Carbon and other gases that trap the heat from the sun in the atmosphere.

Changes to the weather including drought, flooding and storms.

Temperatures across the world are getting higher.

Too much rain can cause an area to fill up with water.

Not enough rain leads water shortages and makes it hard to grow food.

Very powerful storms with strong winds.

The ice at the North and South Poles is melting because the Earth is getting warmer.

The melting ice means that the sea is getting higher and may flood land near the coast.
