

VACCINE CARRIER

Model No - BBVC 23

Vaccine Storage  
capacity 0.9 ltr.  
2 ice pack (0.3 ltr.)

CAPACITY 0.90 LTR.

Performance Data :

Rated cold life: 17 hours 50 min at +43°C with 2 number 0.3 liter frozen ice-packs

Tested cool life: — hours at +43°C with 2 number 0.3 liter cool packs at +6° C

Vaccine transport advice:

- => OPV : Only use frozen ice packs. NEVER transport freeze-sensitive vaccines in the same cold box as OPV.
- => BCG, Measles, MMR, MR and Yellow Fever : Cool-packs, refrigerated at +2°C to +8°C, are recommended, but frozen ice-packs will not harm these vaccines. If you use ice-packs, NEVER transport freeze-sensitive vaccines in the same cold box.
- => Other vaccines, including combination vaccines : Only use cool packs, refrigerated at +2°C to +8°C. NEVER transport these vaccines using frozen ice-packs.
