

# Day and Night Cut and Stick Activity

Cut out the labels below and stick them in the correct places on the diagram.

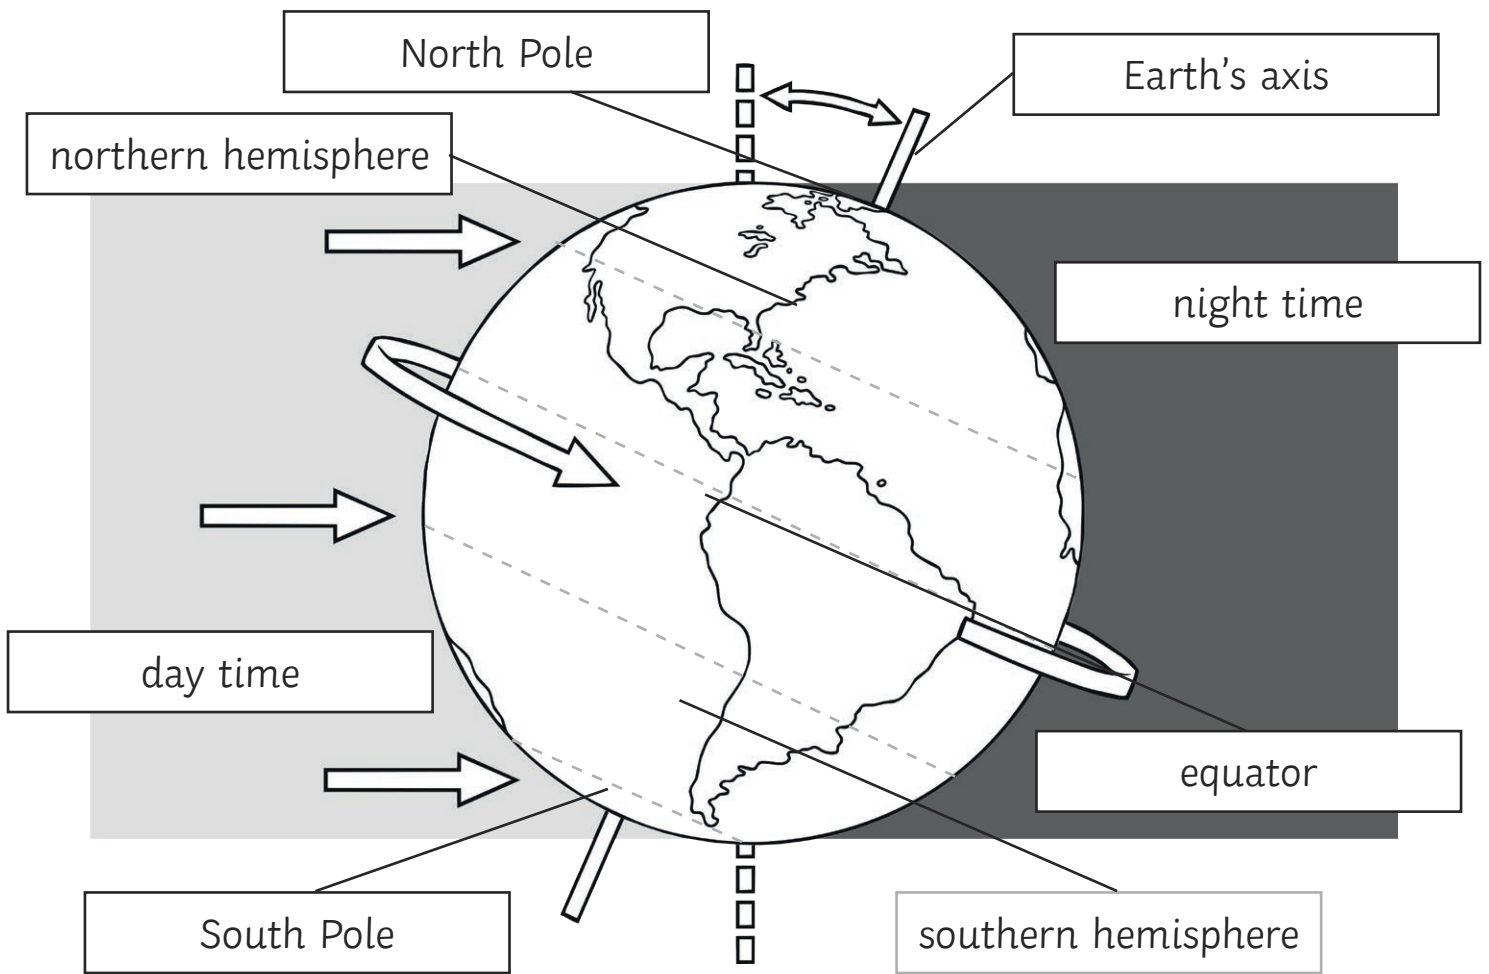

North Pole	northern hemisphere	day time	South Pole
night time	southern hemisphere	equator	Earth's axis

Cut out and match up the halves of the sentences to complete the description.

The Earth does one complete rotation...	it will be night time in that place.
When part of the Earth faces toward the Sun...	When part of the Earth faces away from the Sun...
every 24 hours.	it will be day time in that place.

# Day and Night Cut and Stick Activity **Answers**
