# Number Shape Multiplication 5x Tables

I can write multiplication statements using the multiplication and equals signs.

For each image, write the multiplication fact shown.

For example:

$$3 \times 2 = 6$$

$$\square \times \square = \square$$

$$\square \times \square = \square$$

$$\square \times \square = \square$$

$$\square \times \square = \square$$

$$\square \times \square = \square$$

## Challenge:

Liam says, "8 × 5 is the same as 4 × 10."

Is he correct?

Use your number shapes to show how you know.

# Division Facts for the Five Times Table

## Roll and Solve.

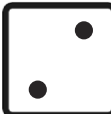

You can make up your own rules to this game. Here's one idea.

- Each player has a different coloured pencil or set of matching counters
- Take turns to roll the dice and find the matching row.
- Pick a question in that row. What can you do to work out the answer?
- If you answer the question correctly, pop a counter on top or colour the box in.
- The person with the most coloured boxes wins.
- You could use a timer to determine how long you play for or continue until all of the boxes are filled.

**Have fun!**
