Lila's New Glasses

Lila was a girl who had trouble seeing well enough to know which way to go. She never saw when the ball was coming her way, but she always had a very hard time reading.

One day Lila's mother took her to the doctor. The doctor checked her eyes and instantly knew that Lila was very nearsighted. He told her she would need help to see, and that once she had her glasses, she would be able to do all of the things that she loved! Lila decided to try them.

Once Lila put on her glasses, she could see everything clearly. She could ride her bike, play soccer with her friends... and most of all, she could read the blackboard at school. Lila wore her pair of glasses every single day.
