What a Mess Record Sheet

I can use mental calculation strategies to solve addition and subtraction problems.

Place the cards into the correct mental calculation column. Use the strategy to work out the answer. You can make jottings to help you.

Strategies		
Add or subtract the nearest multiple of 10 then adjust.	Partition into tens and units, adding/ subtracting the tens first.	Count on or back in repeated steps of 1, 10 and 100.
