

## Master of Business Administration

### Program Description:

MBA courses are offered in two 8-week sessions during the academic semester. The student can take one or two courses per 8-week session. Summer courses will be available depending on adequate student enrollment.

Generally, students with an undergraduate degree in business will complete the general MBA in 33 credit hours. Students desiring an area of concentration will be required to complete 36 credit hours. Students with a prior business degree would be able to complete the MBA program in three semesters or in 1.5 years in a full-time program with no courses taken in the summer term.

Students without any previous accounting, statistics or quantitative methods courses would need to take Peregrine Foundation courses (1-3 days Prep and a completion test) before taking the Accounting and Business Analytics courses in the MBA program. These courses are online and provide the necessary foundation knowledge to do well in the graduate courses in Accounting and Business Analytics.

### All students will take the Core Courses listed below:

#### Core Courses (27 Credit Hours)
