

Pollination

Grade 2 Science Worksheet

Circle the things that can help plants with pollination.

Pollen is a powdery substance that plants produce. Plants need to receive pollen from another plant before they can make seeds.

Wind

Table

Beetle

Butterfly

Hummingbird

Tractor

Bee

Bear

Wasp

Do you think that pollen from a rose can pollinate a tulip?
Why or why not?

Bear

Do you think that pollen from a rose can pollinate a tulip?
Why or why not?

No, it cannot; plants need to be the same species to pollinate each other.
