

## AZORES RALLYE 2021 – PROCEDURE | SOCIAL CONDUCT

From: the COVID-19 Delegate

Version: 1

To: All Attendees

Date: 28.08.2021

# PROCEDURE | Social Conduct

## Trips to the Autonomous Region of the Azores

**SOCIAL DISTANCE MEASURES** are measures to be adopted to reduce social interaction between people, in order to reduce disease transmission by COVID-19. The success of preventive measures depends essentially on the collaboration of citizens and institutions. To break the transmission chains and protect the community, it is essential to adopt measures of social distancing by all people.

### 4.1 | CARE TO BE CAREFUL IN SOCIAL DISTANCE

#### CLOSED AREAS OF AZORES RALLYE

- Keep, whenever possible, a distance of more than 2 meters from other people throughout the venue and activity of the race;

## DURING THE AZORES RALLYE

- Direct contact between participants and race collaborators must be “side by side”, or back to back (one to the other), avoiding “face to face” contact;
- Physical distance must be ensured whenever there is contact with the teams at the CONTROL POSTS.
- The social conduct procedures must be as follows:
  - Avoid handshakes, hugs, others;
  - Avoid clusters during breaks or waiting times;

### 4.2 | HYGIENE AND HAND DISINFECTION

- Wash hands frequently with soap and water, distributed, for at least 20 seconds;
- Hand washing must be complete and regular, carried out throughout the day and whenever justified;
- All Control Points, entrances and exits will be equipped with alcohol-based disinfectant gel dispensers;
- If soap and water is not available, hand sanitizers that have been distributed and present in all vehicles and equipment must be used.

### 4.3 | RESPIRATORY LABEL

- You should not cough or sneeze into your hands or into the air;
- When coughing or sneezing, do so into the elbow, with your forearm bent, or use a tissue (which should be immediately placed in the waste container).

#### 4.4 | SANITATION AND DISINFECTION OF SURFACES

- Surfaces, including furniture, such as tables, desks, floors, coverings will be disinfected with suitable products;
- Sanitary facilities are disinfected with a mixed cleaning product that contains, at the same time, detergent and disinfectant in the composition, as application and action is easier and faster.

#### 4.5 | PERSONAL PROTECTION

- The Personal Protective Equipment (PPE) determined to prevent contagion by COVID-19, in different closed or open spaces, is the use of a mask.
- When arriving at the entrance area of a High Density Area, it is mandatory to wear a surgical type face mask or with the same level of protection.
- In all areas of low density, the use of a surgical type face mask is highly recommended but not mandatory.
