TWSD EDUCATIONAL OUTREACH – PROGRAM UPDATE

Staff continues to implement the water/wastewater educational outreach program to schools within the Triunfo Water & Sanitation District (TWSD) service area. The program, a partnership with the public outreach staff at Las Virgenes Municipal Water District, consists of classroom presentations for elementary, middle, and high school students. The presentations cover water supply, wastewater treatment, recycled water (including the Pure Water Project), water conservation, and environmental sustainability from a water perspective.

Recent program activity includes:

- Presentations to approximately 150 students in architecture and engineering classes at Oak Park High School.
- A request for three presentations to students at Medea Creek Middle School in Oak Park.
- Issuance of letters regarding the availability of water and wastewater educational presentations to schools outside of Oak Park but within the TWSD service area.

If you have questions, please contact me at (805) 658-4608 or sandywarren@vrsd.com.
