

Read, Write, Order and Compare Maths Mastery Games

Pack Contents

The pack contains 100 six-digit number cards; 50 digit cards and 50 matching cards with the numbers written in words. The numbers are all between 500 000 and 520 000.

Higher or Lower

2-4 players

You will need at least 50 number cards: numerals, words or mixed.

1. Deal the cards to all the players, who place the cards face down on the table.
2. The player on the left of the dealer places one of their cards face up.
3. The next player says higher or lower and lays their card next to the first. They need to explain why their card is higher or lower.
4. If they are correct, play passes to the next player. If they are incorrect, they must pick up all their cards and place them under their pile, face down.
5. Play continues until one player has got rid of all their cards, or until the end of a time limit, and the number of cards are counted.
6. The winner is the first player to play all of their cards or has the fewest cards at the end of the allocated time.

Pelmanism

2-4 players

You will need between 10 and 20 matching pairs of cards: numerals and words.

1. Lay all the cards face down on the table.
2. The first player turns over 2 cards and lays them face up in the same place.
3. The player must say whether the cards are matching or not and explain why.
4. If the numbers match, then that player takes the pair and has another turn.
5. If the numbers do not match, then the next player turns over 2 cards.
6. Play continues until all of the pairs are found.
7. The winner is the player with the most pairs.
