Strengthening Immunization Services

Webinar Series: Strengthening immunization supply chains
with the Effective Vaccine Management (EVM) assessment tool

Planning and delivering an EVM assessment - Who, When and How?

Dan Brigden (WHO HQ)

Welcome to the **second** webinar in this four-part series

1. What is Effective Vaccine Management (EVM) and why is it so important?
02/06/22 15h CET
2. **Planning and delivering an EVM assessment - who, when and how?**
NOW!
3. Developing, implementing and validating a successful continuous improvement plan (cIP)
Thursday 16/06/22 15h CET
4. What does EVM tell us about the evolution of immunization supply chains from 2010 to 2022?
Friday 24/06/22 15h CET

Agenda for today

1. What is EVM?
2. Who? When? How?
3. Preparation
4. Creating an assessment
5. Collecting data
6. Finalizing the assessment
7. Q&A

What is EVM?

EVM

Setting a standard for the
vaccine supply chain

1. A set of **standards** that together define the optimal immunization supply chain
2. A **questionnaire** that can assess if a health facility meets those standards
3. A **secure website** to create and manage EVM assessments, and to analyze which standards have been met at national or subnational levels
4. A **mobile app** that is used to administer the questionnaire
5. An **improvement planning tool** that can be used to develop a continuous improvement plan (cIP) based on the assessment findings

Who? When? How?

Who?

- **Everyone!** (Anyone with a phone and a data-connection)
- For a “Full National” assessment, MOH & EPI staff, health facility managers, cold chain technicians, implementing partners such as UNICEF, WHO, etc.

When?

- For Full National, every **3-5 years**.
- Other types of assessment (targetted, supervisory) can be conducted at any time and with any frequency.

Who? **Everyone**

Insights from EVM are not restricted to a national EVM assessment.

Anyone can create an EVM account, download the app, and assess a health facility at any level, wherever and whenever they want.

For example, a district store manager can assess his/her facility, analyze the results, implement an improvement plan, and then validate the improvement activities by re-assessing the facility.

How to conduct an EVM assessment (in 10 steps)

1. **Prepare:** Get buy-in from all cIP stakeholders and agree timeline
2. **Prepare :** Secure funding and HR resources to conduct EVM assessment
3. **Prepare :** Conduct EVM Manager training (2 days)
4. **Prepare :** Complete EVM country set-up
5. **Assess:** Create assessment
6. **Assess:** Conduct EVM Assessor training (5 days)
7. **Assess:** Collect data
8. **Assess:** Validate data and finalise EVM assessment
9. **Plan:** Conduct cIP workshop and finalise cIP
10. **Plan:** Implement and monitor cIP

Video: The EVM2 Process

<https://www.youtube.com/watch?v=lgG79kdWBW8>

Pre-assessment planning

- ✓ Secure necessary funding and HR resources
- ✓ Finalize timeline for all EVM activities
- ✓ Formalize cIP governance (“buy-in”)
- ✓ Conduct EVM Manager training
- ✓ Complete EVM country set-up – X days
- ✓ Conduct EVM Assessor training

EVM country set-up

PREPARATION

ASSESS

PLAN

IMPLEMENT

MONITOR

Each country has a private EVM web portal hosted by WHO.

All EVM country set-up activities can be completed on the web portal.

Once the set-up has been completed, EVM assessments can be created and delivered.

Data collection is conducted using the *EVM Assessor* mobile app – a questionnaire for a health facility is downloaded onto the device and once the assessor has collected the data at the facility, the questionnaire can then be uploaded to the WHO database and analyzed.

EVM Assessor app

Each country has a private EVM web portal

Before a country can conduct an EVM assessment for the first time, three steps must be taken:

1. [Get started – create your account](#)
2. [Configure country accounts](#)
3. [Complete setup](#)

Subsequent assessments conducted by a country will be simpler, since these steps only need to be completed once.

Effective Vaccine Management ABOUT EVM

A global initiative to improve immunization systems and save lives

EVM data-security policies

The EVM tool has been designed to ensure that national policies of data-confidentiality are always respected. This is accomplished in three ways:

1. By restricting access to the EVM tool only to approved and authenticated users
2. By enforcing strict role-based administration that ensures only designated access to country data; in other words, only designated national managers can assign additional role-based access to other users, for example by assigning a user an assessor role
3. By following organization-wide data-storage policies and practices

Help for EVM managers

The following resources, available on TechNet-21, provide national, subnational, and independent EVM managers with comprehensive guidance on how to use set up, create and deliver EVM assessments.

1. Get started – create your account

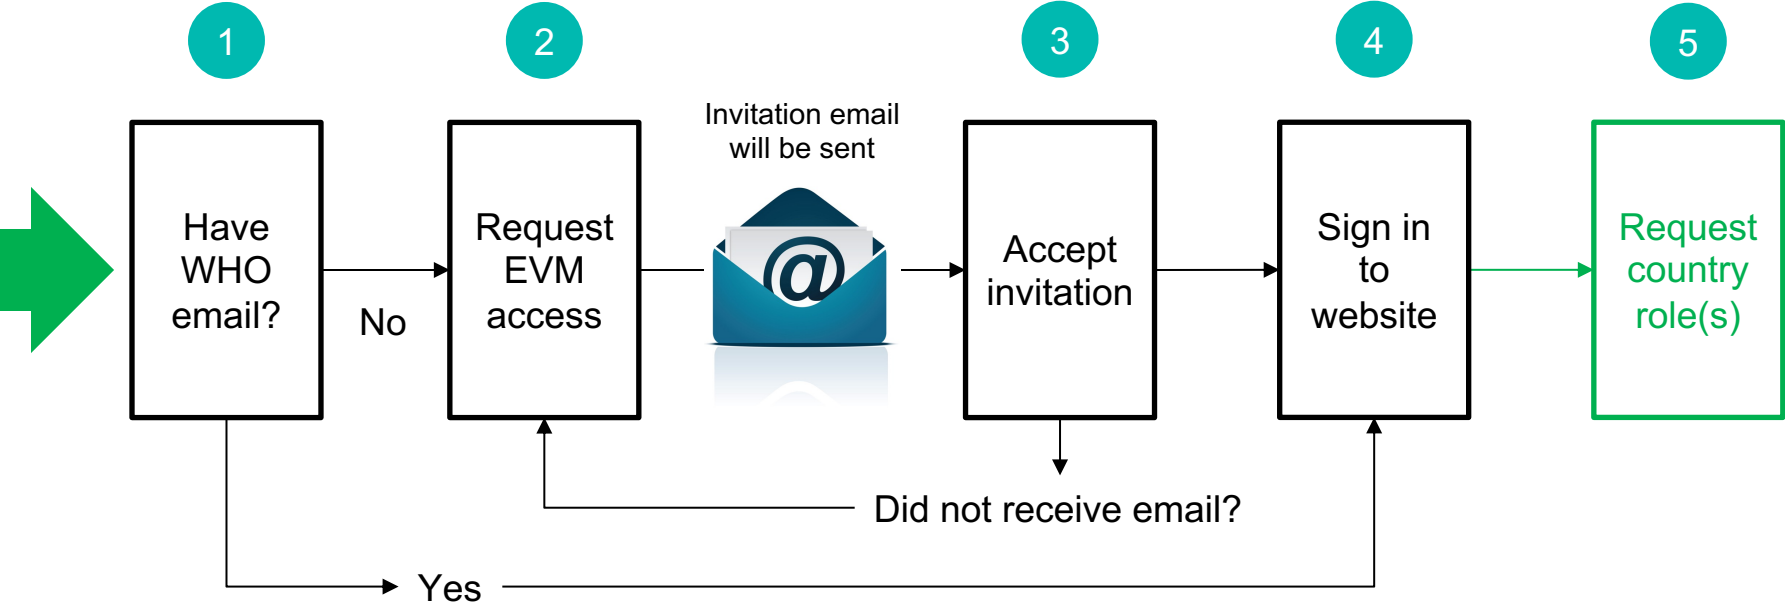

The first step is to designate at least one national EVM manager.

The manager will be the EVM focal point for that country and will be responsible for **managing all other roles in EVM for that country**.

Once the manager has an EVM account, they can sign in to the EVM website and assign roles to other users.

<https://extranet.who.int/evm2/web>

Creating an EVM account

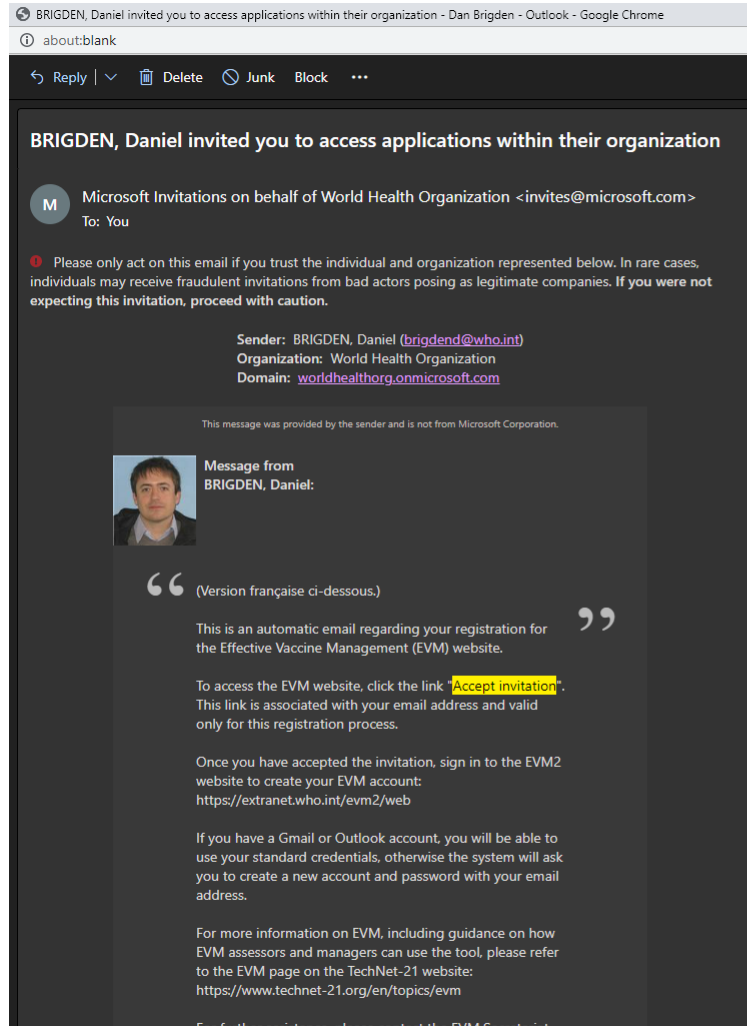

Request EVM access

Send an email to:

evmadmin@who.int

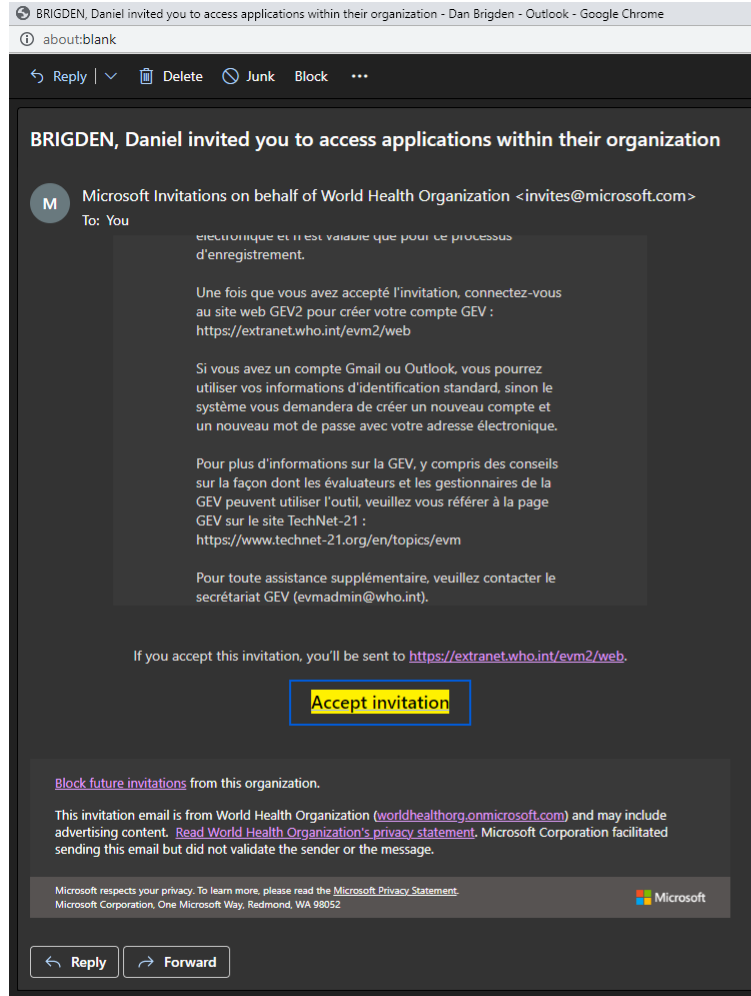

You will receive an email like this...

Accept the invitation

At the bottom of the email, click "Accept invitation".

You will be taken to the EVM website and can then sign in.

The screenshot shows an Outlook email interface. At the top, the browser address bar displays "BRIGDEN, Daniel invited you to access applications within their organization - Dan Brigden - Outlook - Google Chrome" and "about:blank". The email header shows "BRIGDEN, Daniel invited you to access applications within their organization". The sender is identified as "Microsoft Invitations on behalf of World Health Organization <invites@microsoft.com>". The recipient is "To: You". The email body contains text in French, including instructions to accept the invitation and access the GEV2 website. A yellow button labeled "Accept invitation" is highlighted with a blue border. At the bottom, there are "Reply" and "Forward" buttons.

BRIGDEN, Daniel invited you to access applications within their organization

Microsoft Invitations on behalf of World Health Organization <invites@microsoft.com>
To: You

électronique et il est valide que pour ce processus d'enregistrement.

Une fois que vous avez accepté l'invitation, connectez-vous au site web GEV2 pour créer votre compte GEV :
<https://extranet.who.int/evm2/web>

Si vous avez un compte Gmail ou Outlook, vous pourrez utiliser vos informations d'identification standard, sinon le système vous demandera de créer un nouveau compte et un nouveau mot de passe avec votre adresse électronique.

Pour plus d'informations sur la GEV, y compris des conseils sur la façon dont les évaluateurs et les gestionnaires de la GEV peuvent utiliser l'outil, veuillez vous référer à la page GEV sur le site TechNet-21 :
<https://www.technet-21.org/en/topics/evm>

Pour toute assistance supplémentaire, veuillez contacter le secrétariat GEV (evmadmin@who.int).

If you accept this invitation, you'll be sent to <https://extranet.who.int/evm2/web>.

What is “My Facilities”?

Who? Everyone

Insights from EVM are not restricted to a national EVM assessment. **Anyone** can create an EVM account, download the app, and assess a health facility at any level, wherever and whenever they want. For example, a district store manager can assess his/her facility, analyze the results, implement an improvement plan, and then validate the improvement activities by re-assessing the facility.

2. Configure country accounts

By default, an EVM user only has access to My Facilities. They have no role for any country.

The country manager can assign the following roles to an EVM user. A user can have different roles for different countries. For example, the same user can be an assessor for Angola, a country manager for Bangladesh, a subnational manager for California (USA) and an observer for Tajikistan.

Role per country	The user can...
Assessor	<ul style="list-style-type: none">• Be assigned questionnaires as part of an EVM assessment• Download and upload location questionnaires
Manager (national)	<ul style="list-style-type: none">• Manage every aspect of the country's EVM setup and assessments
Manager (subnational)	<ul style="list-style-type: none">• Manage locations and create assessments for specified AUs in a country
Observer	<ul style="list-style-type: none">• View every aspect of the country's EVM setup and performance.• Only view, he cannot edit.

Subnational management

A country has one or more **national** EVM managers. The national manager can assign **subnational** manager responsibility to other users.

Subnational managers control facilities in their area, and can create full subnational and targeted assessments for their facilities. They cannot assess facilities outside their area or create national assessments.

National

(Sub)national

Want to become a manager for a country?

If you have not yet been made a country manager, you can **request access**.

The country manager can then **approve** or **reject** your request.

If there is no manager for that country, contact your WHO or UNICEF immunization focal point.

If you do not want to be a country manager, you can still be an independent manager and create assessments using **My Facilities**.

3. Complete setup

Before an assessment can be created, the country manager must perform the following setup tasks.

Task	Purpose
Add administrative units (AU)	To organise the country into at least two subnational levels for reporting purposes, and to assign subnational access (if required)
Add locations	To add health facilities to the EVM database so they can be included in assessments
Add vaccines	To add every vaccine used in the country's immunization schedule, both at national and subnational levels, so that the required storage capacity requirements can be calculated

3.a Adding administrative units

An administrative unit (AU) is a portion of a country or other region delineated for administrative purposes.

For example, in the United States of America the primary first-level AU is the 'state' – California, Texas, Florida, etc. These states are subdivided into 'counties', for example there are 67 counties (second-level AU) in the state of Florida.

There may be two, three, four or even more levels of AU in a country. Every country in the world is subdivided into a unique set of AUs.

3.b Adding locations

A *location* is a health facility that stores vaccines or provides immunization services.

When an EVM assessment is created, a representative sample of health facilities is selected using a random sampling methodology. Before you can conduct an EVM assessment, therefore, all locations in the country must be added. You can do this in two ways:

- Add locations manually (one-by-one)
- Add all locations using the EVM import-export tool

If a country has an up-to-date inventory of all health facilities, this step is straightforward.

Locations must be associated with the AU in which they are located.

Create
Export

SP	R3-L017-008	Dry'S Dispensary	-	Yes	
SP	R3-L017-009	Kapngetuny Dispensary	-	Yes	
SP	R3-L017-010	Kapsoya Health Centre	-	Yes	
SP	R3-L017-011	Katuiyo Dispensary	-	Yes	

3.c Adding vaccines

To enter the vaccines used in your national immunization schedule:

1. In the **Setup** menu, select **Vaccines**.
2. The list of vaccines for your country is displayed.
 - Click **Add PQS** to add a WHO PQS-prequalified vaccine
 - Click **Add Generic** to add a vaccine that is *not* WHO PQS-prequalified
3. Enter the following six vaccine type attributes

Attribute	Description	Example
Vaccine*	The type of vaccine	DTaP
Manufacturer*	Name of the vaccine manufacturer	GlaxoSmithKline Biologicals SA
Commercial name*	The vaccine's commercial name	Boostrix
Formulation*	The vaccine's pharmaceutical form	Liquid: ready to use
Presentation*	The vaccine presentation	Vial
Doses per primary container*	The number of vaccine doses contained in the primary container	1

* Indicates mandatory value

4. If you are adding a PQS vaccine, the remaining fields will be automatically populated from WHO PQS Vaccine database⁴ records. If you are adding a generic vaccine, you will need to fill them in manually.

Let's move on...

EVM2 assessments come in different flavours

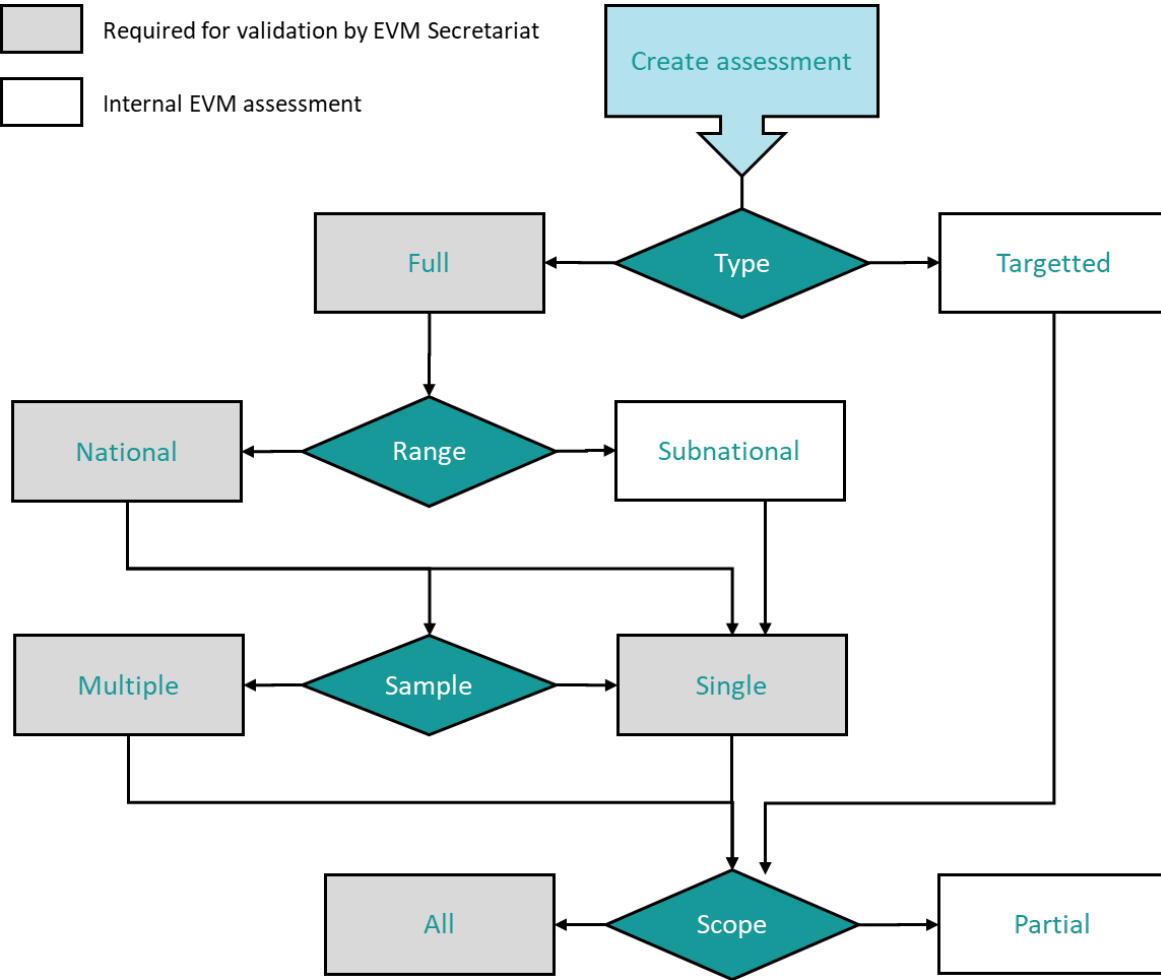

Type – use random site selection or pick locations

Range – choose locations from the entire country or from specific areas

Sample – make a single random site selection for the entire country or individual ones for each province/ state

Scope – assess all EVM requirements or only a subset

Example assessments

Assessment	Type	Range	Sample	Scope
An assessment covering the whole country, assessing everything	Full	National	Single	All
An assessment of two states only, assessing everything	Full	Subnational (California and Oregon only)	Single	All
An assessment of all private-sector health clinics at SP level, assessing everything	Targetted	N/A	N/A	All
An assessment of temperature management at facilities in one state where poor temperature management is suspected	Targetted	N/A	N/A	Partial (E2 Temperature management only)
An assessment of waste management equipment in one state	Full	Subnational (California only)	Single	Partial (E9 Waste management & C2 Equipment only)

Conducting an EVM assessment

EVM Manager

1. Create EVM assessment
2. Assign locations to assessors

EVM Assessor

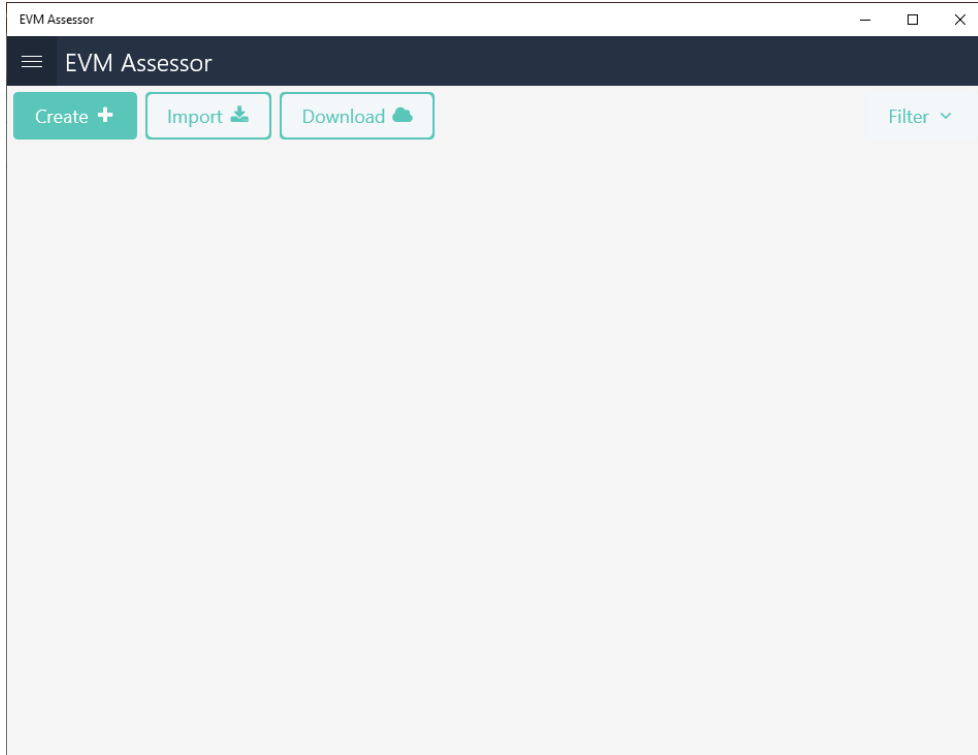

For each assigned location:

1. Download questionnaire
2. Collect data at health facility
3. Upload completed questionnaire

EVM Manager

1. Review, validate and approve uploaded questionnaires
2. Finalize assessment
3. Analyze results
4. Generate EVM Report
5. Download cIP Development Tool

Using the EVM Assessor app – live demo

EVM Assessor

For each assigned location:

1. Download questionnaire
2. Collect data at health facility
3. Upload completed questionnaire

Help for EVM assessors

The following resources available on TechNet-21, provide EVM assessors with guidance on how to use the EVM app to conduct health facility assessments.

Title	Author	Year	Type	Language

Effective Vaccine Management (EVM) Assessor Quick Start Guide

1. Request an EVM account
2. Sign into your EVM account
3. Request assessor access
4. Install the EVM app
5. Conduct assessments

1. Request an EVM account

Contact the EVM Global Administrator at evmadmin@who.int with the following details:

- Name
- Email address
- Organisation
- Job title
- Telephone number
- Address

The EVM Global Administrator will review your request and notify you once it is approved.

2. Sign into your EVM account

1. Open the EVM website:
<https://extranet.who.int/evm2/web/Public>
2. Select the menu in the top left of the screen, then select Sign in:

3. Select the email address that you used to request EVM access or select Use another account to enter the email address.
4. Enter and confirm your authentication details. The EVM home screen is displayed.
Your currently selected assessment country and language are shown in the top right of the screen. Your username and role are shown in the menu.

After any period of inactivity, you will be automatically logged out and will need to sign in again to continue using the EVM website.

3. Request assessor access

1. Sign into your EVM account (see page 1).
2. Select the menu in the top left of the screen, then select <your name> > Profile.
3. The User details tab is displayed by default. Select the Permissions tab to display it:

4. Select Request permission. The Request permission screen is displayed:

Fields marked with a * are mandatory.

5. In the Role* field, select Assessor (locations).
6. In the Country* field, select the country you want to assess.
7. In the Please explain why you require access field, enter an explanation of why you require access.
8. Select Save. The National Manager for the country will review and approve your request.

Once approved, you can sign into the EVM website to download and upload the country questionnaires you are assigned from your EVM mobile app.

EVM
Setting a standard for the
vaccine supply chain

Effective Vaccine Management (EVM) Assessor Guide

Date 13 October 2021

Version v1.01

Status PUBLISHED

Contact evmadmin@who.int

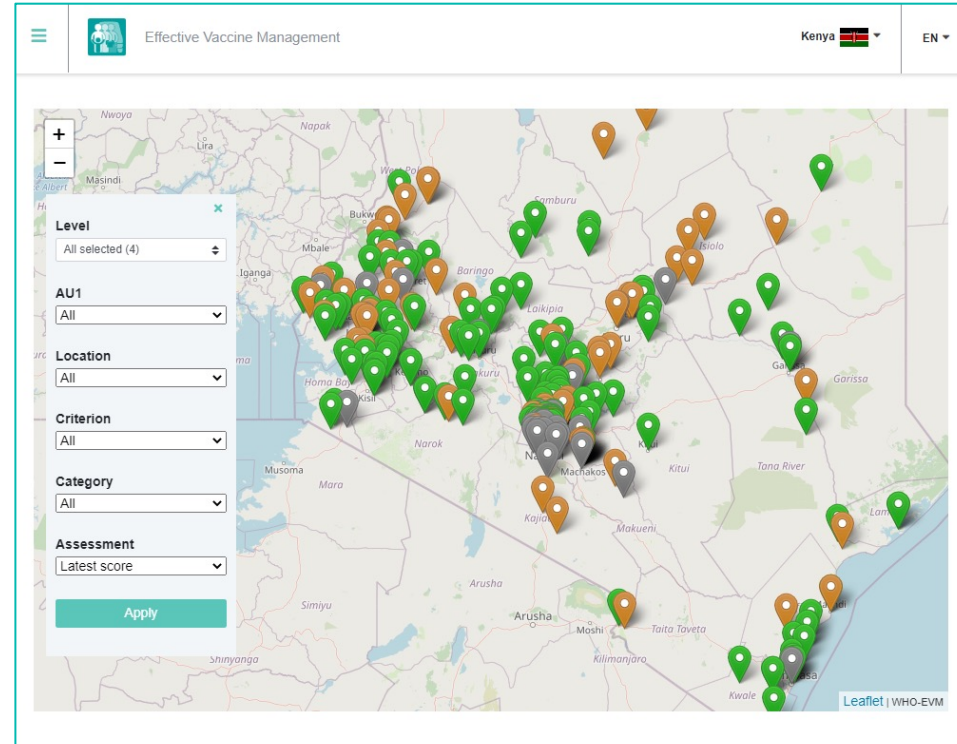

Alignment with improvement planning activities

Online dashboards enable **comprehensive interrogation** of ISC performance in real-time.

Includes **AQE** (Availability, Quality, Efficiency) reporting.

EVM Report template in MS Word can be automatically generated.

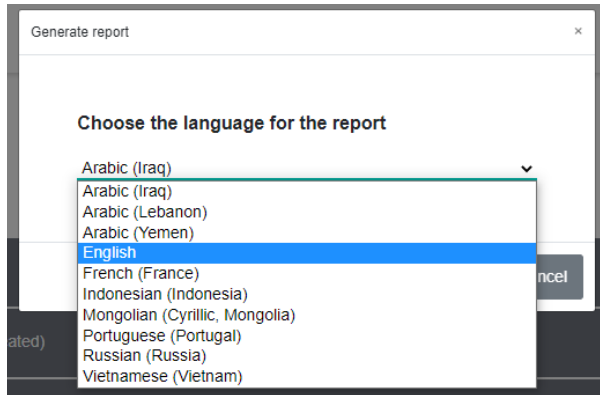

Improvement planning activities can be monitored and validated with follow-up assessments.

Download an EVM Report template

Once an assessment has been completed, an EVM Report template can be downloaded.

The template contains all the necessary heat-maps and criteria/category/requirement scores.

EVM

Setting a standard for the vaccine supply chain

Effective Vaccine Management (EVM) Sri Lanka 2021

Assessment Report

Country	Sri Lanka
Assessment name	Sri Lanka Nov 2021/10
Year	2021
Description	Full, National, Single, 85, 10, OSP Nov2021

Download the **clP Development Tool**

Once an assessment has been completed, the EVM manager can download an Excel tool to help prepare for the clP workshop.

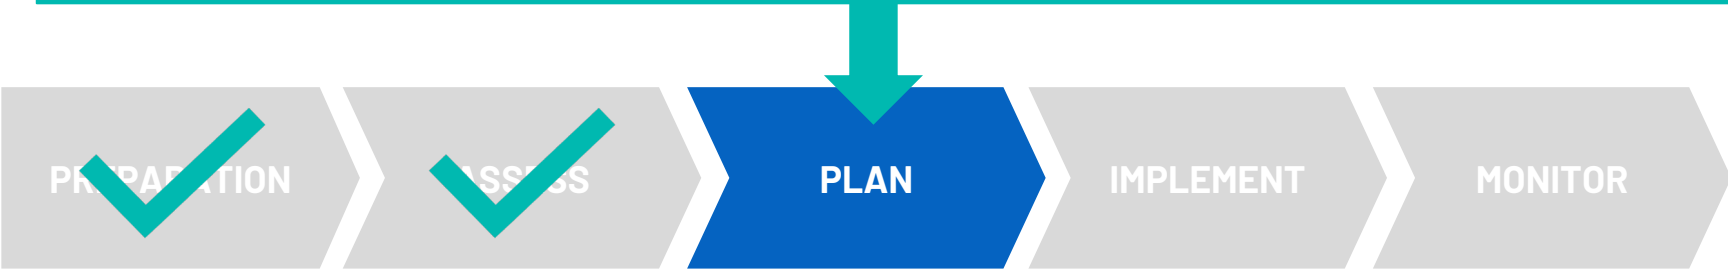

The tool includes a list of *every requirement score* from the assessment. EVM managers can use this to generate a list of improvement activities that address the weaknesses identified in an EVM assessment.

	A	B	C	1	Category code	Code	Parent	Requirement	
1	Category code	Code	Parent	Requirement	43	C2.1.1	R0042	R0039	The facility has sufficient negative cold storage capacity to accommodate the expected maximum
2	C1.1	R0001		The facility has functional means of communication.	44	C2.1.1	R0043		The facility's vaccine cold storage equipment is appropriate for the expected maximum vaccine s
3	C1.1	R0002	R0001	The facility has a functional landline telephone.	45	C2.1.1	R0044	R0043	The facility has one or more vaccine cold rooms.
4	C1.1	R0003	R0001	The facility has reliable mobile phone reception.	46	C2.1.1	R0045	R0043	The facility has one or more vaccine freezer rooms.
5	C1.1	R0004	R0001	The facility has a reliable internet connection.	47	C2.1.1	R0046		Vaccine cold/freezer rooms meet minimum requirements.
6	C1.1	R0005		The facility receives at least eight hours of grid electricity each day.	48	C2.1.1	R0047	R0046	Cold/freezer rooms have dual cooling units.
7	C1.1	R0006		There is a reliable supply of fuel for vehicles for supervision visits.	49	C2.1.1	R0048	R0046	Cold/freezer room cooling units have duty sharing.
8	C1.1	R0007		The facility has access to water, sanitation and hygiene service (WASH).	50	C2.1.1	R0049	R0046	Cold/freezer rooms have voltage regulators.

Next week...
Developing, implementing and validating a successful cIP Thursday
16/06/22 15h CET

What is EVM?

1. A set of **standards** that together define the optimal immunization supply chain
2. A **questionnaire** that can assess if a health facility meets those standards
3. A **secure website** to create and manage EVM assessments, and to analyze which standards have been met at national or subnational levels
4. A **mobile app** that is used to administer the questionnaire
5. An **improvement planning tool** that can be used to develop a continuous improvement plan (cIP) based on the assessment findings

More information on EVM2

www.technet-21.org/topics/evm

This page provides a list of EVM2 resources that can help:

- [Assessors](#) to download, install and use the EVM app to assess health facilities
- [Managers](#) to set up their EVM projects to create and deliver EVM assessments
- [Decision-makers](#) to develop a continuous improvement plan (cIP)
- [Trainers](#) to deliver customizable EVM training to assessors and managers

User guides, SOPs, videos, tutorials, training... everything you need.

Take EVM for a test-drive

Create an EVM account – send email to evmadmin@who.int

Download the app on the Android Play Store, Apple Store, or Microsoft Store – search for “EVM Assessor”

Create your own assessments on the EVM website:

<https://extranet.who.int/evm2/web>

THANK YOU

EVM

Setting a standard for the
vaccine supply chain
