What is the Rank Checker Tool used for?

The Dopinger Rank Checker Tool determines the positions of keywords in search engine results for websites, and helps to analyze and track the real-time organic positions of those keywords.

- You'll see the rank of your page in search engine results
- You can see the keyword distributions on the page
- See if keywords are indexed
- You get results with detailed scaling according to monthly, weekly, and daily periods.
- You can see your rankings by keywords

How to Use the Rank Checker Tool?

- 1 First, enter the URL of your website you want to analyze,

Enter your website URL Check

- 2 Click 'Check' and you will see analysis results according to keyword distributions. Determine the ranking of your website on Google from the options between Top10 and Top100. You can scale the time period based on day, month, and week if you wish.

- 3 And finally, analyze your keyword's position and distributions in detail.

First, you will be greeted by a page titled 'Keywords in Top'. [Here you can analyze the Top100 and examine it by date.](#)

When you scroll down the page, you will be able to examine the rank of your keywords in the **SERP** (search engine results page).
