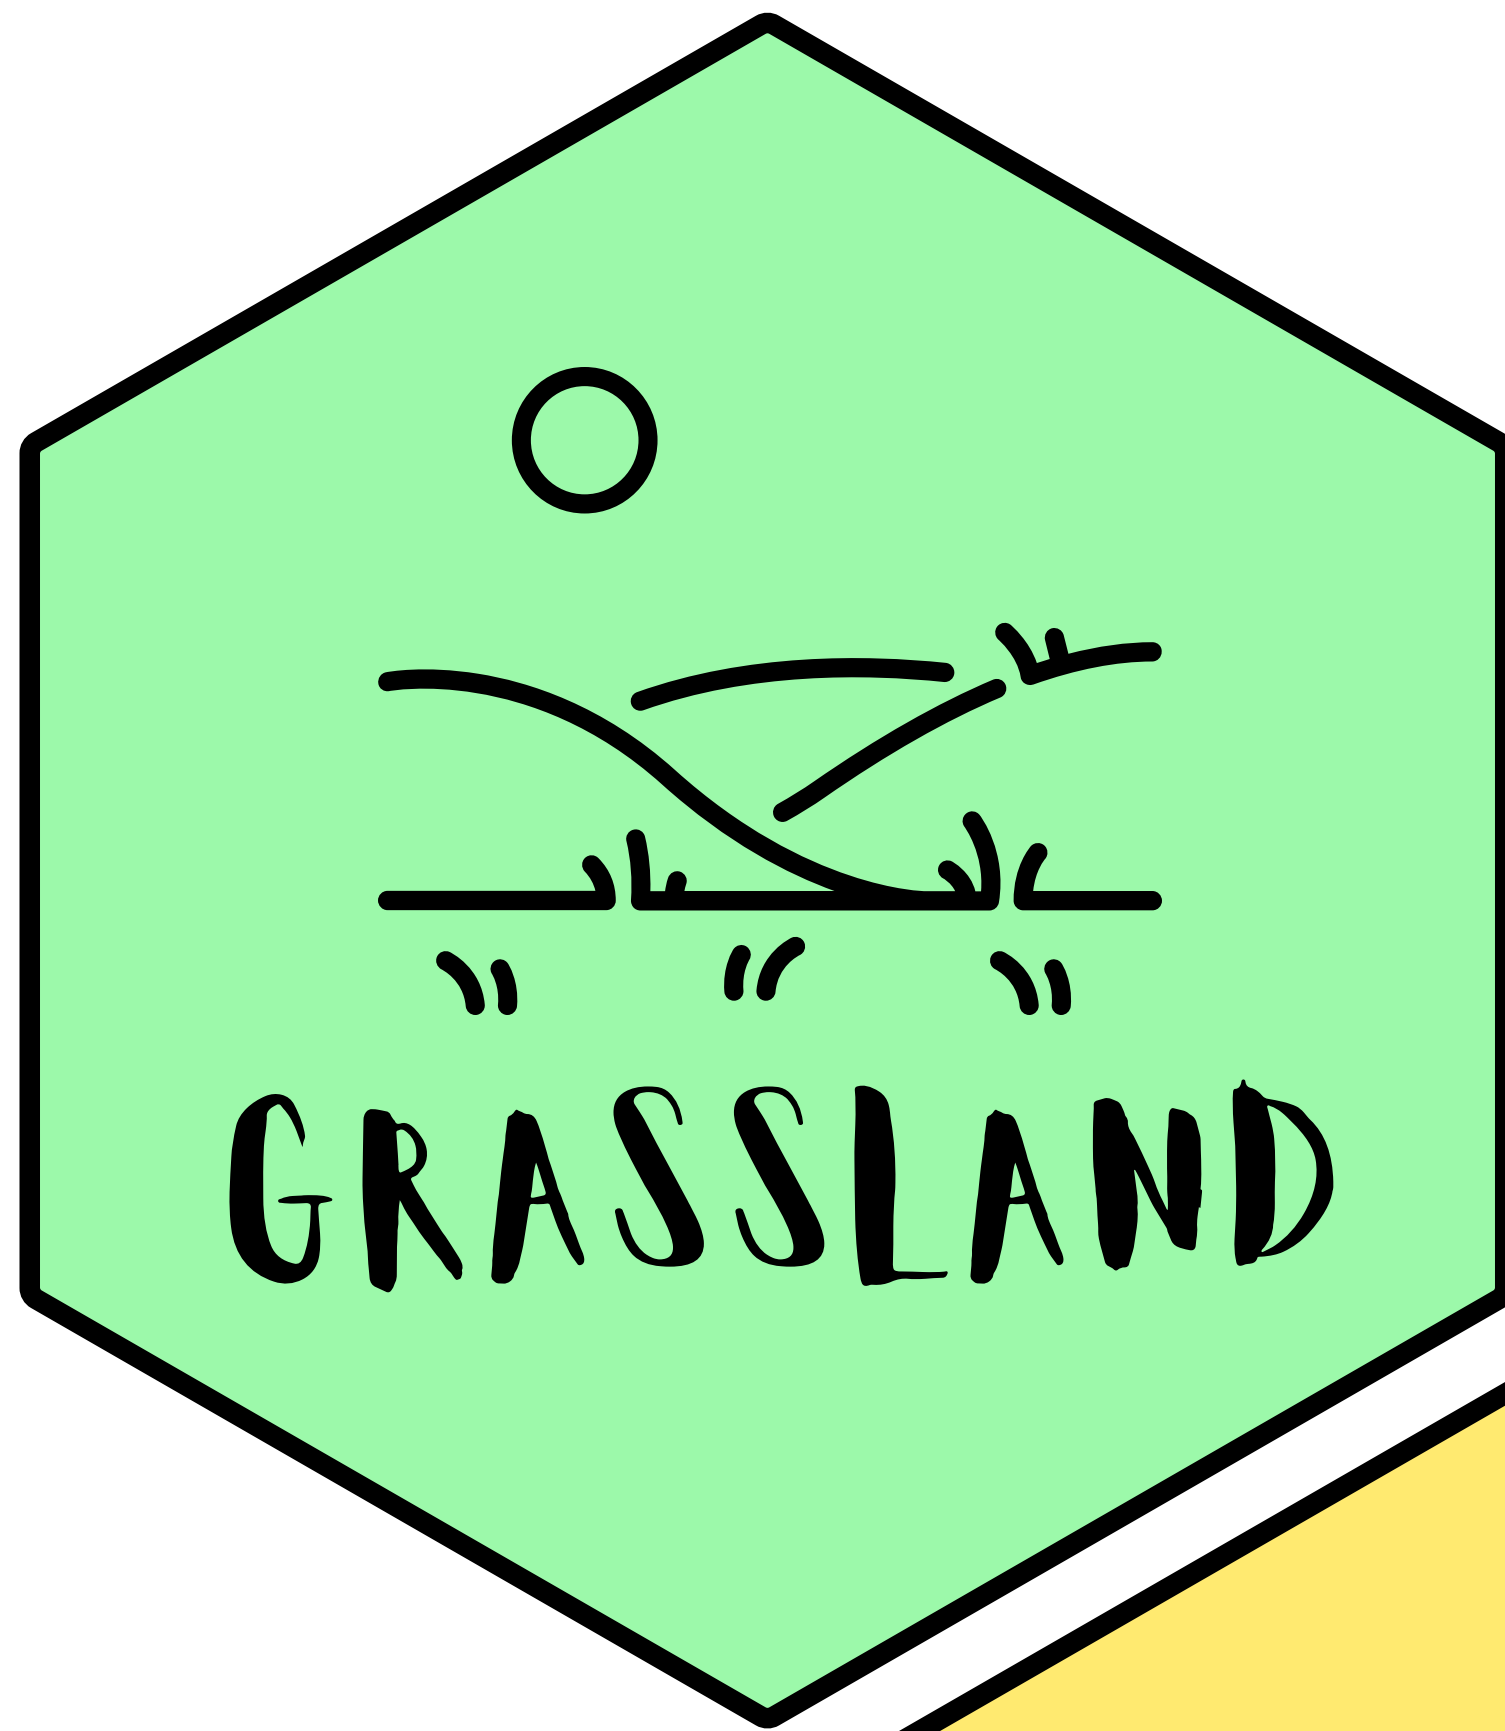

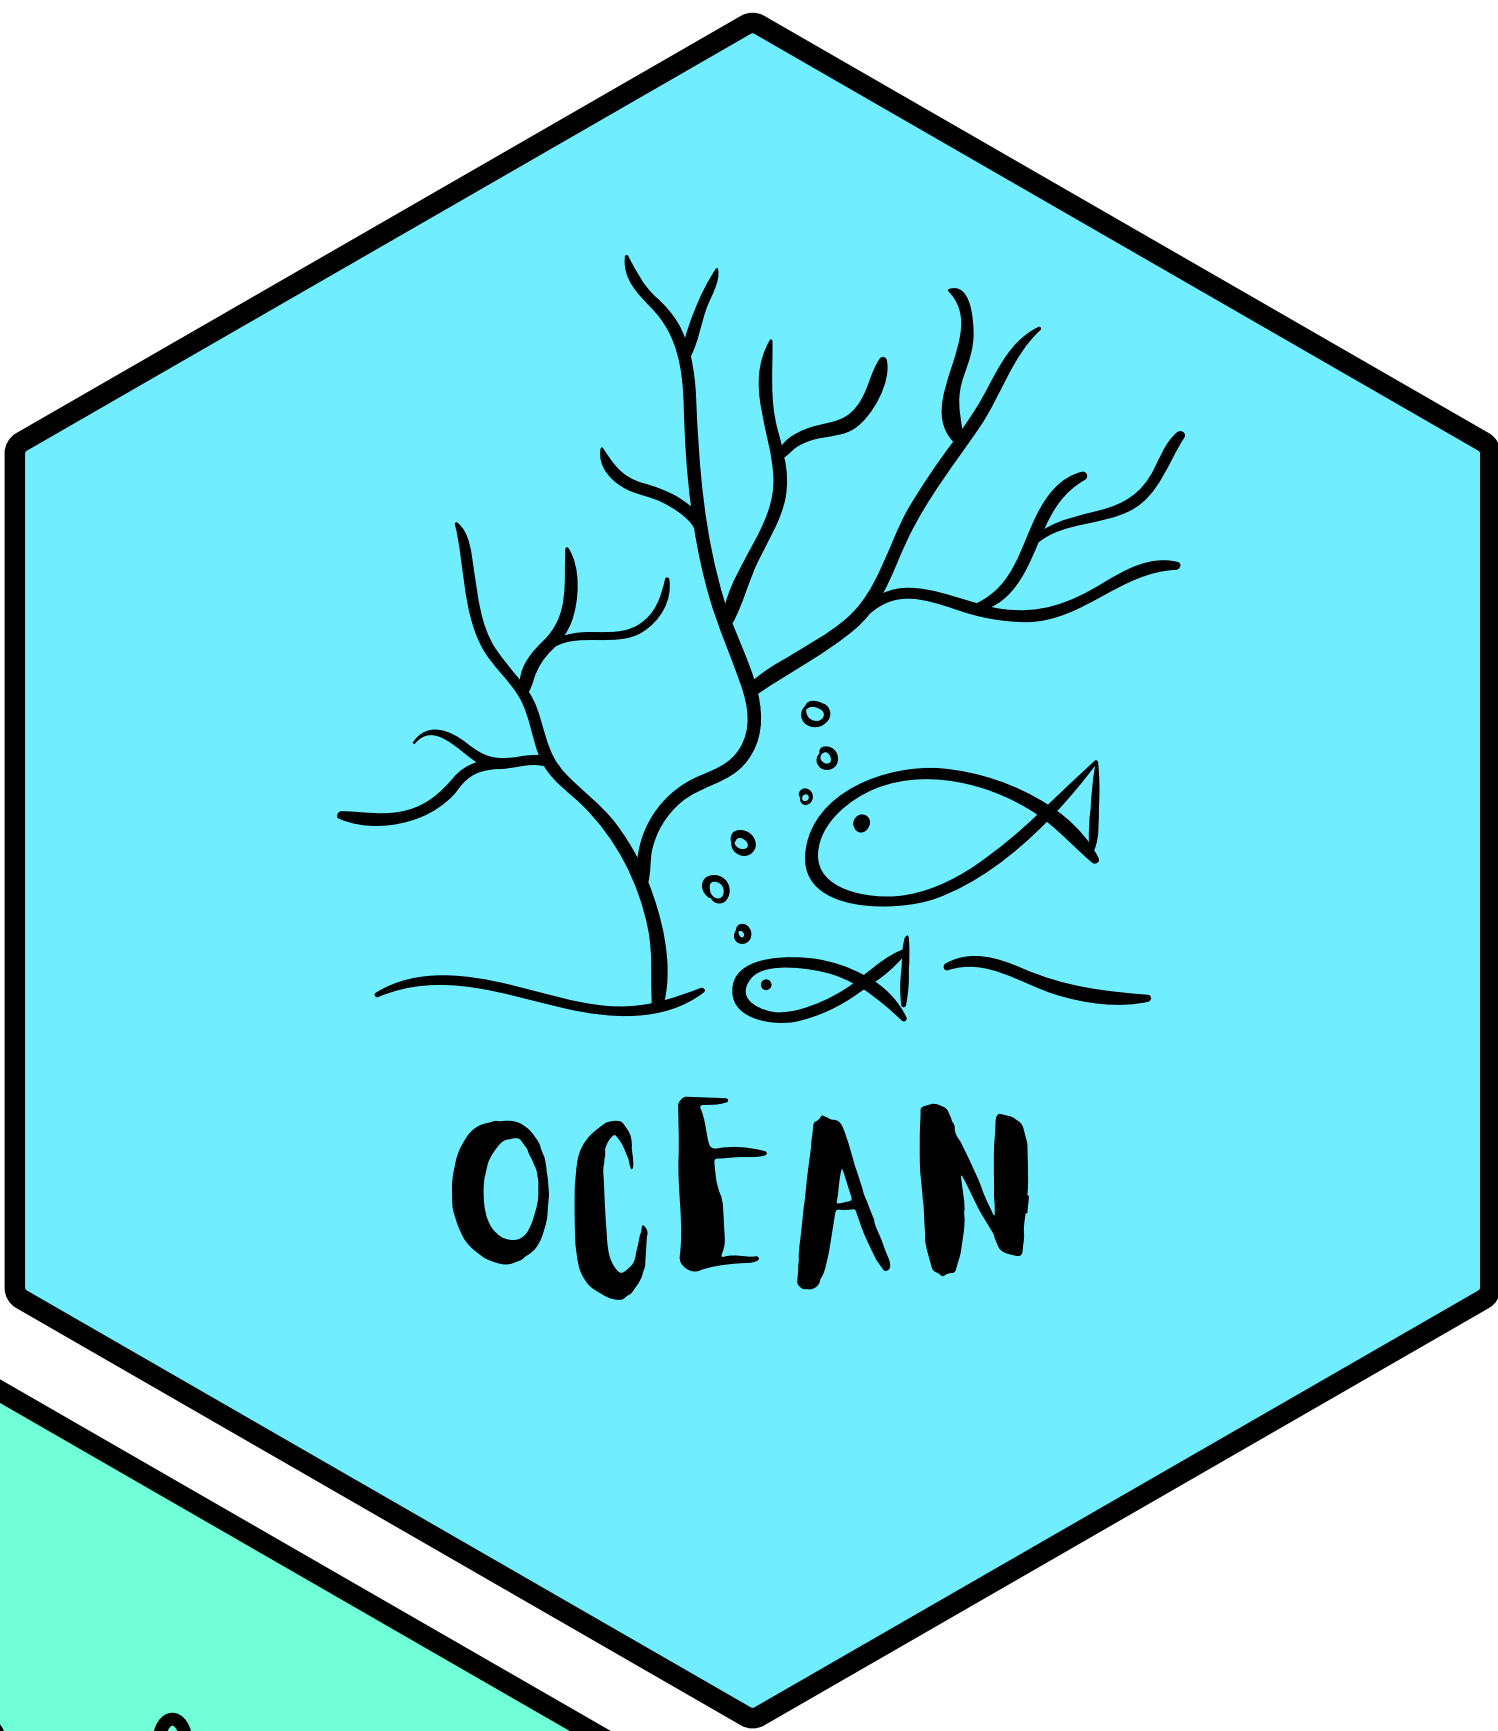

WHAT IS A HABITAT?

An ocean is the largest aquatic habitat and has many smaller habitats with it, such as a Coral Reef.

Do you know any animals that live in the Coral Reef?

Coral reefs are an
ocean habitat where
you see
