

Label the Moon Phases

Directions: Cut and glue the name of each moon phase under the correct moon picture.

A central illustration of Earth is surrounded by eight different moon phases. Each moon phase is shown in a circular frame, and below it is a rectangular box for labeling. The phases, starting from the top and moving clockwise, are: a half-lit moon (first quarter), a waxing crescent, a full moon, a waning gibbous, a half-lit moon (last quarter), a waning crescent, a new moon (represented by a solid black circle), and a waxing gibbous. To the right of the diagram is a large, partially visible yellow sun.

|-----------|----------------|----------------|---------------|--------------|-----------------|-----------------|----------|
| full moon | waning gibbous | waxing gibbous | first quarter | last quarter | waxing crescent | waning crescent | new moon |
|-----------|----------------|----------------|---------------|--------------|-----------------|-----------------|----------|

Label the Moon Phases

Directions: Use the word bank to label each of the moon phases.

full moon	waning gibbous	waxing gibbous	first quarter	last quarter	waxing crescent	waning crescent	new moon
-----------	----------------	----------------	---------------	--------------	-----------------	-----------------	----------

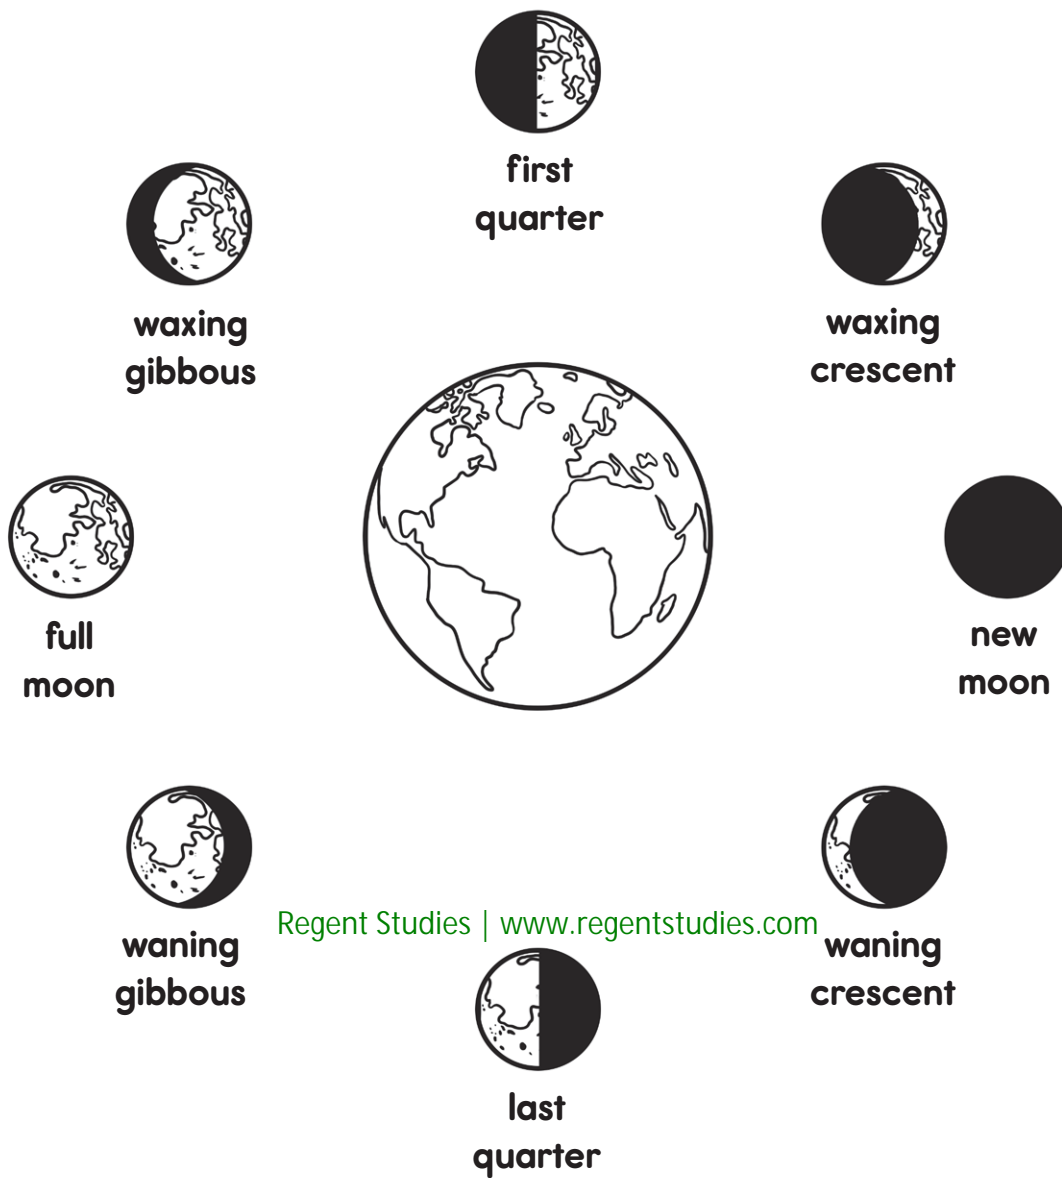

Label the Moon Phases

Starting with the new moon and moving counterclockwise, color and label each moon phase.
