

VACCINE CARRIER

Model No - BCVC 46

Vaccine Storage capacity 2.8 ltr.
4 ice pack (0.6 ltr.)

Performance Data :

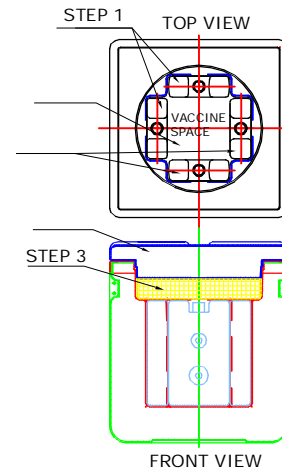

Rated cold life: 46 hours at +43°C with 4 number 0.6 liter frozen ice-packs

Tested cool life: 13 hours at +43°C with 4 number 0.6 liter cool packs at +5° C

Vaccine transport advice:

- => OPV : Only use frozen ice packs. NEVER transport freeze-sensitive vaccines in the same cold box as OPV.
- => BCG, Measles, MMR, MR and Yellow Fever : Cool-packs, refrigerated at +2°C to +8°C, are recommended, but frozen ice-packs will not harm these vaccines. If you use ice-packs, NEVER transport freeze-sensitive vaccines in the same cold box.
- => Other vaccines, including combination vaccines : Only use cool packs, refrigerated at +2°C to +8°C. NEVER transport these vaccines using frozen ice-packs.
