# Finding Factors and Multiples Game

A factor is a number that when multiplied with another, produces a given number.

A multiple is a number that may be divided by another, a certain number of times without a remainder.

## Rules

You will need two different coloured pencils and the 100 square on the right.

Player 1 colours in a number less than 50.

Player 2 has to colour in a number which is a factor or a multiple of the first number.

Player 1 now has to colour a number which is a factor or a multiple of the number player 2 coloured in.

Play continues until one player cannot go!
