

Long Division Practice Activity

Use the squares to ensure your calculations are set out correctly.

Example							
			1	5	0	r2	1
2	4	3	6	2	1		
	—	2	4	↓	↓		
		1	2	2			
		1	2	0			
				2	1		

1. $241 \div 17 =$							

2. $965 \div 31 =$							

$3. 1415 \div 12 =$

$4. 4465 \div 19 =$

$5. 1946 \div 31 =$

$6. 1371 \div 40 =$

$7. 6527 \div 31 =$

$8. 4895 \div 46 =$

$9. 8572 \div 39 =$

$10. 9109 \div 50 =$

$11. 9758 \div 48 =$

$12. 15\,245 \div 62 =$

Long Division Practice **Answers**

1. 14 r3
2. 31 r4
3. 117 r11
4. 235
5. 62 r24
6. 34 r11
7. 210 r17
8. 106 r19
9. 219 r31
10. 182 r9
11. 203 r14
12. 245 r55
