Rounding to the Nearest 1000

Two-player game

You will need 30 cubes.
Place a cube over each number.

Take turns to remove a cube to reveal a number.

Read the number on the board and round to the nearest 1000.

Get your partner to check your answer.

If you are correct, keep the cube. If incorrect, place the cube back onto the board.

The player with the most cubes by the end of the activity wins.
