

# Savanna

## Average Temperature:

between 10°C to 20°C in the dry season and 20°C to 30°C in the wet season

## Average Rainfall:

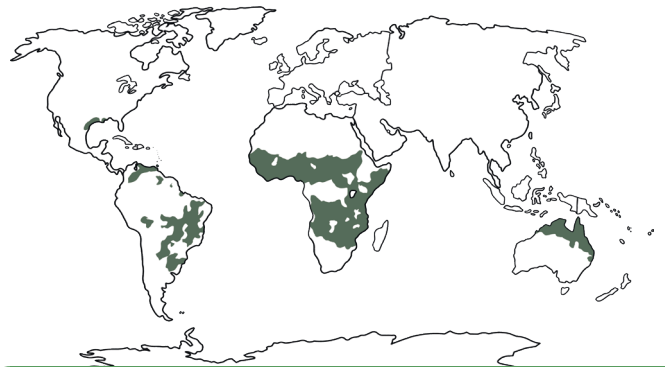

between 50cm and 90cm per year

## Characteristics:

- a type of grassland
- closer to the equator than other grasslands
- seasonal rainfall
- scattered trees

## Well-Known Savannas:

- Serengeti Plains of Tanzania

## Coverage:

approximately 17% of Earth's terrestrial environment

## Flora & Fauna:

The animals of the savanna are often grazing herbivores. They migrate to move with the wet season, following the rain, which increases the diversity and quantity of vegetation.

Did you know that the African savanna is populated by more herbivores than carnivores, due to the wide availability of grasses?
