

Can You Find the Key Information in Persuasion Texts?

Read the text carefully, then use it to answer the questions below.

Many people are scared of spiders. However, these animals have several benefits to humans and very few in the United States can do any harm.

Firstly, spiders get rid of house flies, so don't worry if you find spider webs in your house; they're for catching insects. Spiders also keep gardens free of insects that might damage plants.

It is a well-known fact that most spiders cannot seriously harm you, and will only ever bite in self-defence. If you leave them alone, they'll leave you alone. There is no need for anyone to be terrified of spiders. In fact, spiders are more frightened of humans than we are of them!

Furthermore, spiders are very intelligent creatures. They know how to spin their complicated webs without having to learn.

Questions

1. How do a lot of people feel about spiders?
2. How do spiders help in the garden?
3. How do you know that a spider would not attack a human?
4. Why shouldn't you clear away all the spider webs in your home?

Read the text carefully, then use it to answer the questions below.

Many people are scared of spiders. However, these animals have several benefits to humans and very few in the United States can do any harm.

Firstly, spiders get rid of house flies, so **don't worry if you find spider webs in your house; they're for catching insects.** **Spiders also keep gardens free of insects that might damage plants.**

It is a well-known fact that most spiders cannot seriously harm you, and **will only ever bite in self-defence.** If you leave them alone, they'll leave you alone. There is no need for anyone to be terrified of spiders. In fact, spiders are more frightened of humans than we are of them!

Furthermore, spiders are very intelligent creatures. They know how to spin their complicated webs without having to learn.

Questions

1. How do a lot of people feel about spiders? **Scared.**
2. How do spiders help in the garden? **Keep gardens free of insects that might damage plants.**
