

Measurement and Geometry: Using Units of Measurement: Champion 2D Shape Drawing

Australian Curriculum

This lesson plan could be used to support the teaching and learning of the following Content Description from the Australian Curriculum.

Y5 – Measurement and Geometry

Australian Curriculum - Calculate perimeter and area of rectangles using familiar metric units (ACMMG 109)

Child-Friendly Aim: To accurately draw a range of 2D shapes using the measurements given.	Success Criteria: I can follow instructions to accurately draw shapes. I can draw lines accurately using a ruler. I can draw angles accurately using a protractor. I can reason about 2D shapes.	Resources: Lesson Pack Rulers and protractors
	Key/New Words: Protractor, ruler, length, angle, dimensions, polygon, parallel, perpendicular.	Preparation: Differentiated Champion 2D Shape Drawing Activity Sheets - one per child Extra Challenge Activity Sheet - as required

Prior Learning: It will be helpful if children are confident at identifying, comparing, classifying and describing the properties of a wide range of 2D shapes.

Learning Sequence

	Reading Scales Quiz: The Lesson Presentation displays a range of ruler and protractor scales, which the children have to interpret and read correctly to say what length the arrow indicates.	
	Drawing 2D Shapes from Given Dimensions: Using the examples on the Lesson Presentation , work as a class to follow instructions to draw 2D shapes from given dimensions.	
	Champion 2D Shape Drawing: Children complete the differentiated Champion 2D Shape Drawing Activity Sheet , demonstrating that they can accurately draw a range of 2D shapes using the measurements given and calculate missing angles and lengths. Can children draw a range of 2D shapes? Can children calculate missing angles and lengths?	
	<div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>Draw 2D shapes from given dimensions (to the nearest 5° and whole cm).</p> </div> <div style="text-align: center;"> <p>Draw 2D shapes from given dimensions (to the nearest 5° and half cm).</p> </div> <div style="text-align: center;"> <p>Draw 2D shapes from given dimensions (to the nearest 1° and mm). An Extra Challenge Activity Sheet is provided as an extension activity if required.</p> </div> </div>	
	Shape Reasoning: The children prove or disprove the statements displayed on the Lesson Presentation , using their understanding of properties of shapes.	

Masterit

Computeit: Use a programming website (e.g. Scratch) to draw regular 2D shapes.

Createit: Explore how to create optical illusion art using 2D shapes.

Performit: Write and perform rhyming poetry based on the properties of 2D shapes.

Mathematics

Measurement and Geometry

Champion 2D Shape Drawing

Aim

- To accurately draw a range of 2D shapes using the measurements given.

Success Criteria

- I can follow instructions to accurately draw shapes.
- I can draw lines accurately using a ruler.
- I can draw angles accurately using a protractor.
- I can reason about 2D shapes.

Reading Scales Quiz

What measurement does the arrow indicate?

Reading Scales Quiz

What measurement does the arrow indicate?

5.7cm

Drawing 2D Shapes from Given Dimensions

Follow these instructions to accurately draw this triangle:

- Draw a line, AB, 6cm in length.
- At A, measure and draw an angle of 55° .
- At B, measure and draw an angle of 80° .
- Mark the point where the lines intersect C.
- Measure and label angle C.
- Measure and label lines AC and BC.

Drawing 2D Shapes from Given Dimensions

Follow these instructions to accurately draw this quadrilateral:

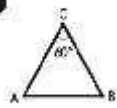

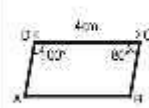

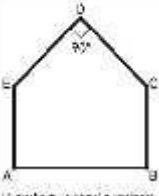

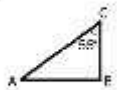

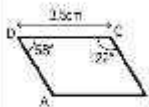

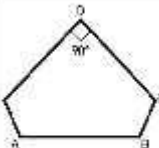

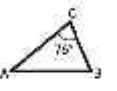

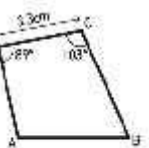

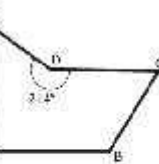

- Draw a line, AB, 5cm in length.
- At A, measure an angle of 120° and a line of 4cm. Mark this D.
- At B, measure an angle of 60° and a line of 4cm. Mark this C.
- Join CD. Measure and label angles C and D and line CD. What shape have we drawn?

We have drawn a parallelogram.

Shape Reasoning

Prove or disprove these statements:

The missing angle
False - angles in a
in this triangle is
triangle total 180° .
greater than 45° .

Shape Reasoning

Prove or disprove these statements:

False – the interior angles of a regular hexagon are 120° , which are obtuse.

Shape Reasoning

Prove or disprove these statements:

True - this
~~This is an~~ does not
~~have all sides and~~
angles the same.

Aim

- To accurately draw a range of 2D shapes using the measurements given.

Success Criteria

- I can follow instructions to accurately draw shapes.
- I can draw lines accurately using a ruler.
- I can draw angles accurately using a protractor.
- I can reason about 2D shapes.

Champion 2D Shape Drawing

To accurately draw a range of 2D shapes using the measurements given.

Follow the instructions to draw the 2D shapes:

Draw a line, AB, 3cm in length.

At A, measure and draw an angle of 60° .

At B, measure and draw an angle of 60° .

Mark the point where A and B intersect and label this C.

Measure and label angle C.

I have drawn a _____

Draw a line, AB, 4cm in length.

At A, measure and draw an angle of 80° and a line of 2cm. Mark this D.

At B, measure and draw an angle of 100° and a line of 2cm. Mark this C.

Join CD and measure and label the angles C and D and line CD.

I have drawn a _____

Draw a line, AB, 5cm in length.

At A, measure and draw an angle of 90° and a line of 3cm. Mark this E.

At B, measure and draw an angle of 90° and a line of 3cm. Mark this C.

At C, measure and draw an angle of 135° .

At E, measure and draw an angle of 135° .

Label the new angle created, as D.

Measure and label angle D.

I have drawn a _____

Champion 2D Shape Drawing

To accurately draw a range of 2D shapes using the measurements given.

Follow the instructions to draw the 2D shapes:

<p>Draw a line, AB, 3cm in length.</p> <p>At A measure and draw an angle of 35°.</p> <p>At B, measure and draw an angle of 90°.</p> <p>Label the new angle created, as C.</p> <p>Measure and label angle C.</p> <p>I have drawn a _____</p>	
<p>Draw a line, AB, 3.5cm in length.</p> <p>At A, measure and draw an angle of 122° and a line of 2.5cm. Mark this D.</p> <p>At B, measure and draw an angle of 58° and a line of 2.5cm. Mark this C.</p> <p>Join CD and measure and label the angles C and D and line CD.</p> <p>I have drawn a _____</p>	
<p>Draw a line, AB, 4.5cm in length.</p> <p>At A, measure and draw an angle of 115° and a line of 1.5cm. Mark this E.</p> <p>At B, measure and draw an angle of 115° and a line of 1.5cm. Mark this C.</p> <p>At C, measure and draw an angle of 110°.</p> <p>At E, measure and draw an angle of 110°.</p> <p>Label the new angle created, as D.</p> <p>Measure and label angle D.</p> <p>I have drawn a _____</p>	

Champion 2D Shape Drawing

To accurately draw a range of 2D shapes using the measurements given.

Follow the instructions to draw the 2D shapes:

Draw a line, AB, 3cm in length.

At A, measure and draw an angle of 38° .

At B, measure and draw an angle of 66° .

Label the new angle created, as C.

Measure and label angle C.

I have drawn a _____

Draw a line, AB, 4.2cm in length.

At A, measure and draw an angle of 103° and a line of 3.3cm. Mark this D.

At B, measure and draw an angle of 65° and a line of 4.2cm. Mark this C.

Join CD and measure and label the angles C and D and line CD.

I have drawn a _____

Draw a line, AB, 4.3cm in length.

At A, measure and draw an angle of 93° and a line of 4.6cm. Mark this E.

At B, measure and draw an angle of 123° and a line of 3.4cm. Mark this C.

At C, measure and draw an angle of 58° .

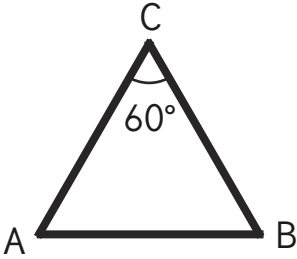

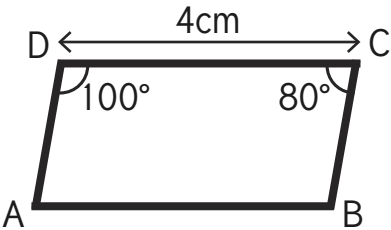

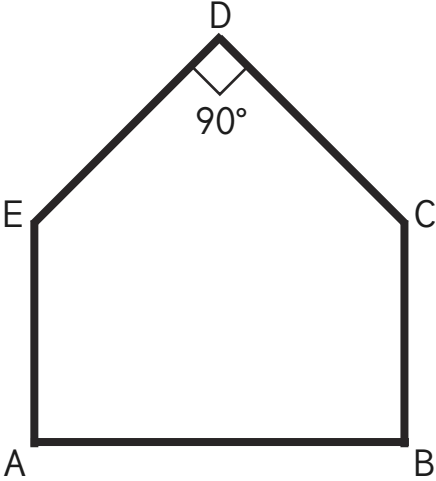

At E, measure and draw an angle of 52° .

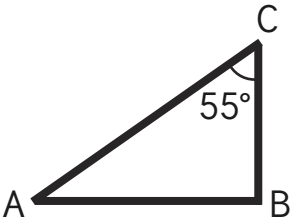

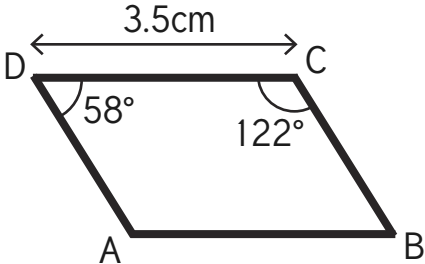

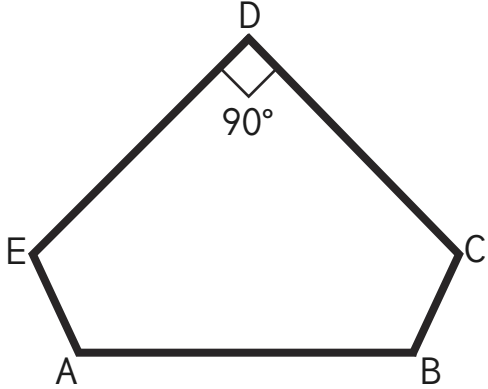

Label the new angle created, as D.

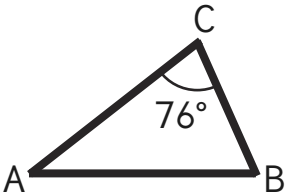

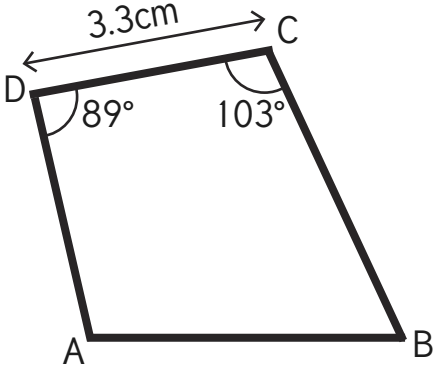

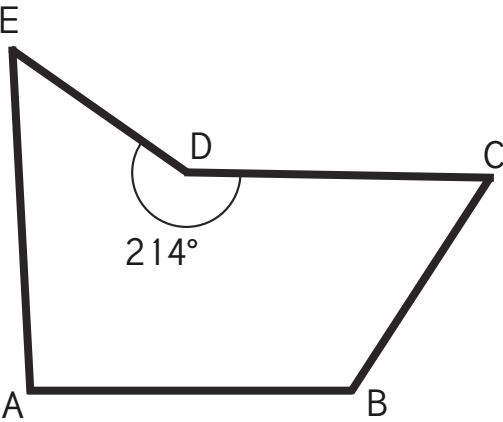

Measure and label angle D.

I have drawn a _____

Champion 2D Shape Drawing Answers

<p>★</p>  <p>I have drawn an equilateral triangle.</p>	 <p>I have drawn a parallelogram.</p>	 <p>I have drawn an irregular pentagon.</p>
---	--	--

<p>★★</p>  <p>I have drawn a right-angled triangle.</p>	 <p>I have drawn a parallelogram.</p>	 <p>I have drawn an irregular pentagon.</p>
--	--	---

<p>★★★</p>  <p>I have drawn a scalene triangle.</p>	 <p>I have drawn a kite (or quadrilateral).</p>	 <p>I have drawn an irregular pentagon.</p>
--	--	--

Champion 2D Shape Drawing Extra Challenge

To accurately draw a range of 2D shapes using the measurements given.

Calculate the dimensions to draw the 2D shapes:

Draw this kite accurately when $A = 4\text{cm}$.
Measure and label angle x .

not drawn to scale

Draw this parallelogram when $B = 1.5\text{cm}$.
Use diagonally opposite angle facts to help you complete the drawing.

not drawn to scale

Draw this isosceles triangle when $C = 5\text{cm}$.
Measure and label angle Y .

not drawn to scale

Champion 2D Shape Drawing Extra Challenge **Answers**

1.	Draw this kite accurately when $A = 4\text{cm}$. Measure and label angle X .
Answer:	Sides of 4cm and 6cm , angle $X = 46^\circ$.
2.	Draw this parallelogram when $B = 1.5\text{cm}$. Use diagonally opposite angle facts to help you complete the drawing.
Answer:	Sides of 1.5cm and 4.5cm .
3.	Draw this isosceles triangle when $C = 5\text{cm}$. Measure and label angle Y .
Answer:	Sides of 5cm and 3cm , angle $Y = 112^\circ$.
