

# Rounding Decimals

1. Drag the red line to show the position of the decimal on each number line. Then, round each decimal to the nearest whole number and type the answer in the box.

2. Drag the red line to show the position of the decimal on each number line. Then, round each decimal to the nearest tenth and type the answer in the box.

3. Complete the table.

	Rounded to the Nearest Tenth	Rounded to the Nearest Whole Number
3.42		
2.06		
1.53		
3.48		
6.98		

4. George rounds 4.04 to the nearest tenth and writes 4.1. George is incorrect. Explain why.

5. I am thinking of a number with 1 decimal place. Rounded to the nearest whole, my number is 5. Find all possibilities.
6. My decimal number has 2 decimal places. Rounded to the nearest tenth, it is 2.6 and to the nearest whole number, it is 3. Give 3 possible numbers.
