

The WHO Immunization Data Portal

Providing access to important immunization data and insights

<https://immunizationdata.who.int/>

Navigate the comprehensive Immunization Data Portal to discover immunization data trends over time. The portal allows users to search, interact, visualize, download, and share immunization data in an easier way.

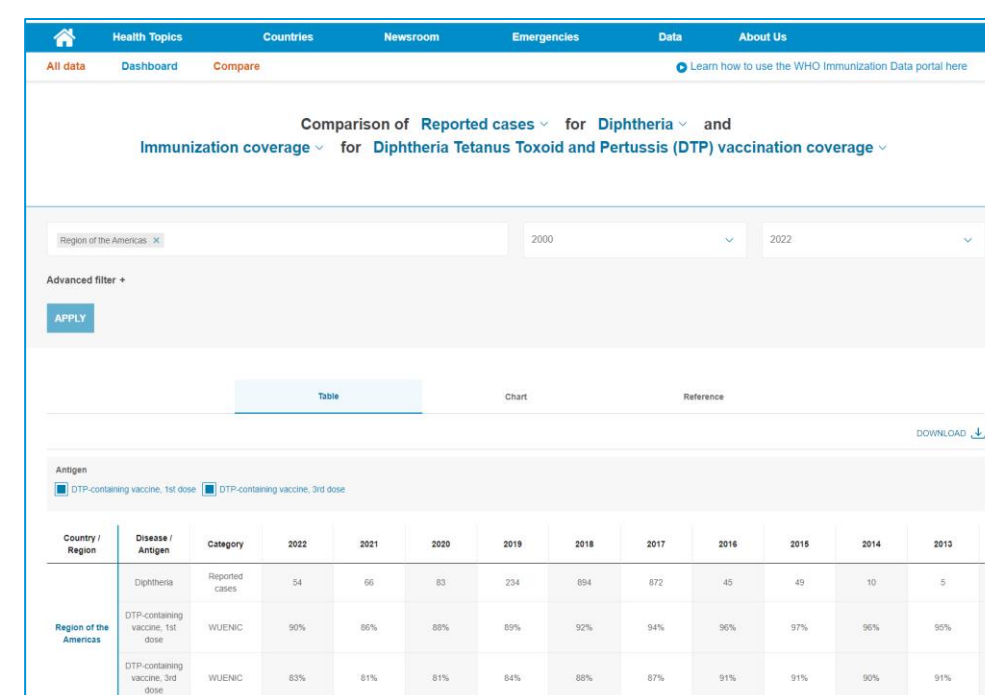

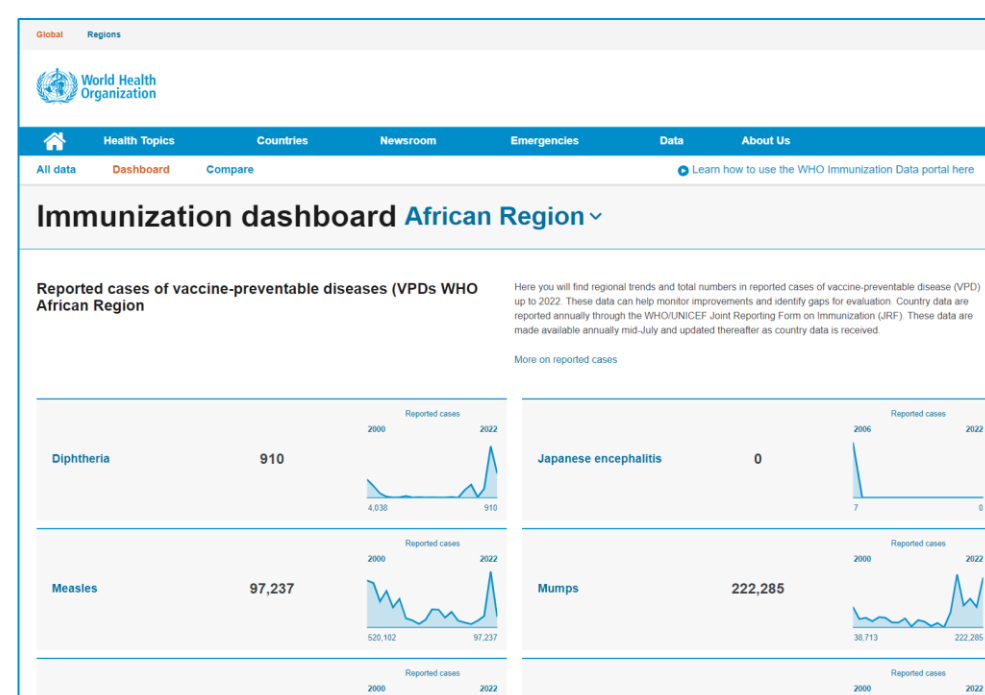

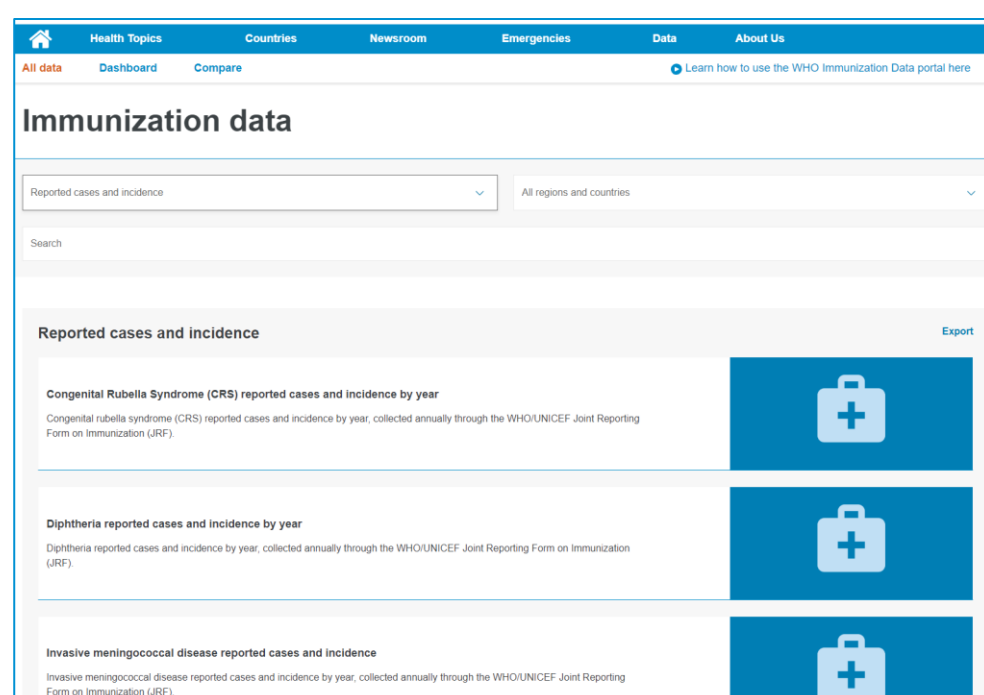

How does the Immunization Data Portal work?

Access and download data from the **“All data”** page. Deep dive by country and regional groupings in data tables, charts, and maps.

View global, regional, and country summaries and featured data from the **“Dashboard”** page.

Compare different data such as reported cases of VPDs and vaccination coverage data from the **“Compare”** page.

Access the portal’s **how-to video** for an overview of navigating the portal.

Data available on the portal

Vaccine Preventable Disease Reported cases and incidence data

WHO/UNICEF Estimates of National Immunization Coverage (WUENIC), HPV vaccination estimates, Protection at Birth vaccination estimates

Country reported administrative and official vaccination coverage data

Vaccination introductions and schedules

Immunization programme indicators

Provisional measles and rubella monthly data

COVID-19 vaccination insights report

Featured data:

- COVID-19 Vaccination Information Hub
- Subnational immunization coverage data
- [WUENIC](#) interactive country profiles

Additional datasets
