**JPA EDUCATIONAL OUTREACH TO OAK PARK SCHOOLS**

**Summary**

Earlier this month, Triunfo Water & Sanitation District (TWSD) staff met with representatives of the Las Virgenes Municipal Water District (LVMWD) Public Information Department. The primary objective of that meeting was to discuss coordinated messaging and outreach for the Las Virgenes-Triunfo JPA Pure Water Project, but discussion was also held on other mutual public outreach opportunities, including educating students in local schools about water and wastewater-related issues. Specifically, staff intended to explore opportunities for such educational outreach initially in the Oak Park Unified School District (OPUSD).

Staff's intent is to capitalize on the existing LVMWD resources and partner with their staff in offering classroom presentations to students in Oak Park elementary, junior, and high schools. To gauge potential interest, staff sent a letter in early August to Tony Knight, OPUSD Superintendent. Within a week, staff received two requests for presentations in second and fourth grade classrooms. Staff's hope is that the anticipated success of the outreach in Oak Park will lead to an expansion of the outreach in other portions of TWSD's service area.
