Ask your friend to represent your story with drawings, cubes or number sentences.

7. Think of story to tell your friend about 5 creatures living under the sea.

Ask your friend to represent your story with drawings or cubes.

What can you see? Use a whole sentence to explain your thinking. Can you add some number shapes to make the number 15?

What is the fewest number shapes you can use?

What can you see? Use a whole sentence to explain your thinking.

Can you add some number shapes to make the number 17?

How did you work it out?

1. 5 in one and 0 in the other, 4 in one and 1 in the other, 3 in one and 2 in the other.
2. It could be any of the following ways: 6 on one rock and 0 on the other, 4 on one rock and 2 on the other, 3 on each rock.
3. There are 4 and 6 pirates, making 10 altogether.
4.  $5 + 5 = 10$
5.  $10 + 0 = 10$ ,  $1 + 9 = 10$ ,  $8 + 2 = 10$ ,  $7 + 3 = 10$ ,  $5 + 5 = 10$

6. This could be any number bond to 10.  $10 + 0 = 10$ ,  $9 + 1 = 10$ ,  $8 + 2 = 10$ ,  $7 + 3 = 10$ ,  $6 + 4 = 10$ ,  $5 + 5 = 10$ .
7. This could be any number bond to 5.  $5 + 0 = 5$ ,  $4 + 1 = 4$ ,  $3 + 2 = 5$ .
8. They could add a 10 number shape.
9. They could add a 10 number shape.
