

# Solving Linear Equations

**Problem:** \_\_\_\_\_

Remove parentheses  
using the  
Distributive Property.

Combine like terms.

Isolate the variable  
using inverse  
operations of addition  
and subtraction.

Isolate the variable.  
Move the variables  
on one side of  
the equation.

Eliminate the  
coefficient by dividing  
each side by itself.

**Solve for the answer:** \_\_\_\_\_

Isolate the  
variable!
