## Finding Percentages of Amounts

## Department Store Sale!

For one day only, we've cut the prices of all our stock for
Loyalty Card owners! Each item is now only a percentage of its full price. The loyalty card next to each item shows the percentage of the full price that the item costs in the sale.

Top tip: Use your knowledge of calculating 10\%, 5\% and 1\% as well as 50\% and 25\% to help you calculate the sale percentages. Eg $48 \%$ of $£ 15.00$ could be worked out the following way.

| $10 \%$ | $=£ 1.50$ |
| ---: | :--- |
| $5 \%$ | $=£ 0.75$ |
| $1 \%$ | $=£ 0.15$ |$\quad$| $40 \%$ | $=£ 6.00$ |
| ---: | :--- |
| $5 \%$ | $=£ 0.75$ |
| $\frac{3 \%}{}=£ 0.45$ |  |
| $\frac{38 \%}{}=£ 7.20$ |  |

Challenge: Next week, all the standard prices will increase by the following percentages:

- The book, mobile phone, and jeans will increase by $10 \%$ on their full price.
- The trainers, pencil case and football will increase by $20 \%$ on their full price.
- The hairdryer, tablet, t-shirt and guitar will increase by $30 \%$ on their full price.

Can you work out what the new price for each item will be? (Hint: Find one tenth for 10\%, double it for $20 \%$ and triple it for $30 \%$ and add it to the full price.)
