

Tutankhamun's Tomb

Who

Found His Tomb?

The tomb was found by a group of researchers led by Howard Carter.

It was discovered in 1922, which means that all of the treasures and the body inside had been left in very good condition.

Howard worked out from other important finds that the tomb would be in the Valley of the Kings. A man named Theodore Davis found a cup with Tutankhamun and his wife on it. This was a clue that helped Howard to find the tomb.

The burial chamber with the body was a very unusual resting place for a king because it was the only decorated room in the tomb.

Normally, all of the walls would be carved or painted, which is how we know that Tutankhamun died very suddenly. The images on the walls were from a ritual called the 'opening of the mouth'.

What

They Found Inside

Inside the tomb, they found over 3000 treasures meant for Tutankhamun to take with him into the afterlife.

Many of the items were either made from or covered in gold, which was perfect for a king. The tomb was split into many different rooms. Most of the rooms were for the objects, apart from the burial chamber which just held a decorated stone coffin called a sarcophagus.

The Curse of the Mummy!

The curse of the mummy started after Tutankhamun's tomb was opened. Mummies have been thought to have magical powers and some people believe that they can curse anyone who disturbs them. Lord Carnarvon was the man who paid for the dig of King Tut's tomb and he died soon after it was opened. It is said that all of the lights in Cairo mysteriously went out as soon as he died.

Other stories are that Howard Carter's pet canary was killed by a cobra and Lord Carnarvon's dog died that same night. Some people believe that an unusual germ was released when the tomb was opened and that this caused Lord Carnarvon to become ill. Other people believe that it was magic.

Answers

1. Who discovered Tutankhamun's tomb? Tick one.

Howard Carter

2. Why is Tutankhamun one of the most famous pharaohs?

Tutankhamun is one of the most famous pharaohs because his tomb was discovered quite recently (1922). This means that the artefacts and the body are in a good condition.

3. Explain, in your own words, how we know Tutankhamun died suddenly.

Accept any response that suggests Tutankhamun died before the tomb was finished, such as: 'We know Tutankhamun died suddenly because the tomb was not completely decorated. Usually a tomb for a king would have paintings in all of the rooms, but only his burial chamber had paintings in, so maybe he died before the tomb was ready for him.'
