

# Developing next generation rotavirus vaccines

Global Vaccine and Immunization Research Forum  
March 4-6, 2014  
Bethesda, MD

Mary Estes  
Gagandeep Khan  
Kathleen Neuzil  
Umesh Parashar  
Duncan Steele

# Objectives of Session

- Using rotavirus vaccine as example, discuss approaches to identify public health needs unmet by existing vaccines
- Review improvements desired for next generation vaccines
- Discuss the evaluation of new vaccines vs. currently licensed vaccines to document their added value.

## Target Outcome

- Discussion of a framework to guide the development and evaluation of improved vaccines

# Schedule
