

What I Like Doing At Home - Branching Story

You have been using your presentation skills at school to create a branching story.

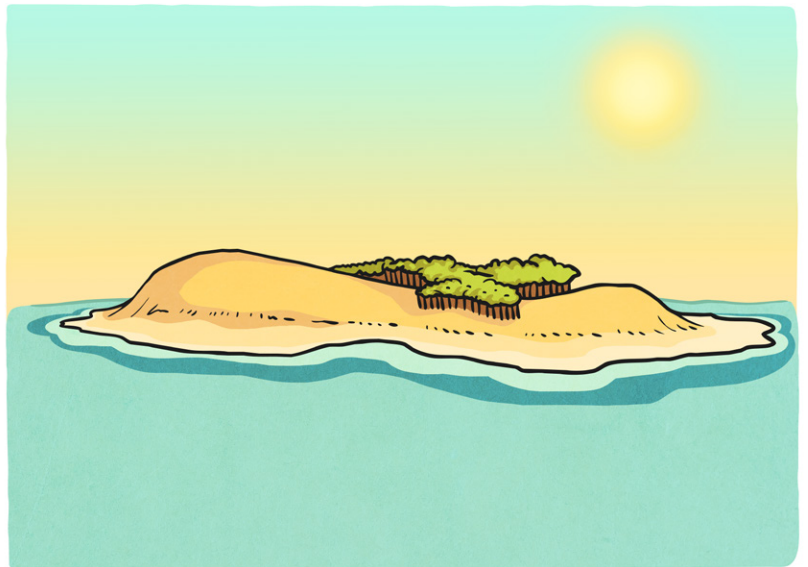

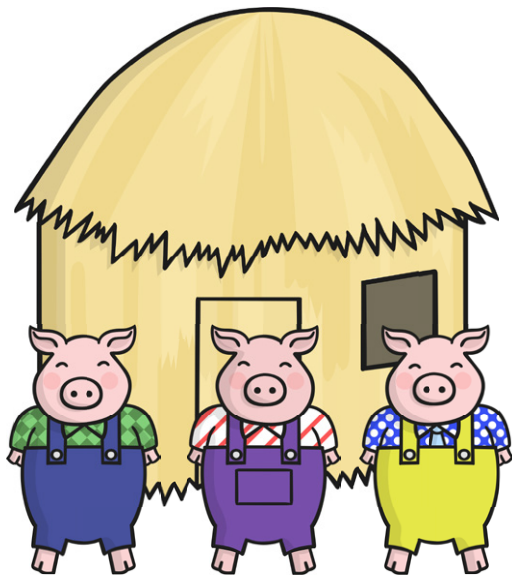

Remember if you haven't got a presentation application on your home computer, what about using Google Slides (free with a gmail email address)?

Create your own branching story using presentation software or an online tool like inkewriter:

Ideas for your branching story:

Rewrite a well-known story like The 3 Little Pigs.

Someone is stranded on a desert island. Can they escape?

What I Like Doing At Home

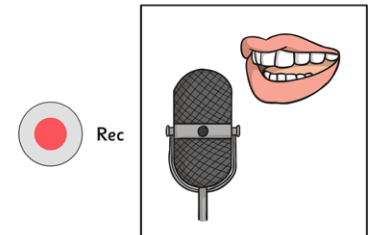

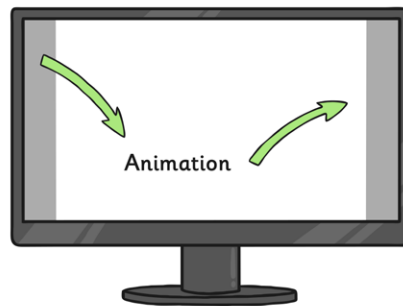

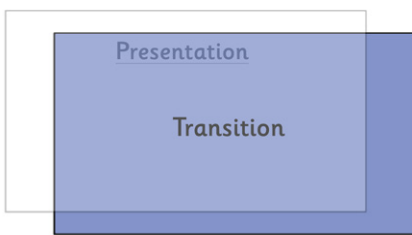

You have been developing your skills in using presentation applications.

Find out which applications you have at home.

If there isn't one on your home computer, what about using Google Slides (free with a gmail email address)?

Has the application at home got the features you have learnt about in school?

1. Themes and Slide Transitions
2. Animations
3. Action Settings (Hyperlinks)
4. Audio and Video

Here is a suggested task that will help to reinforce your learning.

1. Try out the features above, especially if you are using a different application or version.
2. Make a presentation about a topic that interests you, for example a hobby or activity you enjoy. Use as many of the features you have been learning about, as you can!
