# Significant Figures – Card Game

## Rules:

A game for 2 players (or 3 to make up numbers).

Cut out the cards and share them equally between the players.

Each player should leave their cards in a pile face down in front of them.

Each card has a number facing one way and a number of significant figures (s.f.) facing the other.

The first player turns over their top card and places it in the centre of the table, so both players can see the number clearly.

The second player then turns over their top card, without peeking, and places it next to the first one. Make sure to turn it so that both players can see the number of significant figures clearly.

Each player must try to round the number on the first card to the number of significant figures on the second card. As soon as they have done so, they must say “done”.

If the first player to say “done” has correctly rounded the number, they get both cards.

If they are incorrect, the cards are given to the other player (if there are 3 players, one card is given to each of the other players).

You lose when you run out of cards.

The winner is the last player left in the game.
