

Four In a Row

To recognise and write decimal equivalents to $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{3}{4}$.

How to play:

- Shuffle the cards and place them in a pile, face down.
- On your turn, pick up the top card and look at the representation.
- Which decimal equivalent matches the representation?
- Cross out the decimal on the board using one colour.
Your partner will use a different colour.
- The first player to cross off four decimals in a row wins!

0.5	0.25	0.75	0.5	0.25
0.25	0.75	0.5	0.25	0.5
0.5	0.75	0.25	0.75	0.25
0.75	0.25	0.75	0.25	0.5
0.5	0.75	0.5	0.75	0.25
