Number Battle Score Sheet

I can use mental calculation strategies to solve addition and subtraction problems.

Battle Score Sheet

Our Target Number is _____

Name _____

Name _____

Insert your calculation and answer e.g. $134 + 146 = 280$

Number Battle Score Sheet

I can use mental calculation strategies to solve addition and subtraction problems.

This activity requires two people. Turn the Number Battle Cards face down onto the surface. Choose two cards each. Decide whether you are going to add or subtract the two numbers on the cards. Reveal the answer. The person with the largest number after completing the calculation wins a battle point. Record your calculation on the Number Battle Score Sheet. The person with the most points at the end of the game wins.
