

LO: To read and interpret data

- Read the data presented on a graph
- Look at information within graphs to answer questions
- Know that data can be used to show and **predict patterns**

Data is very useful because it can be used to show **patterns**.

Shops look at data to know how much of their stock sells at each time of the year. They use this information to **predict** how much they will need at certain points of the next year, or when busier periods might be.

Recap!

What are the **features** of a graph?

A graph to show how many sandwiches are sold every hour

1. How many sandwiches are sold between 8:00am and 9:00pm?

A graph to show how many sandwiches are sold every hour

Number of sandwiches sold

Time

2. How many more sandwiches are sold between 12:00pm and 1:00pm than between 9:00am and 10:00am ?

A graph to show how many sandwiches are sold every hour

Number
of
sandwiches
sold

Time

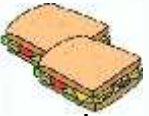

3. Which times of the day are **most** sandwiches sold? Why do you think this is?

A graph to show how many sandwiches are sold every hour

4. Looking at the graph, what time do you think the sandwich shop opens?

A graph to show how many sandwiches are sold every hour

Number
of
sandwiches
sold

5. Looking at the graph, what time do you think the sandwich shop closes?

A graph to show how many sandwiches are sold every hour

6. Why do think there is a sudden increase of sandwiches being sold at 5 o'clock?

A graph to show how many sandwiches are sold every hour

Number
of
sandwiches
sold

7. The owner of the shop wants to put another member of staff on to cover tomorrow's busiest time. What time do you think the owner will tell them they have to work?

A graph to show how many sandwiches are sold every hour

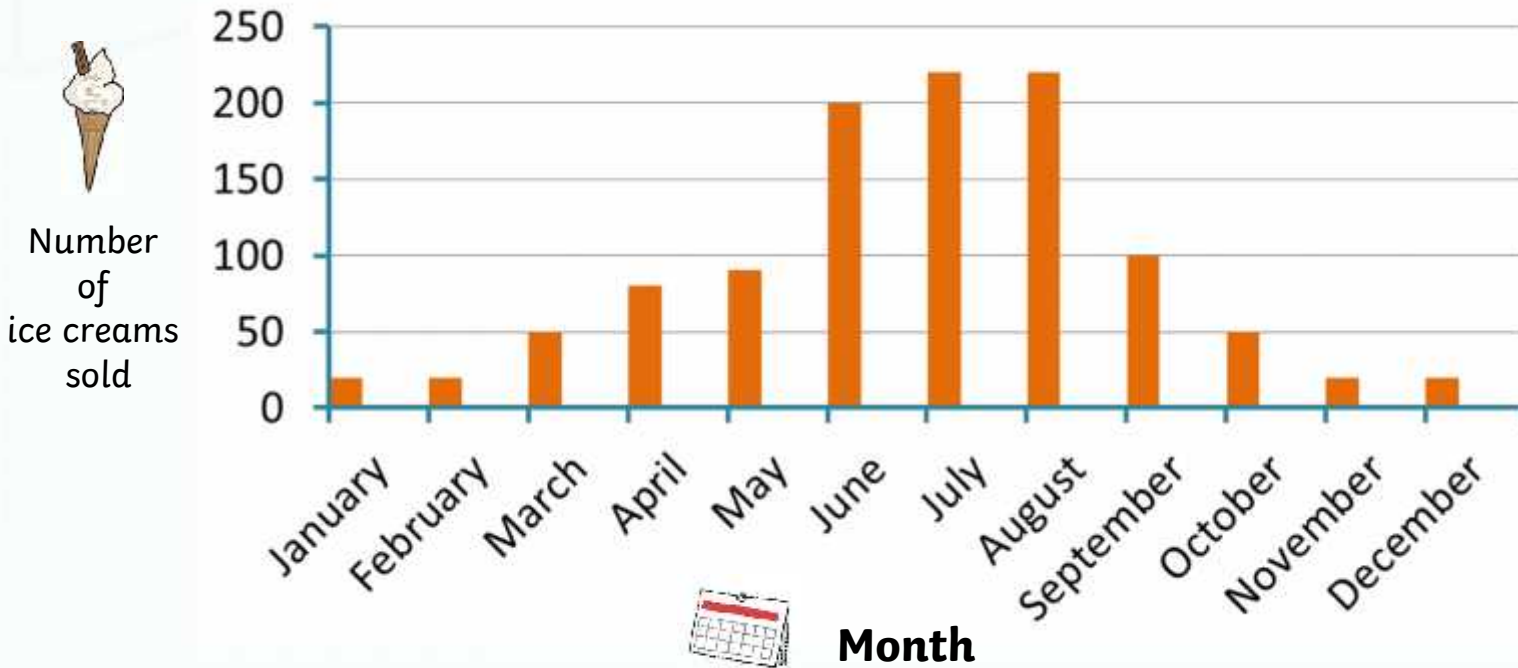

From just looking at the data this graph is showing, we have managed to answer 4 questions by **interpreting** the data. The graph itself did not show these answers.

A graph to show how many sandwiches are sold every hour

PLENARY: How many more sandwiches were sold between **midday to 1:00pm** than **10:00am to 11:00am**?

A graph to show how many ice creams were sold throughout the year

1. In which **3 months** was the most ice cream sold?
2. Why do you think this is?
3. Why do you think **July and August** had the most ice cream sale?
4. When were the least ice creams sold? Why do you think this is?
