

# Adult Guidance

This pack of resources could be used as an exciting way to introduce children to a Seaside topic.

Begin by gathering a collection of seaside items, such as a bucket and spade, some shells and maybe a small beach ball or toy boat.

Then, write a letter from a class toy or character on the bordered paper, or edit the Postcard in the pack to suit the needs of your setting and children.

Finally, receive the letter or postcard and allow the children to explore the items. This should provide many opportunities for discussion, further learning and exploration. For example, they may like to write their own postcard, draw or paint pictures of the shells, use the boat in the water tray or play with the beach ball in an outside area. They may also like to learn more about the seaside or write letters or postcards back to the sender about all the fun they are having and about their local area.
