

# Adding Three One-Digit Numbers

Add three one-digit numbers (using number bonds to 10).

Tip: Circle the pairs of numbers that add up to 10, then add the third number to make the total.

$4 + 6 + 3 = \underline{\quad}$	$5 + 8 + 5 = \underline{\quad}$	$6 + 4 + 6 = \underline{\quad}$
$5 + 5 + 6 = \underline{\quad}$	$5 + 7 + 3 = \underline{\quad}$	$5 + 2 + 5 = \underline{\quad}$
$7 + 3 + 4 = \underline{\quad}$	$4 + 8 + 2 = \underline{\quad}$	$1 + 1 + 9 = \underline{\quad}$
$8 + 2 + 9 = \underline{\quad}$	$9 + 5 + 1 = \underline{\quad}$	$7 + 8 + 3 = \underline{\quad}$
$1 + 9 + 7 = \underline{\quad}$	$8 + 2 + 7 = \underline{\quad}$	$5 + 7 + 5 = \underline{\quad}$
$7 + 2 + 3 = \underline{\quad}$	$7 + 7 + 3 = \underline{\quad}$	$6 + 4 + 9 = \underline{\quad}$
$6 + 3 + 4 = \underline{\quad}$	$4 + 8 + 2 = \underline{\quad}$	$7 + 2 + 3 = \underline{\quad}$
$3 + 8 + 7 = \underline{\quad}$	$5 + 5 + 5 = \underline{\quad}$	$6 + 3 + 7 = \underline{\quad}$
$5 + 3 + 5 = \underline{\quad}$	$3 + 3 + 7 = \underline{\quad}$	$7 + 6 + 4 = \underline{\quad}$
$2 + 9 + 8 = \underline{\quad}$	$8 + 8 + 2 = \underline{\quad}$	$9 + 2 + 8 = \underline{\quad}$

Challenge: Can you use number bonds to 10 to make sets of 4 one-digit numbers that total 20? How many different sets can you make?
