# HOW TO RESET YOUR WORDPRESS WEBSITE

## Reasons to Reset WordPress Website

- Discovering all functions of WordPress
- Redesigning a website
- Suspected spam or codes

## Preparing for a WordPress Reset

- Backing Up Your WordPress Website: The process will remove any customizations and settings. Creating a website backup is highly advised as a precautionary measure.
- Creating a Checklist of Important Content and Settings: To protect your sensitive data, you must make a complete checklist of critical information and settings.

## Resetting WordPress Using a Plugin

- Go to your WP dashboard and find tools.
- After clicking the tools button, find Advanced WP Reset.
- Type reset and then click on the "reset database"

## Post-Reset Considerations

- Updating WordPress and Plugins
- Reinforcing Website Security Measures
- Reinstalling and Configuring Essential Themes and Plugins
