

- 1) a) $1132 \times 3 = 3396$
 b) $2042 \times 4 = 8168$
 c) $3613 \times 6 = 21\,678$ The code is 311.
- 2) Possible answers must show the need for calculating 2103×4 , for example:
 Sally is writing a book. Each day, she writes 2103 words. How many words has she written after the fourth day?
 Sylvain earns £2103 a month. How much does he earn after four months?

- 1) a) Harry should have regrouped the ten from 4×3 and added this to 10×3 , to make 4 in the tens column.
 b) Harry has not regrouped the ten from 3×4 .
 c) Harry has incorrectly recorded 0×6 as 6.
 d) Harry has not recorded 0×8 as 0 by putting a place holder in the ones column.
- 2) a) $2314 \times 3 = 6942$
 b) $3043 \times 4 = 12\,172$
 c) $5206 \times 6 = 31\,236$
 d) $4310 \times 8 = 34\,480$

- 2) a) There are four possible solutions.
 $1221 \times 3 = 3663$
 $1441 \times 2 = 2882$
 $1331 \times 2 = 2662$
 $1221 \times 4 = 4884$
- b) Look for children explaining that A must have a value of 1 to ensure that the answer C has the same value as the multiplier C. None of the letters can have a value of 0. Multiplying B by C must not result in any regrouping, so these letters must have a value of less than 5.

- 1) The time machine has broken down. We need a 3-digit code to make it work again. The code is the second digit of each product.

Write the multiplication calculation which is represented by the place value counters and find the product to help work out the code.

Diving into Mastery Guidance for Educators

Each activity sheet is split into three sections, diving, deeper and deepest, which are represented by the following icons:

Diving

Deeper

Deepest

These carefully designed activities take your children through a learning journey, initially ensuring they are fluent with the key concept being taught; then applying this to a range of reasoning and problem-solving activities.

These sheets might not necessarily be used in a linear way. Some children might begin at the 'Deeper' section and in fact, others may 'dive straight in' to the 'Deepest' section if they have already mastered the skill and are applying this to show their depth of understanding.

Aim

- Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers.
