Multiplication and Division | Equivalence

I can solve missing number problems to make the calculations on each side of the equals sign balance.		
I know what the equals sign means.		
I can make the calculations on both sides of the equals sign equivalent.		

Multiplication and Division | Equivalence

I can solve missing number problems to make the calculations on each side of the equals sign balance.		
I know what the equals sign means.		
I can make the calculations on both sides of the equals sign equivalent.		

Multiplication and Division | Equivalence

I can solve missing number problems to make the calculations on each side of the equals sign balance.		
I know what the equals sign means.		
I can make the calculations on both sides of the equals sign equivalent.		

Multiplication and Division | Equivalence

I can solve missing number problems to make the calculations on each side of the equals sign balance.		
I know what the equals sign means.		
I can make the calculations on both sides of the equals sign equivalent.		

Multiplication and Division | Equivalence

I can solve missing number problems to make the calculations on each side of the equals sign balance.		
I know what the equals sign means.
