App Designer

A mobile application (app) is a type of software that runs on a mobile device, such as a tablet, mobile phone or smartwatch. Apps can be used to play games, help us keep fit, track our movements and teach us things.

Imagine if you could help to design a new smartwatch especially for you!

Think about the things you like doing. What apps would be useful to you?

Do you like to play games? Do you exercise? Do you like to talk to your friends? What about an app to help with your school work?

Create **four** apps for your new smartwatch. Design a little picture icon for each app to show what it does and draw them into the circles. Explain what each app does.

App Designer

Copy the picture icons onto the smartwatch template. Cut out the smartwatch and use some sticky tape to secure it around your wrist. Wear your watch to show off your new apps.
