

Your Own CKAN

We install and deploy a basic (out-of-the-box) CKAN instance on your own infrastructure/preferred cloud provider, including 3 plugins of your choice.

This service is a perfect fit if you...

Have different internal teams working with data and need an organised place to share it

Have a lot of data and don't know how to share it internally and publicly

Are trying to find data insights within your organisation or government

Your team's required level of knowledge:

Medium

Why CKAN?

CKAN is the world's leading open source data management system (DMS). **It makes it easy to publish, share and discover data.** CKAN is used by national and regional government organisations throughout the European Union, the Americas, Asia and Oceania to power a variety of official and community data portals. It has also been adopted by enterprise organisations in sectors such as resources, energy, pharmaceuticals and finance.

[Learn more about all advantages and comforts of adopting CKAN](#) 

Step by Step

Typically, the installation of a CKAN instance is a 3-phase project, during which we will work closely with you:

- 1. Analyse your technology infrastructure** to choose the best place and way to deploy your CKAN instance.
- 2. Install a CKAN instance** and define your basic operational requirements.
- 3. Define your data strategy** and start sharing your data.

This brochure is a standardised and simplified example of the services we provide. The final scope of the project will be customised to varying degrees to suit your needs.

Get in touch with our team and we'll be happy to offer you a personalised quote.

Examples of Past Works

Every case is different and we will make sure that we take into account all your specific data handling needs. But in general terms, if you choose this service, you will have **a system similar to those hosted by these previous clients**.

Bundle Options

One of Open Knowledge's principles is sustainability, so **we will never make you dependent on us**. We want to ensure that your project is sustainable over the years, i.e., that you and your team are able to get the best out of your new CKAN install and can manage and thrive through it autonomously. For this reason, we suggest that you **combine this service with the following offers**.

Open Your Data

Define the best data strategies for you

Open Literacy Training

Help your internal teams use and extract value from your own data

Why Us?

Open Knowledge Foundation (OKFN) is the **world's ultimate expert in CKAN**. For the last 20 years, our team has been establishing global open standards, and contributing with technological and community expertise for a wide range of initiatives in the fields of open data, open content, open government, etc. **We host the CKAN open source code** and ensure the best practice policies.
