

Habitats

Activity 1

Look at the **habitats** below.

- Firstly, select the correct name of the **habitat**.
- Next, select the correct name of an **animal** that lives there.
- Finally, select the correct name of a **plant** that can be found there.

Look at the Animals and Plants word bank underneath the activity to help you with any names.

habitat: _____

animal: _____

plant: _____

habitat: _____

animal: _____

plant: _____

Animals

badger

camel

crab

dolphin

jaguar

pigeon

polar bear

trout

snow leopard

Plants

banana tree

bulrush

cactus

dandelions

moss

oak tree

pine trees

sea grass

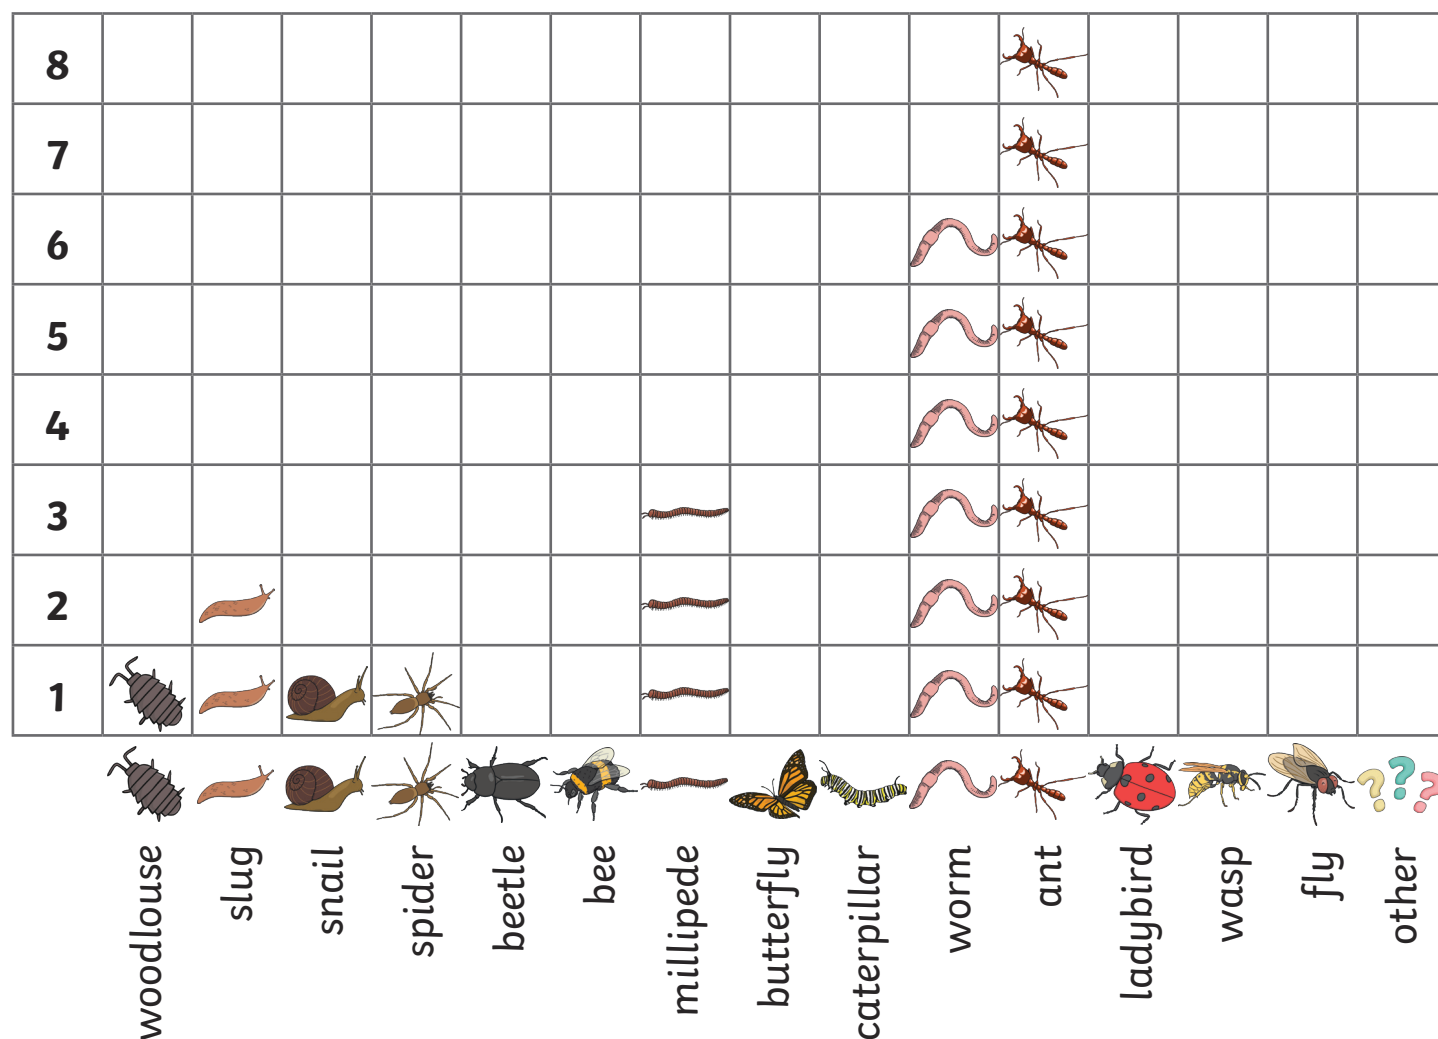

sea kale

Activity 2

A **microhabitat** is a very small habitat like under a rock or on a branch.

Minibeasts live in **microhabitats**. A group of children counted the minibeasts they found in a soil **microhabitat**.

Their results are in the pictogram below.

Answer the following questions about the pictogram:

- How many millipedes did they find? _____
- How many snails did they find? _____
- Which minibeast was the most common? _____

4. Name a minibeast that they didn't find any of: _____

5. How many more ants than worms did they find? _____

Challenge

Can you think of any reasons why the children might not have seen any butterflies or bees during the survey?
