## Introducing Ratio

## I can write ratio statements and use multiplication and division facts to

 calculate alternative statements.1. For each group, write the ratio of one group compared to the other.
What is the ratio of
grey to white? What is the ratio of triangles to circles?

## Introducing Ratio

2. For each grid, write the ratio. Rearrange the blank grid so that it shows how many shaded squares match to blank, then write the simplest equivalent ratio. The first one is done for you.
a.

shaded to blank
4 : 12

shaded to blank
1 : 3

## Introducing Ratio

3. Continue the sequences, counting on in multiples of the first numbers to find equivalent ratios. The first one is done for you.

| a. | $1: 2$ | $2: 4$ | $3: 6$ | $4: 8$ | $5: 10$ | $6: 12$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

| d. | $3: 7$ | $6: 14$ |  |  |  |  |
| e. | $4: 11$ |  |  |  |  |  |
| f. | $5: 7$ |  |  |  |  |  |

## Introducing Ratio

I can write ratio statements and use multiplication and division facts to calculate alternative statements.

1. For each group, write the ratio of one group compared to the other.

2. Complete each drawing so that it makes the ratio correct:

| Complete the drawing <br> to show the ratio of <br> Oranges: Apples | Draw 20 letters (A and B) <br> in total to the ratio of | There are 15 pieces of fruit <br> in total - bananas and <br> strawberries. Draw the <br> pieces of fruit to make <br> this ratio correct. |
| :---: | :---: | :---: |
| bananas:strawberries |  |  |
| $2: 1$ |  |  |

## Introducing Ratio

3. For each grid, write the ratio as you see it then write the ratio in its simplest form. Show your working out. The first one is done for you.
