CONSERVATION PROGRAM

The Triunfo Water & Sanitation District/Oak Park Water 2010 Urban Water Management Plan requires urban water retailers to meet a goal of reducing water usage 20% by 2020 with an interim goal of 10% by 2015. Attached is a monthly report to compare Oak Park's water usage each month with this year's goal.

As a part of the State Water Quality Control Board recent Drought Emergency Regulations activated on July 28, 2014, staff has begun the required monthly reporting. The confirmation for the March reporting is attached. Based on the qualifications reported in the Urban Water Management Plan requirement, staff is calculating the GPCD figures using an 89% residential factor. This factor assumes that 89% of all water consumed in Oak Park is by residential customers. This GPCD data will not match the GPCD data reported as part of the California Urban Water Conservation Council (CUWCC) reporting requirements under the Urban Water Management Planning Act due to the 89% residential factor.

In March 2022 Staff received 230 water conservation calls, 78 violation letters were sent to homeowners, no violations were reported by Oak Park residents, and conducted 17 water audits. A total of 78 residents were notified of a leak on their property.

Recycled water consumption for March 2022 was 49 acre feet compared to 44 acre feet in March 2021.
